No. Unless you want to mention, or include psychotic nitwit, N8WWM.

The Aaron Voobner caricature, was a figment of some trolls imagination.
He was merely another gadfly/google pest, etc. (...more or less...)

2186. My new $20 antenna

Newsgroup: rec.radio.cb
Date: 2006-08-01 04:12:32 UTC
From: internetprofiteering@gmail.com
Message-ID: <1154405552.878678.304400@i3g2000cwc.googlegroups.com>
Source record: 218818

I have been in the market for a new HF for some time now.

I have been using a $400 Force 12 vertical mounted on the stern for a few years now. It is OK, but not great.

I heard about this guy on ebay that sells an antenna called CondoBuster. It is a 13 to 30 mHz ham radio antenna for people that live in condos or other type of restricted areas. The thing is 37 feet long. It covers everything form 13 to 30 mHz including CB band with no gaps. It is like a dipole antenna except it is fed about a third or so of the way from one end. So I bought one.

Well, the thing is quite well build and very light weight. I strung it from the stern over the top of the mast and then down to the bow and put a spring in series with the antenna on each end. I placed the shorter end back by the stern and fed it with RG8X coax. The great thing about this is that this is a plug and play item. You don't have to dink around with it or adjust it for a given frequency. You don't use a balun or anything else. I just soldered the coax to the antenna. And, that is it.

For comparison I left the Force 12 on the stern. There was a huge difference between the two. Much more then I expected. With the newe one I can hear more and I get better reports from people I talk to.

All in all, that is the best $20 bucks I have ever invested. It is called CondoBuster, I bought it on ebay and as I recall the company is out of Colorado.

you do not post correctly you lie and misrepresent the fact that you
claim misspelling is proof of inferioity is amoug your dishonorable
untruth If mispelling were proof of stupdity then Albert Einstain would
be reckoned one of the dumbest men on earth
...
It is not only your misspelled and awkward posts that brand you as stupid,
but your insatiable drive to respond to each and every post made whether you
know the person or not. You, Mark, simply do not know when to leave well
enough alone. It has been documented that you made over 800 and perhaps 900
posts (using sockpuppets) in June alone. Is this the watermark of an
intellectual giant? You post idiotic, third grade level one-liners day after
day after day while at the same time saying nothing. You, Mark, are the sum
of your posts and one can, and must, draw the conclusion that you are not
overly bright. I misrepresent nothing and have not lied. I DO post correctly
and any attempt by you, a nonentity, to judge or malign me is of no
consequence and has absolutely no merit. You, of all people, certainly have
no room to pass judgment.
...

the inablity to reconize the diefferent between statements like "it
would take killing you to stop you from posting" and what would be a
true death threat "I will post stop you from posting by any means
neccasary. Indeed thatI use langauge better than ost of you is clear
proof I am not any of your inferior
...

Aw, garsh. Did someone actually post such comments or did you twist them to suit your purposes? If such comments were made then perhaps, just perhaps, they stemmed from your constant flooding of the groups with your juvenile drivel. Has it not yet dawned upon you, Mark, that you are one of the least popular posters hereabout? You rank only one half step below the most reviled poster of all time, that being Roger Wiseman.
And Mark, your delusion "thatI use langauge better than ost of you " is just that...a delusion. 800 misspelled posts in a single month quickly lay that claim to rest. You clearly DO have mental superiors in these groups and they are many. You are not as intellectually gifted as you like to comport yourself to be. We all have mental superiors and I just happen to be one of yours. I am not bragging...it is merely how life is. Learn to live with it, Mark.

PS: Thanks for the comedic relief. Who the heck is "Albert Einstain"? Is that the chubby little Cosby kid whose clothing was always food-stained and dirty?

Harken back a few months, Mark. It was Roger who made the post threatening to send your posts to your father-in-law. You even asked him why he'd want to do that to an elderly man.
There were no "confederates", merely Wiseman getting under your thin skin. Again, as you often do, you have either forgotten the facts or, more likely, are lying to suit your own purposes.
In short, Mark, you are a liar. A bold-faced, underhanded liar. How about telling the truth once in a while? Not that you can....

> He and his confederates publish my father in law's person info weeks
> ago so no further intrution realy occours by my republishing it and yet

another of those claiming to my superior
someone calling himself a child molestor

nah is it the same fellow
acting as Robeson intended with his posts this moning

You posted it.

> Wisemne you are just reposted an out of context statement

Nope, you made the statement and on more than one occasion.
And how does one become an out of context statement? One could repost
an out of context statrement, but it would be physically impossible to
become one.
What's "Wisemne?"

> that is what you seem to call being my Mental Superior

A corpse is your mental superior, dumbass.
> I don't buy it

No, you'd have to steal from your daddy or shemale wife to pay for it.

Hello hello.

Finally I post about something other than my mobile rig! Hurray ;)

I got me a SSB boat anchor base, and I've bought 100ft of RG6 coax to make an antenna. I have a tree in my backyard that's about 80 feet or so tall (Some type of pine or cedar). I'm thinking of making a coax dipole, or a wire dipole and throwing this thing as far up the tree as I can, mounted vertically. I'm on a hill, and facing the direction I want to go, there's no obstructions from the tree (except behind the tree, where my house is about 30 feet).

I couldn't really find too much information on tree mounted dipoles. Is this a bad idea? I was a little concerned about ground, but I figure that a ground rod would negatively impact the dipole action (We only get lightning at most once a year in oregon for an hour, so lightning isn't much of a concern, however I guess in a bad storm I can disconnect from my radio and throw all the wire outside? heh.

I'm guessing the tree will negatively impact performance? My other option is to possible put an antenna on top of a hornet infested garage which also has clear line of sight down the hill, however the garage is at a lower elevation than the house and the tree, and I'd only be able to mount a 1/4 wavelength antenna on this.

Spark,
Be carefull of marqueer. He is an admitted sodomite.
Sodomites are wicked and sinners before the Lord exceedingly (Gen.
13:13), are violent and doom nations (Gen. 19:1-25; Jgs. 19), are
abominable to God (Lev. 18:22), are worthy of death for their vile,
depraved, unnatural sex practices (Lev. 20:13; Rom. 1:32), are called
dogs because they are filthy, impudent and libidinous (Deut. 23:17,18;
Mat. 7:6; Phil. 3:2), produce by their very presence in society a kind
of mass intoxication from their wine made from grapes of gall from the
vine of Sodom and the fields of Gomorrah which poisons society's mores
with the poison of dragons and the cruel venom of asps (Deut.
32:32,33), declare their sin and shame on their countenance (Isa. 3:9),
are shameless and unable to blush (Jer. 6:15), are workers of iniquity
and hated by God (Psa. 5:5), are liars and murderers (Jn. 8:44), are
filthy and lawless (2 Pet. 2:7,8), are natural brute beasts (2 Pet.
2:12), are dogs eating their own vomit and sows wallowing in their own
feces (2 Pet. 2:22), will proliferate at the end of the world bringing

final judgment on mankind (Lk. 17:28-30), have been finally given up by God to uncleanness dishonoring their own bodies among themselves, to vile affections, and to a reprobate mind such that they cannot think straight about anything (Rom. 1:23-28), have wholly given themselves over to fornication and gone after strange flesh (Jude 7), must be pulled as faggots from the fire (Jude 23), and have no hope of Heaven unless they repent (Rev. 22:15), which they can't do in their prideful state (Jer. 6:15). They need to hear this truth if they are to have any hope of penitence, faith in Jesus Christ and salvation (I Timothy 4:2-4).

What is your problem homophobe? God loves gay men like me as much as anyone else!

My dad was gay and I'll bet he is in heaven.

Morkie & Davey Hell are sodomites!!
SODOMY IS AN ABOMINABLE SIN, WORTHY OF DEATH.
"If a man also lie with mankind, as he lieth with a woman, both of them have committed an abomination: they shall surely be put to death; their blood shall be upon them." Leviticus 20:13. "Who knowing the judgment of God, that they which commit such things are worthy of death, not only do the same, but have pleasure in them that do them." Romans 1:32.

See also Leviticus 18:22, Genesis 19, Romans 1:18-32, I Corinthians 6:9-11, I Timothy 1:10, and Jude 7.
GOD HATES ALL WORKERS OF INIQUITY.
"The foolish shall not stand in thy sight, thou hatest all workers of iniquity." Psalm 5:5.
See also Leviticus 20:23, Leviticus 26:30, Deuteronomy 32:19, Psalm 5:6, Psalm 11:5, Malachi 1:3, Matthew 7:23, and Romans 9:13.
JESUS CHRIST DIED ONLY FOR THOSE WHO BELIEVE.
"For God so loved the world that He gave His only begotten Son, that

whosoever believeth in Him should not perish, but have everlasting life." John 3:16.
See also John 13:1, John 17:9, Ephesians 5:25, etc.
ONLY GOD'S ELECT HAVE THE CAPABILITY TO BELIEVE.
"Therefore they could not believe, because that Esaias said again, He hath blinded their eyes, and hardened their heart; that they should not see with their eyes, nor understand with their heart, and be converted, and I should heal them." John 12:39,40.
See also John 10:11,26, Matthew 11:25,26, Acts 13:48, Romans 9:19-24, etc.
SODOMITES ARE PROUD OF THEIR SIN ("GAY PRIDE"), AND IN THAT PRIDEFUL STATE THEY CANNOT REPENT - YOU CANNOT REPENT OF SOMETHING YOU'RE PROUD OF.
"Were they ashamed when they had committed abomination? nay, they were not at all ashamed, neither could they blush: therefore they shall fall among them that fall: at the time that I visit them they shall be cast down, saith the LORD." Jeremiah 6:15.
See also Jeremiah 13:23, Romans 1:24-32, Ezekiel 16:49-50, etc.
THE SODOMITES' ONLY HOPE IS TO HAVE THE UNAMBIGUOUS TRUTH PREACHED TO THEM, AND PERHAPS GOD WILL SOFTEN THEIR HEARTS AND GRANT THEM REPENTANCE TO DEPART FROM THEIR SIN AND NAME THE NAME OF CHRIST. NOT VERY LIKELY, THOUGH, SINCE GOD HAS GIVEN THEM UP.
"Nevertheless the foundation of God standeth sure, having this seal, The Lord knoweth them that are his. And, Let every one that nameth the name of Christ depart from iniquity." II Timothy 2:19. "Wherefore God also gave them up to uncleanness...unto vile affections...to a reprobate mind." Romans 1:24-28.
See also II Timothy 2:24-26, Psalm 5:5, I Corinthians 6:9-11, Acts 17:30, Jude 22,23, etc.
THERE IS A HELL WHERE ALL IMPENITENT SINNERS WILL RESIDE FOR ALL ETERNITY. THAT INCLUDES SODOMITES (CALLED "DOGS").
"And they shall go forth, and look upon the carcasses of the men that have transgressed against me: for their worm shall not die, neither shall their fire be quenched; and they shall be an abhorring unto all flesh." Isaiah 66:24. "For without are dogs..." Revelation 22:15.
See also Mark 9:44, Luke 16:23, Revelation 20:15.
In summary, sodomites are wicked and sinners before the Lord exceedingly (Gen. 13:13), are violent and doom nations (Gen. 19:1-25; Jgs. 19), are abominable to God (Lev. 18:22), are worthy of death for their vile, depraved, unnatural sex practices (Lev. 20:13; Rom. 1:32), are called dogs because they are filthy, impudent and libidinous (Deut. 23:17,18; Mat. 7:6; Phil. 3:2), produce by their very presence in society a kind of mass intoxication from their wine made from grapes of gall from the vine of Sodom and the fields of Gomorrah which poisons society's mores with the poison of dragons and the cruel venom of asps (Deut. 32:32,33), declare their sin and shame on their countenance (Isa. 3:9), are shameless and unable to blush (Jer. 6:15), are workers of iniquity and hated by God (Psa. 5:5), are liars and murderers (Jn. 8:44), are filthy and lawless (2 Pet. 2:7,8), are natural brute beasts (2 Pet. 2:12), are dogs eating their own vomit and sows wallowing in

their own feces (2 Pet. 2:22), will proliferate at the end of the world bringing final judgment on mankind (Lk. 17:28-30), have been finally given up by God to uncleanness dishonoring their own bodies among themselves, to vile affections, and to a reprobate mind such that they cannot think straight about anything (Rom. 1:23-28), have wholly given themselves over to fornication and gone after strange flesh (Jude 7), must be pulled as faggots from the fire (Jude 23), and have no hope of Heaven unless they repent (Rev. 22:15), which they can't do in their prideful state (Jer. 6:15). They need to hear this truth if they are to have any hope of penitence, faith in Jesus Christ and salvation (I Timothy 4:2-4).

Well I hate all of you cross posting kooks.

Anyways, back onto subject.

I constructed a dipole out of coax, seperated the shield/outer braid from the center wire (left the insuluation on the center wire). Each length is about 104". I tried this horizontally on my porch, horrible (5+SWR), picked up TONS of noise from busy channels (S8) while S1 on non busy channels, and just generally didn't work well.

(My porch space was limited, and my porch is about 10 feet above ground, so I was experimenting).

I tried the antenna diagnolly, Stetched out (Like a verticle, just 45 degrees sideways). SWR dropped down to 1.8, couldn't get out.

Finally tied this thing up to a tree, suspended by cord (it was dark, so i just threw it up quickly). The bottom of the antenna just touches ground. SWR of about 4. I'm hoping to drop the SWR more by raising it even higher

Story claims that the problem with BPL (Broadband over Power Line) is that CB and Ham radio will cause interference to it, making it unreliable!!

... On paper, using power lines as a means for distributing traffic throughout a residence is a no-brainer. ... One contributing factor is the possible interference from HAM or CB radio communications, say experts, that could decrease the reliability of the transmissions.

http://www.xchangemag.com/articles/681tech02.html

Full story:

The Latest Buzz on Powerline
By Meg McGinity

It's been talked about and promised for years, yet the market for it never seems to materialize. But sporadic voices in the occasional booths and panels around GLOBALCOMM earlier this summer were proclaiming enthusiastically the promise - and growing presence - of broadband to and through the home via power lines.

While many chip makers, device manufacturers and some innovative service providers have been champing at the bit to leverage the electric infrastructure so prevalent in many countries, utilities for the most part have been reticent to jump into or partner with the broadband and networking business. One of the things holding back the progression of tapping into power lines for in-home networking has been the conservative nature of the utility companies that own the assets, say executives. "Utilities have been slow to grasp this," says Chano Gomez, vice president of technology and strategic partnerships at DS2 (Design of Systems on Silicon), which supplies high-speed powerline chips to device makers such as NETGEAR. "They are waiting for the pioneers."

Those pioneers smell a market. That's because as service providers continue to invest in network upgrades that promise faster connections to the home, they are faced with the quagmire of how to distribute that fat pipe throughout the residence. "The problem providers have is they know how to bring broadband to the home, but they can't distribute the signals inside," says Gomez.

The more appliances in the home that can access more applications, the more a service provider could recoup in added revenue. That's where using powerline technology as a means for trafficking content throughout the home comes in.

CURRENT Communications' Jim Dondero

On paper, using power lines as a means for distributing traffic throughout a residence is a no-brainer. For one, electric lines are prevalent in nearly every home, so there would be no install required or disruption to a customer, or big investment by a carrier for equipment. It's getting more economical, too, say executives. Today, adding the powerline communication capability chip to a home gateway device adds about $25, but by year's end, with bigger volumes being produced, that cost will drop to about $15, estimates Gomez.

While only tech-savvy consumers at this point would know enough to buy the equipment in stores, standards and trade groups, like HomePlug Powerline Alliance, are pushing to make such equipment more robust and interoperable. One challenge, executives say, is dispelling the "quirky" label with which home-plug networking has been labored. One contributing factor is the possible interference from HAM or CB radio communications, say experts, that could decrease the reliability of the transmissions. Another potential problem for the powerline advocates is the difficulty in ensuring the quality of the electric wiring inside the home.

Other technologies aimed at home networking also have their strengths and vulnerabilities. For instance, wireless technology, which has gained momentum in modems for its portability factor, can have reliability, interference and security problems. Consumers have been buying their own access points for the home and stringing them together to create a network, much to the chagrin of providers, say industry executives. "Wireless in the home is a service provider's worst nightmare," says Tom Wendt, founder of Optical Entertainment Network. "We are finding consumers say 'come fix that for me.'"

Coax is another transport option, as championed by companies like Entropic Communications Inc. The company's network processor, c.Link, threads together devices using coax. Coax is abundant in homes and easy to work with and has the backing of organizations like MoCA (The Multimedia over Coax Alliance), but the physical wiring and drilling through walls for installation is not aesthetically ideal to consumers.

Gomez says the market outside the United States for powerline technology is gaining traction at a faster pace. Telefonica S.A., he says, already is using power lines for IPTV distribution within the home. European providers are eyeing it for gaming applications, linking one box to another.

Still, the powerline technology and movement has its skeptics. Some device vendors say that while they are testing it as a means for networking in their labs, the jury is out on the technology. "RBOCs want wireless," says Frank Galuppo, CEO at Amedia Networks Inc.

But even if skeptics are right and powerline technology ends up being the best solution only for the "odd room out" - like the kitchen that doesn't have coax or the porch that can't get strong wireless reception - rather than the whole home, that slice of the networking market could be enough to power up the powerline industry.

Of course, powerline technology is also a form of broadband access in the loop. This commonly is referred to as Broadband over Power Line (BPL) technology. And the most high-profile company pushing ahead BPL is probably CURRENT Communications Services LLC, which counts as investors such marquee names as Google and Liberty Media.

CURRENT Communications has partnered with utilities to use the electrical grid as means for broadband delivery to the home. Once the network passes a home, the customer can plug the provided modem into the outlet, connect the appliance and get high-speed access. Using the powerline infrastructure also will enable CURRENT and the partnering utility to offer security services like home surveillance, or telemetric applications, like automatic meter reading.

CURRENT has passed 50,000 homes in Cincinnati, and although the company won't discuss subscriber numbers there, Jim Dondero, vice president of marketing at CURRENT, says 55 percent of CURRENT's customers have switched over from DSL and cable.

As announced last year, the company also is working with Texas energy utility TXU, with plans to turn on service by year's end.

CURRENT plans to pass 2 million homes within the next few years, Dondero says.

Genesis 14
Abram Rescues Lot

1 At this time Amraphel king of Shinar, [a] Arioch king of Ellasar,
Kedorlaomer king of Elam and Tidal king of Goiim 2 went to war against
Bera king of Sodom, Birsha king of Gomorrah, Shinab king of Admah,
Shemeber king of Zeboiim, and the king of Bela (that is, Zoar). 3 All
these latter kings joined forces in the Valley of Siddim (the Salt Sea
[b]). 4 For twelve years they had been subject to Kedorlaomer, but in
the thirteenth year they rebelled.

5 In the fourteenth year, Kedorlaomer and the kings allied with him
went out and defeated the Rephaites in Ashteroth Karnaim, the Zuzites
in Ham, the Emites in Shaveh Kiriathaim 6 and the Horites in the hill
country of Seir, as far as El Paran near the desert. 7 Then they turned
back and went to En Mishpat (that is, Kadesh), and they conquered the
whole territory of the Amalekites, as well as the Amorites who were
living in Hazazon Tamar.

8 Then the king of Sodom, the king of Gomorrah, the king of Admah,
the king of Zeboiim and the king of Bela (that is, Zoar) marched out
and drew up their battle lines in the Valley of Siddim 9 against
Kedorlaomer king of Elam, Tidal king of Goiim, Amraphel king of Shinar
and Arioch king of Ellasar-four kings against five. 10 Now the Valley
of Siddim was full of tar pits, and when the kings of Sodom and
Gomorrah fled, some of the men fell into them and the rest fled to the
hills. 11 The four kings seized all the goods of Sodom and Gomorrah and
all their food; then they went away. 12 They also carried off Abram's
nephew Lot and his possessions, since he was living in Sodom.

13 One who had escaped came and reported this to Abram the Hebrew.
Now Abram was living near the great trees of Mamre the Amorite, a
brother [c] of Eshcol and Aner, all of whom were allied with Abram. 14
When Abram heard that his relative had been taken captive, he called

out the 318 trained men born in his household and went in pursuit as
far as Dan. 15 During the night Abram divided his men to attack them
and he routed them, pursuing them as far as Hobah, north of Damascus.
16 He recovered all the goods and brought back his relative Lot and his
possessions, together with the women and the other people.

17 After Abram returned from defeating Kedorlaomer and the kings
allied with him, the king of Sodom came out to meet him in the Valley
of Shaveh (that is, the King's Valley).

18 Then Melchizedek king of Salem [d] brought out bread and wine.
He was priest of God Most High, 19 and he blessed Abram, saying,
"Blessed be Abram by God Most High,
Creator [e] of heaven and earth.

20 And blessed be [f] God Most High,
who delivered your enemies into your hand."
Then Abram gave him a tenth of everything.

21 The king of Sodom said to Abram, "Give me the people and keep
the goods for yourself."

22 But Abram said to the king of Sodom, "I have raised my hand to
the LORD, God Most High, Creator of heaven and earth, and have taken an
oath 23 that I will accept nothing belonging to you, not even a thread
or the thong of a sandal, so that you will never be able to say, 'I
made Abram rich.' 24 I will accept nothing but what my men have eaten
and the share that belongs to the men who went with me-to Aner,
Eshcol and Mamre. Let them have their share."

Footnotes:
Genesis 14:1 That is, Babylonia; also in verse 9
Genesis 14:3 That is, the Dead Sea
Genesis 14:13 Or a relative ; or an ally
Genesis 14:18 That is, Jerusalem
Genesis 14:19 Or Possessor ; also in verse 22
Genesis 14:20 Or And praise be to

nope nobody failed that day and I took and passed the general test for
a CSSE and no one else even took such an exam that day

the written test are fairly you insist they are yourself (wether they
are too easy is point we disagree but not that they are easy)

you are simply stupid enough to think you can jusdge a persons
intelegence for their first drafts esp when someone has dyslexia and
aphasia

no need for much to pass with a degree is Physics and MS Geophysics
(and I specailize in Sesmic wave propagation BTW which is not al
toghter unlike RF prop in its math)

K8MN Lookups: 2356
DAVID E HEIL
RD 5 BOX 232
CAMERON WV 26033
USA

Email: k8mn@earthlink.net

http://home.earthlink.net/~k8mn

K8MN Biographical Info--
Born: Glen Dale, WV

Raised: Lake Worth, FL; Lexington, KY; Hinton and Oak Hill, WV and Miami, FL.

Other residences: Fort Thomas, KY; Cincinnati, OH

Former DX calls: OH2 and OH0/K8MN ('85-'87 and '95-'98), J52US ('88-'89), 9L1US ('90-'91), A22MN ('92-'95), 5H3US ('98-'00) and part of the July, 1986 OH0MD/OJ0 crew operating from Market Reef.

First licensed: WN8LET 1963, Oak Hill, WV. Was WB4KTR from '68 through mid-'77.

Amateur Radio Interests: DXing (especially on 160, 80 and 6m), Contesting, rag chewing, collecting and restoring vintage gear, amateur radio history.

Bands/modes of operation: 160m through 70cm including AO-10 Mode B, SSB, CW and digital modes.

Other Interests: Music (playing guitar, bass, listening to a wide variety and producing home recordings), gardening, reading, writing, genealogy, astronomy, history, , humor, current events and collecting and restoring antiques.

K8MN was issued to me in 1977. My amateur radio mentor was Andy Timberlake W8MN--an old two letter call, Advanced Class amateur from Hinton, WV. My call honors Andy.

I'm active on the air. To quote Rod Newkirk of "How's DX" fame, "You might have heard me anywhere. Pick a band and I was there."

Looks as good as the last one, why the changes?
Is there active bias? looks like it.

Still glad to see that there is someone that cares about their work.
The other amp makers do very shitty work and looks like it.

you have a reservation in hell,faggot.

http://www.thesignsofthetimes.net/

http://www.godhatesfags.com/fags/fag.html

The word "fag" is a contraction of the word "faggot" (or, "fagot"). When traced through its etymological history, the word "faggot" simply means "a bundle of sticks used as fuel." See dictionary.com and thesaurus.com (where such words as "fuel" and "brimstone" are used as synonyms). "Scholars" can't decide when such a word began to be used in reference to homosexuals, so we'll give the answer here: "I have overthrown some of you, as God overthrew Sodom and Gomorrah, and ye were as a firebrand plucked out of the burning: yet have ye not returned unto me, saith the Lord." Amos 4:11. The word translated "firebrand" is the Hebrew word "uwd," which comes from a Hebrew verb meaning "to rake together" (or, "to gather together"). In short, the Hebrew word "uwd" is talking about burning sticks of wood that are gathered together. That is what the English word "faggot" means. Amos 4:11 could just as easily be translated "...ye were as a faggot plucked out of the burning..."

For those geniuses out there who are asking, "are you saying that God hates burning pieces of wood?", the answer is "no, we're using it as a figure of speech, just like the Bible uses it." It is an excellent metaphor to describe sodomites because they fuel God's wrath, they burn in lust, and they will burn in hell. In Amos 4:11, the "fag" is the person who is sinning after the manner of Sodom and Gomorrah, has seen other "fags" overthrown by God, and still refuses to repent. So, the word "fag" refers to people who sin like the Sodomites did. It not only

refers to homosexuals, but also refers to people who support homosexuals (see Romans 1:32), and people who engage in all other relatively "lesser" perversions (like impenitent premarital sex and adultery, including the adultery of all of you divorced-and-remarried "born again Christians"). On this web site, we use the word "fag" in accordance with Amos 4:11.

For those of you who have deluded yourselves into thinking that the story of Sodom isn't really talking about homosexuals, read the following: the people of Sodom and Gomorrah had completely turned away from God, and whenever that happens, homosexuality abounds. Paul described this in Romans 1, and you can read the story of Sodom and Gomorrah in Genesis 19. Conditions in Sodom were so bad that it had become acceptable for men to surround Lot's house and ask to have sex with the men inside. Anybody who thinks that today is any different than those days needs to attend San Francisco's annual gay rights parade, stand along the parade route, and hold a sign that says "GOD HATES FAGS." You'll see and hear evidence of all of the sins of Sodom in just a few short hours (sodomy, violence, fornication, adultery, pride, sinful treatment of the servants of God, etc.) The same mob mentality that ruled the unlawful fags in the days of Sodom rules the unlawful fags today.

Considering that over 90% of the Babble was made up centuries after the fact out of a bunch of twice-told tales, by a bunch of Jewish priests during the Babylonian period (in the OT), and a bunch of delusional Xian fanatics (in the NT, though that was largely just a century or two afterwards), may I just say in reply, "Bahhhh-RING IT!"?

The loud and flaming queer Demon of Mockery, off to a couple of Pride parades in Vancouver, this weekend

Yes, you are correct... it will now have temperature compensated class AB biasing. This is important as the heat sinks temperature rises... and if not controlled... the bias will increase dramatically. This can cause thermal runaway of the output transistors (possibly causing premature failure), and degrades the overall amplifier efficiency.

Yes, there will be a bi-color led on the front panel... green for
receive... red for transmit. As for the SSB delay... it's still
automatic like the previous model.

It would be interesting to hear reports from some CBers in areas where
BPL trials are currently in use.

As far as I'm concered, BPL is kludge, a bailing wire, cardboard and
duct tape 'last mile' solution that should of NEVER gotten off the
ground.

Ham and CB cause interference to BPL? Last studies I read - suggested
"overwhelmingly" the other way around - even interfering with 2 way radio
systems used by Public Service Agencies. I also understand that BPL was
tried elsewhere and BOMBED. So, ya got to wonder just what IS the truth?
Yes, I'd be interested in reports from CBers and Hams alike where BPL may
already be in effect. 2 way radio users as well - in the low band to lower
VHF regions.

Just my 2 cents

lou/ka3flu

While I commend you on your emphasis on 'quality', it's too bad you are
wasting your talents building 'CB' amplifiers. The amateur radio
community could use a source of quality 'legal' 160-10 solid state
amps.

well rko, the tard didn't want your response to be seen by those he
taunts, so i fixed that for you. funny how the sodomite cries about his
"right" to post but attempts to censor others. typical sick fruit.

poor markie.......whine bitch.......WHINE !!!!!!

Katz,

Actually, about 80% of the amps that I build go to amateurs. This is really not an amp for most CBers due to the premium price. Most CBers buy strictly on price... and don't consider harmonic content or reliability.

How is it automatic? I see no circuit that senses the difference between AM and SSB and adjusts the delay time to compensate. You are just splitting the difference in the time needed for the COR circuit to operate. It's either going to chatter on SSB or lag on AM or possibly both. Amps have a reason for selective delay and quite frankly it's not much money or trouble to add this necessity.

well done nice fakes I suppose you are pleased I am glad at least some of the station have confirmed that Ow orked them by email and are anxoius to confrim what I need to for a qsl card

of course in a couple of those cases I supose the email traffic could be faked as well
but since my staion should be able to EME I expect I have some real stations in there

I shall see

and My wife wants to thank you for really making a good impression of Ham radio

I will use the buro to try and qsl all the forgein contacts I have not decided what to do about the domestic stations

2409. Ranger RCI replacement

Hi,

I own the RCI 2950 DX for two years now. Unfortunately the plastic front panel was damaged by accident just recently. So I'd like to know if there is any possibility to purchase (only) the front panel as replacement? Or does anyone own a defect one which he / she would sell for little money?

Many thanks in advance for your support.

Regards,

2410. You Reap What You Sew, Morkie

an old friend whined to no one person in particular:

> well done nice fakes I suppose you are pleased I am glad at least some
> of the station have confirmed that Ow orked them by email and are
> anxoius to confrim what I need to for a qsl card

For what?

> of course in a couple of those cases I supose the email traffic could
> be faked as well
> but since my staion should be able to EME I expect I have some real
> stations in there

Huh?

Is it REALLY too much to ask to ask you to work on your English
composition, Mork, and to try to organize your thoughts a bit
more...uhhhhh...rationally?

> I shall see
>
> and My wife wants to thank you for really making a good impression of
> Ham radio

Why?

Was she party to your EME fiasco? Was her callsign in there?

> I will use the buro to try and qsl all the forgein contacts I have not
> decided what to do about the domestic stations

Again...more irrational whinings.

However, is it REALLY unexpected that you should brag about some
"accomplishment" in this flamefest newsgroup...the SAME flamefest
newsgroup where you have ALSO repeatedly bragged about your "policy"
about LYING, and then not expect that someone would doubt you...?!??!

Are you even REMOTELY getting the message here that LYING,
especially BRAGGING ABOUT LYING, is ALWAYS a bad thing, Mork?

Steve, K4YZ

In as much as there are not any countries or political entities by
those "names", how could one "trak" them?

As for where to find QSL routing information, look in QST and CQ
magazines. There are tons of QSL routes and refrences to QSL managers
and QSL information services tehrein.

You are correct... there is one delay for both modes. As the designer, my feeling is that a switchable AM to SSB delay is not necessary. My experience has been that a reasonable delay can be chosen that is acceptable to both modes. Actually, a slight delay in all modes has a distinct advantage when the amplifier is mounted in a remote location such as the trunk of the vehicle. It allows the operator to confirm that the amplifer was pulled in on the last transmission by numbing the receive (during the delay) for a very short time after the mic button is released. Without this effect, the operator has no real way of confirming the amplifier is operating to some level, since the relay can't be heard.

what has that got to do with some ham bootlegging 50 call signs in
violation of t FCC regs

>
> Are you even REMOTELY getting the message here that LYING,
> especially BRAGGING ABOUT LYING, is ALWAYS a bad thing, Mork?

No the message I am geting is that you have no honnor by any standard I
have ever seen

I did not lie about eme contacts at all

therefore I did not brag about lying indeed I have never braged about
lying

that is another of YOUR libels

I admit that I find nessary to lie at times

and this just reinforces that

So, it would seem the op knowingly and willingly made contact with
station(s) known or suspected to be using a false method to ID?

On second thought, the op simply may not have had the basic required skill to determine how a true eme signal should be received. He may not be suited per FCC rules to hold or continue to hold even the entry level technician ticket. Really, thats no flame intended. If he is that stupid he could hurt himself playing with RF!!

Knowingly and wiling made the contacts and THEN was given reason to
suspect that the stations were in fact one station sending several
different id in violation of FCC rules

You add a LED to the remote switch tie it in with the COR circuit, problem
solved.

It is the fucking local cbers using ham rigs they bough at flea
markets from thieves. They are ratbastards just like Robeson who
probaly does the same thing in his home town.

I TOLD YOU BUT YOU DIDN'T LISTEN AT FIRST!!!! BITCHWHORE CBERS NEED

2464. Radio Etiquette

Newsgroup: rec.radio.cb
Date: 2006-08-05 04:15:15 UTC
From: "A.E. 352" <americaneagle352@iwon.com>
Message-ID: <nXUAg.27952$1Z5.7856@twister.nyroc.rr.com>
Source record: 219095

This doesn't really pertain to A.E. members, just radio operators in general. Years ago, there was a 'Gentlemans Agreement' that AM'ers would operated on channels 30 and BELOW, and us SSB operators would run channels 31 and ABOVE and things worked out great for all ops. Too bad this 'agreement' has gone out the window these days! I mean...I've heard many AM'ers with BIG linears running as high as 27. 805 , with most of them running between channels 34-40 which is really counter-productive to any decent SSB DX. I actually talked to a guy tonight on channel 36 AM and told him that he should try LSB instead. Well, we went there and we talked for quite awhile. Seems he really didn't know too much about sideband, but after hearing all of the stations he LOVED it. Oh well...it seems that I've gotten one guy on track. I only have about a million more to go!

2465. Buh, Buh, Bye???

We had a small cab company that tried using 11 meters for dispatch. Needless to say the locals put a stop to it by following them from channel to channel.

The AKC is as impotent as Dogie is. Amps are being built, sold, used all
over the U.S. and the AKC is powerless to stop it. N8 might as well police
the border for Mexicans as he would be just as effective.

you know your claims might be more believeable if you were accualy had
credibility

but sadlly who cares If the orignal poster is Davies and it might be or
might not. he has become so stabled to Wisemen that he might as well be
Wisemen anyway

amusing who you claim it is ok for your to answer the trolls and
torling post but try to pass of that I may not without be a violation
of my ToS

who are those efforts going

2487. Re: SkyWave 2879ABTC...

Let me first say that it's a pleasure to have a conversation with you
for a change. That said... you are certainly entitled to you opinion on
the SSB delay. A switchable delay is really quite subjective. If you
really had a problem with the SSB delay... you could opt for no delay
and use the SkyWave's multiplexed "hard" keying feature. This allows
keying the amp when the mic is depressed (in any mode) and holding for
as long as the mic is pushed. It requires a slight mod to the radio...
but no extra wires between radio and amp. Many of the hams running the
SkyWave are using this feature.

Rare, hardly, they can easily be found. New, old, even WWII new in the foil.
Like the other EbayTard that had a 1968 Evinrude advertised as 'Rare'
and wanted $2900!!! The motor wasn't even worth $300.

> for a change.

I would rather discuss technical issues instead of the constant nonsense
that gets posted daily. We possibly could have gotten off on the right foot
if you hadn't been spamming the group when there is a group just for listing
your items. Your tag line is more in keeping with Usenet manners (as is
bottom posting, but I'm not that anal).

> That said... you are certainly entitled to you opinion on
> the SSB delay. A switchable delay is really quite subjective.

Let me pose this question. Why would most amp builders put a delay in if it
were not necessary? From the old tube boat anchors of the past to the modern
units of today. Last winter I built an EB63 and attempted to do the same
thing and I ended up switching the delay as I could not find suitable middle
ground. Maybe I'm just picky, but I like my equipment to respond in a
certain way.

> If you
> really had a problem with the SSB delay... you could opt for no delay
> and use the SkyWave's multiplexed "hard" keying feature. This allows
> keying the amp when the mic is depressed (in any mode) and holding for
> as long as the mic is pushed.

From what I see, your unit has a COR circuit, which means that it must sense
the carrier. How is the relay operated in SSB mode with no modulation or
carrier? Are you sending a modulated signal in SSB mode or are you adding a
small amount of carrier to the SSB? Something is operating the COR circuit,
how about pointing out what that is so I don't have to restudy the design.

> It requires a slight mod to the radio...

Like???? Give me an example of what I need to modify in my 148.

> but no extra wires between radio and amp.

A two pill really doesn't need to be remotely operated, I just gave that as
an idea for those that might want it remotely mounted.

> Many of the hams running the
> SkyWave are using this feature.
>

Most hams that buy your unit will never use it on AM.

2533. N8 Laughs! Mopeydopey Cries!

Newsgroup: rec.radio.cb
Date: 2006-08-06 06:30:37 UTC
From: <>
Message-ID: <h0gBg.8808$MA3.2634@news.ono.com>
Source record: 219165

You have to understand the motivation behind mopey's visits. Keyclowns are desperate people...they do not have the mental faculties to tolerate being bugged about their keyclownism. It makes them upset because they have to hear dissent. Steveo is the poster child for this attitude. He simply cannot take it when somebody gives him crap about being a keyclown.

This atttude has no doubt been developed by a lifetime of crying and whining to get his way. It started in his childhood, when he whined and cried in supermarkets and malls to get candy or toys. When his parents indulged him in these situations it reinforced the idea in his young mind that if he yelled and cried to get his way that he should always get it.

As he became a young adult and found that life had to be met on life's terms, not his, he railed at the injustice of it all. Teen years immediately before this stage found him in a constant state of barely controlled rage and often acting out in his frustration. Typical of such incidents are punching people who cut him off in traffic, yelling obscenities out car windows, and showing no consideration for others.

Such is the mentality of a keyclown. RF spectrum, to a keyclown, is nothing more than a wide open space to play in. If this were a private yard or a public place belonging to all taxpayers, the evidence of keyclownism would be obvious. The place would be uncaringly trashed with garbage and the observed attitude would be "So what if it is a mess, you wanna MAKE me clean up after myself, sucker?"

The visits to peoples' homes are an expression of this frustrated, thwarted, angry personality. Mopey tries to make someone conform to his ideas of what should be in the NG by making threats and visits. To mopey, the worst thing on earth would be if the AKC knows his address, and his logic is that him knowing AKC addresses should strike fear in their hearts. You see, when he visits with his 12 gauge digicam the AKC should shake. They do...with laughter.

The fact that mopeydopey shows himself to be a disturbed individual in these visits does not dawn on him. This is because he is not inhabited with the normal sense of right and wrong. His opinion, like that of all keyclowns, is that whatever he wants to do is OK, and if someone disagrees then he has the right to attack them, physically or otherwise. This affliction is commonly called a sociopathic disorder.

The very fact of posting this message will bring a barrage of name calling, threats, and other things that keyclowns believe are effective. They think they are effective because they are effective at

riling THEM up. This attitude is consistant with keyclownism's main root causes: the fact that keyclowns are only aware of what they want and have no concern for others, coupled with a total inability to tolerate even the most basic forms of disagreement.

The reactions to this post will prove the thesis as presented. Keyclowns are simple creatures, and always behave in a predictable manner.

steves of course
> Speak English.
why this is a written furom

but realy the sentence is English some would say it needs a comma
between the last "lawyer" and the end phrase "to sue"

hmm funny then that dispite the inistance of a lot folks (or at least
enough sock puppets that it looks like a lot of fols hard to tell)
insiting I am beaten about to thrown off my service provider (and from
time tot ime insiting I am going to jail for my interent activites.
nothing of the sort has happened

as I said in what you cut away what I said I would I have done. I have
not done more than I said I would I still have not arrived on a way of
dealing with Woger and Not Lloyd. I hear dave is working on some final
solution of the wismen problem. knowing full well the phrase final
solution in this context likely means roger death or serious injury is
a phrase choose becuase I beleive that is truely the only ay to stop
him, and fear (from the rule of law) that Dave might accualy refrom
some serious violence to the man. It would benifit me yes but remeber
Dave would not be doing it to serve my ends indeed knowing it would
relive ME of wismen as a pian in my rummp might serve to disaude Dave
from such a reckless course of action

I hope he suceeds, that he does within the law, but only time will tell

It is a shame that one or two individuals spend so much time making fun of Mark Morgan. I am a friend of Mark's and grew up not far from him. I've known Mark most of my adult life and feel that I should come to his defense.

Mark was always a nice kid and never made much trouble in the neighborhood. When we were in seventh grade Mark had a crush on a gal who had a Daddy who was a rapper. Mark would leave her Stickum love notes and tell her he "luved" her. The first love of his life got pregnant a few months after. Mark was devastated. She was only fifteen, but had been in seventh grade for three years.

Mark moved on and soon found other gals to pursue. He had little luck, however, but did find a little 300 pound sweetie that suited his fancy.

Unfortunately for Mark this budding romance fell by the wayside because the gal was his cousin. His parents put a halt to that because they know what can happen when cousins date; They are cousins, too.

Mark never did have a blow-up doll for a bed partner. Those who say he did are liars. He didn't need one. He had made himself a rabbit fur mitten that he called Alice, and he'd get Alice out and take advantage of her after his parents went to sleep.

To this day Mark keeps Alice under his pillow. She is his one and only true friend in the dark night hours.

Please stop picking on Mark. He means well but he is not "all there", if you know what I mean.

You can reach me at:

Susan Morgan

Mission Hills

Columbus, Ohio

I'm certainly not saying that you don't need a delay on SSB... and you sound like the length of the delay (for SSB and no delay on AM) is a priority for you. That's fine. That's why you would need to use SkyWave's mutiplexing keying feature. If you send me an email... I would be glad to send you the details of the mod for the radio. Keep in mind that this mod doesn't work for other brands of amplifiers. It allows the amp to key (in any mode) when the mic is pushed... no matter if modulation is present or not with no extra wires between radio and amp.

It's truly a shame that Doug apparently does not read the CB groups. All he would have to do is make one phone call to the below person and notify him that Steve Parks is posting his name all over Usenet; and I suspect the Georgia Bureau of Investigation would uncloak little Mopey Dopey with a set of interstate federal felony charges. Anyone who suspects that they know the true identity of Steve Parks should use the below snip of his post to call this person or the GBI and start the ball rolling.

Steve Parks only tries to bully people he things are weak. I guarantee you that he does not have the testicles to make a road trip anywhere that he thinks he can get his ass kicked. Isn't that right, Mopey Dopey. Isn't that why you tell everyone you are Steve Parks from Medina Ohio instead of using your real name and location?

If someone such as Doug really wants to see Mopey Dopey stroke out, all he would have to do is make one phone call to the below person and notify him that Steve Parks is posting his name all over Usenet; and I suspect the Georgia Bureau of Investigation would uncloak little Mopey Dopey with a set of interstate federal felony charges. Anyone who suspects that they know the true identity of Steve Parks should use the below snip of his post to call this person or the GBI and start the ball rolling.

I believe I'll make that call so that this Scott Gilbert can see you posting
his info on Usenet.
If you think Steveo is a chickenshit, why don't you hop on your moped and
drive to Medina and kick his ass? Oh, that's right, your ass overloaded your
mouth again.

When Doug and Kathy visit they stay in his guest house, the grease pit
behind the store. Kathy says it's just like home.

I looked at it, my opinion is that making changes to my radio in the final output stage by adding a ferrite coil could compromise my outgoing signal. I nor most of your customer base own a spectrum analyzer. The parts you list cost no more that the switch and cap you could add to the amp for the delay. In fact, if were to own your unit, that's where I'm putting my $3 worth of parts. I'm not trying to slam your product in this thread, I just wanted to share my opinion as a consumer. If you think the consumer does not want an adjustable delay then by all means go with what you have.

There is no Steve Parks from Medina, Ohio; liar. If there was, he would
be in prison calling you to help him make bail. www.peoplelookup.com

Posting another name/address again; liar/stalker? The alleged Mopey Dopey / Steve Parks of Medina Ohio (yeah, right - like that's his real name) posted the below/above:

Scott Gilbert - Director, Business Assistance Technology Ventures Corporation
Scott Gilbert, Director, Business Assistance has worked in several high technology sectors including enterprise software, aerospace & defense, satellite communications and interactive media. Prior to joining TVC, Mr. Gilbert served as Co-founder and Director of Marketing for a predictive analysis software start-up, and as a consultant with KPMG Consulting's High Technology Strategy Practice. Mr. Gilbert is a member of the Board for the NorCal Product Development and Management Association (PDMA) as well as a volunteer at Plugged-in, a non-profit community technology access center. Mr. Gilbert holds BA's in both marketing Management and International Management from the University of New Mexico.

You can't bond out of prison dumbass, ask your master Doug, you bond out of
city or county jail.
WOW, if peoplelookup.com doesn't have him listed, then he must not exist.
Damn, I looked myself up and I don't exist either.

A cheap tracking device can be purchased through one of the following pages.
http://tech-software.net/index.php?module=pagemaster&PAGE_user_op=view_page&PAGE_id=5&MMN_position=7:7
http://www.silcom.com/~pelican2/PicoDopp/PICODOPP.htm
I really don't think tracking devices have to be expensive but if you don't like paying for a good one, then I can provide a very simple 555ic timer circuit you can use that will cost about $10 to make.
Here is the circuit of a very simple but workable tracking device that I once used to track a signal to tandy's store in the toowong towers in Brisbane. Once you learn how to use it, you can track to a square metre. A hand held radio is the best choice of radio to use with the tracker. This shop blocked ch 7 for 3 days until I had some free time to go and see where it was coming from. The same shop did it again some time later and the culprit lost his job at that location thanks to a night time worker that was on the ball. The signal was a radio on the shelf connected to power with a small antenna and a clip lead over the mic insert to hold it on tx.

2619. Communism is Apartheid

Newsgroup: rec.radio.cb
Date: 2006-08-07 07:32:59 UTC
From: NewsGuy <NewsGuy2005@gmail.com>
Message-ID: <1154935979.614882.140610@i3g2000cwc.googlegroups.com>
Source record: 219251

As the people of Cuba cry out for liberation from the cigar chewing maggot dictator Fidel Castro, Frank goes down the litany of failed, and soon-to-be-failed, Communist dictatorships and shows how their disparities in wealth are used by the ruling Party Hacks in their own Aparthied to oppress their own people.

Communism is a system of Apartheid in Cuba because Cubans must use foriegn currency to pay foriegn stores for items they purchase. This relegates the Cuban people to a second class status in their own country, because the script Castro issues is worthless outside of Cuba. It is not the benevolent Apartheid of South Africa, which was set up to preserve the race and culture of the Boervolk, but a brutal and oppressive Apartheid that exists in Communist nations.

John explores the Mel Gibson controversy, showing the double standard of how the MainStream Media gives anti-semitic statements made by African-Americans a pass while piling on the criticism and attempt to destroy the career of a White, Christian male in the public arena. Also explored are the political and cultural aspects of the issue, which have been completely ignored by the MainStream Media coverage on this event.

Also, Jose Alvarez from the anti-Castro group, Brothers to The Rescue, calls in to give a first-hand Cuban perspective on the situation in Cuba... Kennewick Man update... Bill Clinton calls in with his spin on the week's news... your phone calls and more at 718-761-9996.

As far as compromising the output signal, hanging a choke plus a 1K impedance on the output will change nothing. Many people are using this feature (along with myself) with no performance shift.

I think your idea of a switchable delay is fine... I just think the extra cost of instituting it is unjustified... given the extra cost... and the lack of complaints of the current design. But thanks for your input...

Hello all,

I'm a new amateur radio operator, and though I know a license isn't required to use the CB frequencies I hope to add a CB radio to my ham shack. Also living not far from a major interstate and a good distance from any major cities I hope to keep it tuned to channel 9 to monitor for emergencies. I guess two questions .. do folks still use Channel 9 for emergencies, and do any law enforcement agencies still monitor it?

My main reason for adding a CB radio was to get traffic updates since we have to hit the interstate when heading almost anywhere, but I figure if I can help passers-by with the same equipment, what a good way to use the CB radio.

Anyway just thought I'd throw that out there and see if others do the same thing ...

Alex

2631. Hey Tard.....

Wanna know who's helping the hams fuck with you??

1) mopy-dopy......ring leader

2) DrDeath.........general flunky and follower

3) LandLoad........wanna be ring leader,but only a follower

IN THAT ORDER!

Check it out because your lawyer may be interested.
The FCC may want to look into their road trip habits since they are not
licensed for 144 or 440!!

Yes Tard, you are a piece of work, but you are the lesser of the
evils.................the enemy of my
enemy.............................

Good Luck.

I have to agree. But I don't like any hams but marqueer is the worse. I
wish he'd stay the fuck out of the cb group.

you are the one that said you engage in homosexual conduct in a public
usenet group.

so answer the question.

Thats right shirley.....you brought it up now tell us what it is
that makes you want something like that! No normal man wants a penis in
his rectum! Whats wrong with you,boy??

The hams that plague RRCB also do the same in their own groups, essentially shitting where they sleep. They fight with us, they fight amongst themselves. The CBers have stuck together through all this. We have no infighting amongst ourselves, and I'm pretty damn proud of that, considering they (the hams) accuse us of this type of behavior on the air. I think if you use Usenet as a model for how people act on the air, the ham bands must truly be hell. No offense to the hams that have actually been kind or helpful to the CBers, but you guys really have some nut cases in your ranks.

Dear Mr. Robeson,

Thank-you for your e-mail of 01 August 2006

In reference to your inquiry, no such unit "HMC 47 CSB
(PROVISIONAL)" has ever been located at Ft Sill. Furthermore I find no

reference to any "214 FA BRIGADE" at Ft Sill or any other US Army
facility.

I hope this answers your questions.

WILLIAM C ANDERS JR

_____
the above is quote from steve recent post

he said he was going to write and try to comfrim my service in HMC 47th
CSB (provisional) then part of 214th FA 3 copr art Ft Sill ok

I knew he would not confrim the current location of the 47 csb at sill
indeed the unit I believe has been reorgaized out of existance although
the paerent unit of the formation the 47 th Feild Hospital likely
remerges from this I have heard they may be a irag but I frankly don't
know or realy much care

I did not expect steve to dare say the 214th does not exist (it does
http://sill-www.army.mil/3ca/214web/214th.htm)

but I welcome it as it serves as proof that Robeson has lied us and
therfore the claims I and other have made about his veracity (or
rather the lack there of)

inthat post the Major Of Cap has choosen to fake a comincation from the
US Army it itself. inded after this how can anything he has claimed
about any DoD matter be trusted

It would seem that Robeson admits defeat for the monet by quiting the
feild here in USENET but he will most like be back after he thinks his
misdeeds are forgotten

Poor Markie, his lies about his Army "service" are exposed like his
fake EME contacts.

How did that three way sex session go with your shemale wife and your
old dying daddy go last night?

>
>I did not expect steve to dare say the 214th does not exist (it does
>http://sill-www.army.mil/3ca/214web/214th.htm)

Mark, this alleged "response" to an e-mail inquiry is undoubtedly
BOGUS. Let's review the verity of Major Dud's posting:

1. There is NO verification available that such an exchange
ever existed through any referencable third-party source,
nor any other proof that Major Dud ever made such an
inquiry.

2. The respondent ("William C Anders Jr") is not identified
by position or rank and it is NOT written all-capitals
in any signature. Note: Even civilian employees of the

United States military have a position title which is used
for all correspondence.

3. If a military unit is mentioned, it is protocol (format)
for a unit to be spelled out for the first mention, then
abbreviated. This is for clarity in responding to non-
military correspondents (identifiable by headers in e-mail
when correspondence does not come over the military's
network).

4. It is extremely easy to forge a third-party "message,"
then include it as part of a message in here. That is
NOT "proof" of anything.

5. Contrary to Major Dud's claims, United States Army units
do NOT always keep careful records of their history. The
entire United States military undergoes periodic changes
in structure and new units may be created out of old ones
while older units may be dissolved. Any "history" of a
unit depends on the commanding officers' assignment of
historian duties within that unit, NOT considered an
important/prime task in that unit's mission. Neither are
unit historians typically "in contact" with other units'
historians.

6. Probably the best place for old unit information of the
United States Army is the Army Center for Military History.
They have a website with some limitation on available
information for non-military/non-government research. They
have permanent quarters with considerably detailed written
and photographic records for research by authorized
historians. The United States Navy has a similar
organization, also with a website. A careful web-search
will turn up their URLs.

>but I welcome it as it serves as proof that Robeson has lied us and
>therfore the claims I and other have made about his veracity (or
>rather the lack there of)

Major Dud BLUFFS his way through his claims on here. He makes
claims of his own and tries to pass off those claims as "truth"
(perhaps because he WANTS his imaginings to be true). Witness:

1. Years of claiming to be an active-duty USMC member yet NO
evidence presented in ANY FORM of claimed 18 years service.
Not one single digitized copy of any official papers, not
one photograph of himself or anything else taken while in
that 18-year service.

2. He has repeatedly challenged "call the VA" to "verify" his
service. However, the Veteran's Administration is NOT the
place to verify that nor will they give out full information
on a past or current service member to just anyone making

an inquiry. The archives of all service members are kept in the St. Louis National Archives Center and do send out copies of individuals' records but ONLY to IDENTIFIED individuals (or their identifiable kin). Copies require a small fee.

3. His claims of anything on QRZ.COM and his AOL home page are made only by him and are NOT "checked" or "investigated (for truth)" by either QRZ or AOL. Note that his biography now has him as "CHOP" (presumably an abbreviation for Chief Operator) of a second MARS station, whereas he had claimed earlier on the newsgroup as being "Assistant Chief Operator" on only one MARS station.

4. We have NO way of verifying that Major Dud is actually a "Major" in the Tennessee Civilian Air Patrol. He has a photograph of himself in a (somewhat used) flight suit with embroidered rank identification (of Captain) on it. He has not posted any CAP URL that has personnel listings on it nor has he presented any digitized copy of any CAP official records concerning him.

5. He once had a photograph of himself as a "First Lieutenant" in the Tennessee STATE National Guard (not affiliated with the federal national guard organization) as "communications officer" of one "brigade" (less than battalion in size according to the Tennessee State Guard's own website information. That "career" was short-lived and there are no records available of either his joining or his leaving.

6. His AOL home page has a link to a National Hang-Gliding Association and he once claimed to do that. However, he has never mentioned his glider, its make and model, nor where he glides, nor anyone he claims to know. We get a lot of INFERENCE but never any direct reference nor evidence. I am acquainted with a few hang-gliding enthusiasts here and they fly at only one location, have lots of pictures of themselves and others gliding.

>inthat post the Major Of Cap has choosen to fake a comincation from the
>US Army it itself. inded after this how can anything he has claimed
>about any DoD matter be trusted

Mark, we can't trust Major Dud in much of anything on news-groups. If you recall, Brian Burke and myself took him to task on the Department of Defense DIRECTIVE on the mission and organization of the Military Affiliate Radio System. Major Dud was unaware of that directive, refused to acknowledge it (yet was downloadable from the DoD by anyone), and kept claiming for the longest time that "amateurs directed MARS." They don't. DoD directs MARS. Always has.

After YEARS of claims of active-duty USMC service in here we haven't been presented with one shred of evidence from either official or unoffical sources that he ever did what he said was nor held the rank he claimed.

>It would seem that Robeson admits defeat for the monet by quiting the >feild here in USENET but he will most like be back after he thinks his >misdeeds are forgotten

"Nevah hoppen, GI." :-) [old Japlish exclamation of the 50s]

Major Dud will NEVER admit defeat nor will he EVER acknowledge a correction other than a typographical error. He is a BLUFFER and bluffers will simply try to misdirect any callings-out on errors or mistakes...or he will go into an emotional tirade of personal insults directed at his accusers. If that doesn't work, he MANUFACTURES "reasons" why his accusers do what they do (or don't do). False "reasons" supported only by his imagination.

Major Dud lives in a world where IMAGE IS EVERYTHING...rank, position, "official accreditation," activities of a macho nature, but, especially, his wishful thinking. He is King in that world and no one DARE dethrone him!

Major Dud WANTS ATTENTION. So much of the message content in here involves him and his disputes with others that, before the onslaught of the middle-school-mind filth-sayers, this news-group was rife with it. Hardly anything about amateur radio policy, just Major Dud and his "enemies" endlessly sparring, egged-on (also endlessly) by Major Dud hisself.

Yes, it would be good if he simply went away. He won't in my estimation. The Internet and Newsgroups are an excellent vehicle for his bluffing, inferences of "greatness", etc. He is SAFE there, isolated by time and distance, and thinks he can maneuver perceptions of himself by others by his claims and inferences. Unfortunately, he gets very upset emotionally by challenges and corrections and erupts in vitriolic behavior when confronted. Politeness disappears and he becomes abusive. [he accepts that for, after all, "kings" are allowed to act that way in his world]

Mark, watch for the responses from the Mighty Major on this post. :-) His actions will be as I've described. :-)

Will you take My word for it? Steven J Robeson was at least a major in
CAP on or about 13 jan 2006 I base this on My own conversation with the
Office of CAP Military Liason
Dudly has complained loudly to this forum about my effort to seek
jusitce though channels

> You are a top poster.
> You do not count as a CBer as you are only here to hock your amp.

You can't believe that crap. # 1 your claim to fame is attacking the amp guy,thats it. Unless you count your countless attacks on rqz as a claim to fame.

And speaking of rqz, how stupid can you cb'ers really be? You are being used by a few hams to bother mark at every turn. What did he ever do to you people? His "crime" was to post and be try to be accepted as the ham that he is,just another person interested in radio.

Notice the crap thrown at Mark. The terrible remarks made about his family. Then, all of a sudden, the ham of the hour appears! MAGIC!!

Then Mark is further engaged in filthy remarks as you idiots sit by your screens and laugh. You must be very proud. Do you guys know you're being used or do you just enjoy the senseless attacks on a innocent man?

I think rqz has done more to further amateur radio than those filthy posting hams combined.

Also, you guys must be so proud of the website used to taunt mark with bibical quotes. That "church" were the "people" protesting at the funerals of American service people killed in Iraq.You fools should really get off the computer more often or at least read cnn or something along those lines. I'd bet you filth posting fools don't have a clue about that.

Go figure. An alliance of 13 and 20 wpm hams and freebanders.

So keep it up. Mark is more of a ham, not to mention more of a man, than you poor stupid followers will ever be.

Dear Mr. Robeson,

Thank-you for your e-mail of 01 August 2006

In reference to your inquiry, no such unit "HMC 47 CSB
(PROVISIONAL)" has ever been located at Ft Sill. Furthermore I find no

reference to any "214 FA BRIGADE" at Ft Sill or any other US Army
facility.

I hope this answers your questions.

WILLIAM C ANDERS JR

_____
the above is quote from steve recent post

he said he was going to write and try to comfrim my service in HMC 47th

CSB (provisional) then part of 214th FA 3 copr art Ft Sill ok

I knew he would not confrim the current location of the 47 csb at sill
indeed the unit I believe has been reorgaized out of existance although

the paerent unit of the formation the 47 th Feild Hospital likely
remerges from this I have heard they may be a irag but I frankly don't
know or realy much care

I did not expect steve to dare say the 214th does not exist (it does
http://sill-www.army.mil/3ca/214web/214th.htm)

but I welcome it as it serves as proof that Robeson has lied us and
therfore the claims I and other have made about his veracity (or
rather the lack there of)

inthat post the Major Of Cap has choosen to fake a comincation from the

US Army it itself. inded after this how can anything he has claimed
about any DoD matter be trusted

2706. it would that Robeson lacks the sense to quit while he is behind

And as has already been pointed out, there would be a unit history
in archives somewhere.

There's no archive on the "HMC 47th".

It never existed.

> the paerent unit of the formation the 47 th Feild Hospital likely
> remerges from this I have heard they may be a irag but I frankly don't
> know or realy much care

Of course you don't "care"...

Because with each day that you persist in insisting that you were
a member of the US Army attached to a unit that never existed, you look
all the more idiotic.

> I did not expect steve to dare say the 214th does not exist (it does
> http://sill-www.army.mil/3ca/214web/214th.htm)

Nope.

More Morkie Mularkie

> inded after this how can anything he has claimed
> about any DoD matter be trusted
> I had expected that Robeson would wander off for awhile like the coward
> he is to lick his wounds but he clearly lack the good sense to do that

Lick what wounds, Morkie?

> so as needed I will keep reminding him

Reminding me that you claimed to have been atttached to a
non-existant (as in NEVER existed) Army Unit?

You're already a confrimed liar about your "Army Chemical Corps"
duty, Mork, now you claim to have been attached to a unit that NEVER
existed.

Nice try, fatboy.

Steve, K4YZ

you also claim there is no archive of the 214th either

I did not expect steve to dare say the 214th does not exist (it does
http://sill-www.army.mil/3ca/214web/214th.htm)

2710. Robeson deines exist of Army unit

Your spamline is spelled incorrectly and you consider that insignificant?
That's your bread and butter is it not? If I were to compare your amp with
your Usenet provider (Google LMFAO) then I would come to the conclusion that
your amp is a budget splatterbox POS with no frills...which it is. I think I
might post that nonsense "hard key " diagram in some of the ham groups and
see what kind of response you get. Face it Griffey, your amp is a
broadbanded splatterbox that couldn't hold a candle to a shitty ass Texas
Star or Dave made.

Correct. The priority usually falls somewhere below that of the unit A
NCOIC MARS.

> 6. Probably the best place for old unit information of the
> United States Army is the Army Center for Military History.

you might have better luck with Hughes net if did not lie to them
about the content of my posts

one none of you have receieved a death threat from in legal terms you
have received a factual statement piking Dr Death for monet I have
stated that the onely way to stop is to kill you. another true
stateent the only way untimately to stop ME from posting is to kill me
. Is that a statement I ntend to comit suicide?

no if the statement I made about you added say and I intend to stop
that would be a death threat aginst you but (other than in making an
explanation I have not done

now as to the charge of "spaming" the normal meaning I see for the
word requirethat it be unsolitced and generaly comercail in nature
neither of which aplies to myresponded to derect libel

the only point where I may be in violation of the ToS of Hughes net is
volume (and thatis becuase it is at their descretion

after you contend that don't see my posts dr death therefore I am NOT
disrupting your reading of the NG

For the present Hushes net agree with me that I have the right to
defend myself as long as that defesne is reasonable and polite and
factual

you can try but all you are doing is harrassment as long as you
tolerate the orginal agressor

indeed the willing and nature of YOUR coments Dr Death and ESP fred
accrding to my disccusions with Hughes net are why they are not
inclined tomove aginst me as you all have actively made and actively
supported gay bashing and madeyour own libelous statements about me

No, your shitty newsreader fucks them up as above. Or is it you that
does that? You never answer a question. When are you going to scan that
pic of your shemale wife?

Sure you do, you lied about college, about your chemical corps unit,
about your shemale wife, your "business", about those EME contacts,
about everything you've ever typed.

> you OTOH lie with about every line you type

Oh, the irony.

I was abut still stve claimed the units do not exist they do

so steve lied
>
> > get some therapy both of you
>
> You need it for your chronic lying.

that is tranference you lie all the time so assume everybody else does
get some therapy

well at one point he was using the email of an electorinic tech

the email addy he was yusing was just dr death@yahoo.com the webpage of
that user is
drdeath.deatheragecomputer.com he denies that is him but he sure
becamse pissed at me when I brought it up and called him danny

Your auctions get shut down, your activities in Petro toilets get reported, your illegal dealers get popped. Nobody is awol, keyclowns. We KNOW that is your fond wish, but you limpwrists are still clueless. All you can do is repeat the same old crap over and over. Your sissy chumpion mopeymoron got located and identified, so now you queenies are outta steam. Mopey went under her rock, quaking with fear. Not one single threat of the many she made ever materialized. Why? Cuz the sissy was identified and located.

Go back to your vibrators, fantasize some more. Repeat your same old crap...nobody cares other than the amusement value. We call it "keyclown plinking" : You sociopathic mutants swim in a single file line, quacking away...heheh...AKC pops your bullseye while you pop each others' browneye.

BTW, Dr. Death, AKA Dr Dorkbreath....We must report the untimely demise of your parents...some lab assistant in the mutant research dept. dropped the test tubes. Also, we heard you are a member (remember the way porno books use the word "member" here!) of a union...is that IBLEW Local Petro?

Remember, we totally control everything you do. We press the buttons, you quack. Now quack some more, sissies.

2778. DrDeath still a fat sissy

2797. Keyclowns not fit to lick N8WWM's boots

Newsgroup: rec.radio.cb
Date: 2006-08-09 22:54:44 UTC
From: God_Bless_N8WWM@yahoo.com
Message-ID: <UItCg.9730$MA3.9679@news.ono.com>
Source record: 219429

N8WWM was the first to fight keyclowns, the first to identify keyclownism as a disease, and the first to be targeted by keyclowns for drooling man-worship.

The ham community owes N8 a debt of gratitude.

Long live N8WWM wherever he may be!

Auctions ratted, intensified FCC activity as a result of AKC handing them the research on a platter, websites yanked away by ISP's when amp makers are revealed as Federal criminals, plus many many hoots and howls from the ham community over keyclownism in general, not to mention copious emails from hams who offer everything from web addresses we mighta missed to a few bucks to help maintain the effort.

You do not bother the AKC. Your actions prove our ownership of your souls.

There's nothing you can do that will cause the AKC to stop. You are powerless, and you will be ratted out when found out. It won't ever stop and that is what makes you keyclowns mad. Tough stuff, deal with it. You just need to learn to accept that you sissies are our tin cans on the fence, and we are the guys with the bb guns practicing. PING! yer off the fence and on your keyclown ass, wondering what hit you. Utter and complete powerlessness must suck, and we understand why you keyfags think you are getting somewhere. It is a mass delusion to cope with the fact of our total dominance over keyclownism. The facts are too hard for you to face, they are too traumatic for you. You have to deny reality in order to cope with life under the rule of the AKC.

Yes, we are harsh Masters, but you are slowly being brought to heel. We like it when you squeal and call names and otherwise attempt to cope with your Lords and owners. It shows the impact we make on you. It is also a product of your mentally deranged minds, in that reality IS, and your perception of it IS NOT.

You must lash out, you must deny, you must insult, you must do whatever your pathetic little selves think you can get away with to rail against your Masters. We understand. You must also do these things because you fear them being done to you, and so judge, in your massive stupidity, that others will fear them. Your mentality is so low that you don't know how low it is, in that you have never had a glimmering of anything higher.

We stand again on one statement. You can do nothing. Nothing at all. You have no power whatsoever to stop the AKC. Your actions over the years have resulted in absolutely nothing changing but MORE keyclowns

getting in trouble.

We, however, have the power to get you in a lot of trouble with the FCC. When possible we have. We will do it more. We will gather even more proofs where needed and present them to the authorities for action. We will post more web pages of happy gloating. We will amuse ourselves anytime we want at your expense, both emotionally and financially.

Enjoy it all as much as you can for now. It is slowly ending, 1 keyclown at a time.

AKC owns you, sissies.

2798. A TOAST: "May N8WWM rule keyclowns FOREVER!"

Newsgroup: rec.radio.cb
Date: 2006-08-09 23:14:18 UTC
From: N8WWM_Is_God@yahoo.com
Message-ID: <e%tCg.9731$MA3.353@news.ono.com>
Source record: 219430

The AKC would like to thank the United Gay Keyclowns of America for their continued support of the drive to make N8WWM the most famous mean hammie of all time. Your support has truly made us laugh. To show our apprectiation we are donating $100.00 to the United Gay Keyclowns of America Hamsters and duct tape fund. Gay Scottiekins will dole out individual grants as you apply for them. NOTE: Some of you may be disappointed, but these grants are NOT for crack, pot, booze, or illegal radio equipment. We realize that will make the vast majority of you not apply for a grant, but hey...funds are limited. Those things are just luxuries and we realize that there are some poor underprivileged Gay Keyclowns out there who truly cannot afford their own hamsters and duct tape.

Gay Keyclowns sputtering about N8 being busted: they don't know shit

Gay Keyclowns sputtering about his ebay items: they envy his vast collection

Gay Keyclowns sputtering about his character: when they have none at all

Gay keyclowns sputtering about his hypocrisy: when he does not care

Gay Keyclowns making insinuations about where he drops his pants: when they can't come up with a real issue, as usual

Looks like gay keyclowns can't take what old N8 dishes out: as has always been the case

Looks like gay keyclowns are sissy boys with mental disorders: as they always will be

Of course, it always has looked that way.

2802. Why use perpendicular feedline?

Newsgroup: rec.radio.cb
Date: 2006-08-09 23:59:56 UTC
From: SparkySKO <sparkysko@gmail.com>
Message-ID: <1155167996.747469.143680@i42g2000cwa.googlegroups.com>
Source record: 219433

Hello,

I'm running stock power on my radio. I'm using a vertical dipole mounted in a tree. The bottom of the dipole is about 8 feet (1/4 wavelength) off the ground. The feedline is going down at about a 45 degree angle from the antenna. My SWR is 1.5 which is the best it'll get.

I'm using a mobile base, with a AC -> DC power supply. I receive fine. Regardless if my noiseblocker is on or not. However, when I transmit, it sounds god aweful. Others can't understand what I'm saying. I've used another radio with earphones, and listened to myself talk, and it sounds like 5 layers of tin foil on my microphone. If i take this same radio and microphone, and mount it in my truck, it works fine.

I'm thinking the power supply, but don't have a way to verify this yet. I'm also wondering if there's a chance that this could be because of my antenna radiating back into my feedline, and creating a feedback loop or some other type of noise.

My main question is. why is it recommended to run feedline perpendicular to a dipole?

You are such a joke, Mopey Dopey. You can't actually bully me. You can play your internet games and do your little stalkings that you seem to love; but that's all you have. You can't send me hate mail; because the USPS would treat that as a felony. Same holds true for the phone - FCC would kick your dick in the dirt. Well; that and your phone number would show up and the world would find out your true name. So, you stay in the little world; swinging your racist, homosexual knuckles on the ground and acting like the true neanderthal that people think you are.

Sooner or later, it has to set in to even your thick, uneducated cranium that mowing lawns and shoveling snow is right up there with pizza delivery or selling oranges on the side of some California highway. You are the lowest caste in this society; and that can't be something that makes you proud when you look in the mirror. And add to that what a butt ugly, white trash, trailer skank your wife must have to be to cling to a loser like you thinking she got some sort of good deal; and the prize that is your life is displayed for you. I suspect the best thing that happened to you is that you have no living offspring; since to perpetuate the sadness that is your mediocrity would be a heavy cross for a child to burden. You truly are sad and pathetic. Best you stay mired in your medicrity and anonymity. At any rate, you know where I am. Any time you think you are man enough.....

Well, I have had my fun spanking you for tonight. Enjoy getting drunk and wasting your night and future running around the internet using fake names of women in my life; a true sign that you are pathetic. Maybe the folks in this group will eventually see you for who you really are. Maybe not. No biggie. Sleep tight, cowardly racist.

You do know there are 10 year olds more mature than you are, right? Is
your wife such a skank that you would rather paint pictures of Doug than be
with her? Is that why you have no kids - couldn't get it up around women?
Or isn't your "wife" a female?

> My main question is. why is it recommended to run feedline
> perpendicular to a dipole?

It helps to prevent RF currents from flowing on the outside of your coax cable. A dipole antenna is normally a "balanced" type of antenna relative to earth ground were as coax cable is not. Running the coax at 90 degrees greatly reduces the antenna coupling to the ouside of the coax but doesn't eliminate completely enough in some cases.

There are several things you can do to help decouple the feedline, coax, from the antenna.

1. Spool up several loops of your feedline right at the dipole feed point. Use a loop diameter of 6 to 8 inches and try around 5 to 6 loops. Hold the loops in place using some tape or plastic cable ties. What you want to watch out for is not to make a resonate circuit from the loop inductance and the stray capacitance between the loops. I guess the way you'll know if this happens is the SWR will get really screwy and the RF feedback will increase.

2. You can slip a bunch of ferrite ring cores over the feedline right at the dipole's feed point. You'll have to check for RF heating of the cores, but at the low 4 watt level you're talking about it likely won't be a problem.

3. You can use a "balum" to convert from an unbalanced feedline to a balance load, your dipole antenna. You should be able to do a Google search on "balum" and find something that looks suitable that you can build.

http://www.arrl.org/qex/2005/qx9roos.pdf
http://eznec.com/Amateur/Articles/Baluns.pdf
http://www.qsl.net/iz7ath/web/02_brew/11_balun/pag01_eng.htm

Another antenna idea too.

http://www.signalengineering.com/ultimate/antenna_basics.html

The URL above has a design for another type of dipole antenna, at the very bottom of the web page, that should work good for you as well as eliminating the RF feedback problem. The point here is note the coax is routed through the inside of the bottom dipole element. This also helps to shield the coax.

Poor "Major" Dud may have once seen an ancient mineographed
order-of-the-day or perhaps has a yellowing 5-bit-code TTY
message where everything is in caps. He may think that is
still in use, poor guy.

>> 3. If a military unit is mentioned, it is protocol (format)

Poor feller Dud just doesn't understand, perhaps no know about,
the DSN and its header information, terminal software able to
identify civilians from military personnel on Internet tie-ins.

>> 4. It is extremely easy to forge a third-party "message,"
>> then include it as part of a message in here. That is

>Correct. The priority usually falls somewhere below that of the unit A
>NCOIC MARS.

Heh heh heh.

MARS functions in existing units is still largely concerned with
morale services for unit personnel. It is hardly there to "back
up" any regular unit communications, much less be some key
ingredient in some pipe-dream "Homeland Defense Against Terrorists"
or other wild imaginings.

On putting together a photo essay of my own service days at a major
Army communications station

http://sujan.hallikainen.org/BroadcastHistory/uploads/My3Years.pdf
and /AlphabetSoup.pdf

I ran into the usual shoulder-shrugging "don't know" from a number
of official agencies at first, everyone from the Army's Center for
Military History to Fort Gordon's Signal Museum Historian's Office.

It took a LOT more digging and communicating with other agencies and units to get the final evolutionary path (including the USAF, I might add) of the 71st Signal Service Battalion of 1945 to the 78th Signal Battalion of today (based at Camp Zama, Japan, near Yokohama). It helped to have acquired a paper copy of my old battalion's own printing in 1962 describing the (then) updated station ADA and its mission, equipment, and history (to that date).

Even the Pacific Stars and Stripes military newspaper (HQ in Tokyo) helped with data. Ask nicely and it is surprising how helpful some can be. A not-quite-related sorce of information on Army communications turned up the fact that the old callsign "ADA" of Tokyo times in the '50s still exists and is now the HQ callsign of USARPAC, the United States Army, Pacific.

An even more detailed and comprehensive history of Army history (on Signal units) in Europe since 1945 ("USAREUR") is on-line at:

http://usarmygermany.com/Units/Signal/USAREUR_SignalCorps.htm

>> 6. Probably the best place for old unit information of the
>> United States Army is the Army Center for Military History.
>> They have a website with some limitation on available
>> information for non-military/non-government research. They
>> have permanent quarters with considerably detailed written
>> and photographic records for research by authorized
>> historians. The United States Navy has a similar
>> organization, also with a website. A careful web-search
>> will turn up their URLs.
>
>And will probably turn up Steve's faked career.

Heh heh, no. Neither historical agency has lists of fakers.

The only place where Robeson's "military career" could be verified or shown non-existant is NARA, the National Archives and Records Administration, and their massive military records archive in St. Louis. Getting such data requires a minimum knowledge of Robeson's social security number and proof of being a member of his family. NARA gives definitions of that and other necessary information to obtain individuals' records.

Since Robeson has refused to display even one item of official information, personal photograph while in-service, all on a claimed "18 year active duty" with the USMC, we have to conclude he NEVER HAD ANY SUCH ACTIVE DUTY TIME. The only photos he has had for claims of anything have been as a TN STATE Guard "1st Lieutenant" (scowling pose in cammies) or the infamous snot-on-moustache pose in a (used) flight suit with embroidered Captain's bars on the shoulders, as a member of the CAP. Not ONE single bit of information from EIGHTEEN YEARS claimed on active duty in the USMC.

The only conclusion possible is that Robeson is a fraud, an imposter, a wanna-be who never-was.

If Robeson makes fraudulent claims about 18 years of his life, what ELSE is he claiming fraudulently?

>> 3. His claims of anything on QRZ.COM and his AOL home page
>> are made only by him and are NOT "checked" or "investigated
>> (for truth)" by either QRZ or AOL. Note that his biography
>> now has him as "CHOP" (presumably an abbreviation for Chief
>> Operator) of a second MARS station, whereas he had claimed
>> earlier on the newsgroup as being "Assistant Chief Operator"
>> on only one MARS station.
>
>A NCOIC MARS?

You betcha. Go to the K4YZ "detailed info" link and use the link at the end to access his home page. In that he claims a SECOND MARS station service, this time as THE NCOIC. Just more embellishment by the imposter.

Robeson needs IMAGE of his mighty and heroic accomplishments. Slathering on more embellishments (never before mentioned) seem to be a part of that.

>> Mark, watch for the responses from the Mighty Major on this
>> post. :-) His actions will be as I've described.

Tsk, tsk on me...I forgot to include Robeson's usual response and answer to things he can't prove as being "LIES" by the challenger. :-)

To him, it IS a "LIE." His fantasy world is made up differently than the reality we are all accustomed to...any departure from that fantasyland will SEEM like a "LIE" to him. Naturally he is disturbed about his fantasyworld being torn asunder.

We can all concentrate on the personal squabbles of a few, the anonymous middle-school-mentality-macho-wanna-bes happily talking dirty...OR...consider the FCC document release of 7 August 2006 on Access BPL. That's available at www.fcc.gov as FCC-06-113A1 in PDF or MS Word format.

That's a REAL Policy matter. But it's too difficult for those anonymous middle-school-mentality-macho-wanna-bes who would rather throw trash and dirty words on others.

LenAnderson@ieee.org

>> Len, how've you been?

Just dandy, Brian, hope you've been the same. :-)

Been too busy with other things than to come into this
Din of Inequity more than once or twice a month. Not worth
it with some of these creatures. :-)

LHA

He's more fucked up than most of the freaks that post here, and he follows me to every group I post to. (he's a real fan)

That's OK, paybacks can be a bad thing for scott gilbert.

At any rate,

Hey, how's that 200 working out for you? I know I asked you that already but it was brand spankin' then. Still seem good to go? (portable right?)

Sure you did. You posted that you made numerous contacts, then when called on it, you claimed it was a fewer number then you changed your story to maybe one contact since the others were bootleggers. You are a liar, Markie.

Bullshit, Markie. One can see with their own eyes how filthy and piled
up your yard is. When's the last time you raked the leaves out of your
yard? Why is there trash scattered all over the yard? God knows what
kind of a filthy and piled up condition your house is in inside.

I found the Url posted it in another thread along with the note from
that iit takes up 6 months to retrieve a units histroy for the ARMY so
steve has to have been lying in saying some could come up with in only
a few days

BTW the timelines also prove steve is lying when he claims you can
call the military and find proof of his service

well I suppose you can but you need to be on hold for about 6 m0onths

At least this was somewhat on topic.

As it turns out, the noise experienced while transmitting was from a fried frontend on the radio, and was not related to the antenna.

You may now continue your weird usenet mating rituals.

2889. What fry's when you blow up your radio?

Newsgroup: rec.radio.cb

Hey hey,

So, I blew up the frontend on my radio. Opened it up, can't see any visible damage. When you blow up the radio, any idea what normally goes on it? The huge honking amp transistor looked fine, and I'll try to replace that when I can find a boatanchor with a spair, but I'm just wondering where to concentrate my effort on repairs..

I had previously been testing my radio with a 1.7 SWR on my new antenna. My radio just dropped all the power, and stopped transmitting for a while, and then a few minutes later, it started working again, but I just put out unintelligible noise, although at full power according to my meter (external).

And no, i wasn't unintelligible cuz i was drunk, I'm pretty sure i was sober at the time ;)

Hello,

Yes! I've plugged in a portable radio with headphones, and listen to myself broadcast on this. It sounds like I have 10 layers of tinfoil between me and my microphone when I talk, and I get a constant 'buzz' noise on transmit. This has been tested with an AC->DC power supply, and also wired straight to a 12V car battery. If I yell REALLY loud, with my mouth touching the microphone, I am more understandable. When I key up, other people can hear me, and some of them can understand me, but they all say that something is wrong with my radio, and that it is not my microphone.They also report that I am coming in as loud as I do when I use my working radio. It just kinda sounds like a horrible kazoo. My SWR shows happy still, and my power output according to my external meter is what I would consider normal (4 or 5 and swings to 10 or so when I talk).

I've done a visual inspection of the board, and all solder joints appear fine, and there is no visual 'burn marks' or other tell tale signs.

This broken radio also receives and does everything 100% normally. It receives like a champ. This is a single sideband radio by the way. The radio is also set to AM mode, and I'm certain that every knob and switch is set to the proper mode.

I do have the full schematics for this radio.

simple test to sugest find another mike that fits if you can

I am wondering if the fried part is inside your mike or on the curicts
most conected to the mike (how you blew up the mike would be a GOOD
question but who care how you want it fixed right?)

I don't get it.. Why is it bad to have the fan blowing down on top of
the transistor? I guess the alternative would be to have flow going
from one end to the other?

you want the fan on the heatsink that should attached to the
transistors

I look at it I have worse I have seen better

Have you ever considered maybe getting a different hobby? How about Stamp
Collecting? Many CB'ers find collecting stamps much easier to understand.
The only thing CB'ers make mistakes with in stamp collecting is they lick
the wrong side of the stamp sometimes.

Happy to help. :-)

You dweebs are the ones who should get a life. You can't take the intellectually superior and superbly accurate words of the MIGHTY N8wwm. What a bunch of little crybabies. "Mommy, that mean hammie N8wwm said we were ILLEGAL, lets kick him off usenet...Please mommy, please!"

Hey Dr. Douche, did you and Mopeydopey have a nice honeymoon? I heard Twithed and Scottiekins were there for the orgy. Are their little pee-pees dinky naturally, or did you just suck 'em down to a nub? I strongly suspect the latter is the case.

Haven't seen you guys online much, I figured that you were jerkin' off on yer Sparkomatic and ILLEGAL 2 pill amplifier.

The MIGHTY N8wwm is invincible and dedicated to making you face the illegality of your actions.

By the way, next time your momma wants to come over, please tell her to take a shower and also to douche. You might like sniffin' that odor, but I do not. Also, tell her to wear her false teeth next time. The gumming action is fine, but it does not look real good.

The MIGHTY N8wwm...Hated & feared by ILLEGAL CB twerps...And LOVING it! Special "howdies" to Scottiekins, Twistiekins, Dr. Douche, and Mopeydopey the butt pumper! You Cat box lickers!

Reminds me of the Japanese WWII soldiers still being pulled out of the
bush in th ePI in the 1970's. Robescum is out of touch with
communications theory and practice.

> >> 3. If a military unit is mentioned, it is protocol (format)

Robescum requires his own "AIG" and comm center.

> >> 4. It is extremely easy to forge a third-party "message,"

I'd be wrong if I said that everything that Robescum posts is
fraudulent. So I won't.

Let the reader beware that they need to inspect every Robescum posting
for fraud.

I think he just liked listening in on phone patches from real
servicemen to their wives. He probably got in a few minutes of
"comfort time " with the wives after the patch went "dead."

> On putting together a photo essay of my own service days at a major
> Army communications station

There is a group that goes after fakers. I think they're called
"Stolen Valor." They're probably aware of Robescum.

> The only place where Robeson's "military career" could be

> moustache pose in a (used) flight suit with embroidered Captain's
> bars on the shoulders, as a member of the CAP.

Hmmm? A 1LT with Captain's bars? Typical Robescum.

Wasn't he claiming to be enlisted in the USMC?

I'll bet he got a boner putting on that used flight suit. Oh, was that
his stomach sticking out?

> Not ONE single
> bit of information from EIGHTEEN YEARS claimed on active duty

By his absence, I thought that Robescum might have been incarcerated or doiing some heavy duty counseling.

Summer is about over. Been working too much.

I took the kids to the barber and to the movies - Ant Bully.

Need to do something fun before school starts so the kids remember that I'm still their dad.

Not sure if I'm going. I've been traveling so much lately for work I don't
know when I'll be around town. Been every where from Mexico, Raynosa, to
Canada, Guelph, with some points in between like Missouri in just the past 5
to 6 weeks alone. If I am in town I do plan to hang out and watch the cars.

The heat is transferred to the bottom of the transistors. Most amps have a heat sink that the transistors are bolted to in order to stay cool. Blowing air on top does little to remove the heat.

Has the radio ever been worked on such as a tune-up? Could be that some hack
messed up the audio output. Look for such things as missing or clipped
diodes and transistors. The best thing to do is to find an oscilloscope so
you can see what's going on.

I'd like to see him wag his weenie at them, hopefully while I have my video cam handy. You should see what my dogs can do. My female English pit has several kills and has been banned from the neighbors house for chewing up both her Rotts and her Shepard. My red nose male is still in training, but he is coming along nicely. My cousin tried to pet him the other day and almost lost some fingers.

Like I have time to drink. If you worked half the hours I do, you wouldn't have to sponge off your wife. I laugh because you amuse me with your delusion of being intelligent. Hell, I make more at my second job than you do selling shitboxes. Since you still have not said what you do for a living, I'll have to assume that selling amps is your only job and that you are supported by your wife. I'll bet she's proud.

So this asshat isn't even a CBer? What a loser. He follows you around the
news groups for his daily boot fucking because he can't afford a hobby.
Maybe if he went to one of those temp services he could earn minimum wage
and get himself a used cobra 19 and some gay ass rabbit ear antennas.

My oh my !!!

The Lavendar Lads of RRAP and rec.radio.(fill in the blank here)
are all so upset and moaning like stuck pigs in a barnyard pen
because the TSA will no longer allow them to bring their giant-sized
tubes of K-Y Warming Gel onto the airplane. It seems that our
perverted ham radio 'butt-buddies' have been taping their air-pump
powered penis toys to their leg prior to a long airline flight and once
up in the air they were going into the restroom stall to "lube up"
before going back to their seat all happy with the squeeze-bulb
inside of their left pocket with the tray down to conceal their
perverted activities. No nore boys! One of our RRAP pervs was
at the airport yesterday and was crying the blues over having to
dump his K-Y into the trash bin under the watchfull eyes of Bubba
the 6'-2" big black TSA Officer. Bubba is no dummy either, he sent
our RRAP friend (who hails from the South) thru to the full-body
X-Ray machine and his penis-pump showed up on the scan.
Casting a shi+ eating grin he then told ----- to "GET THAT THING
OFF YOUR LEG DAMMIT! YOU AIN'T GONNA BOARD NO
PLANE WITH DAT *ISLAMIC SEX TOY* STRAPPED TO YO
LEG...!" Poor -----! He just tore up his tickets and turned around
and went home all mad and upset, when he turned the corner out
of sight, Bubba, Tyrone and Kayshee each had then a good laugh
session, slappin each other on the back and laughing to the point
of crying tears over how the Bro's of The TSA busted yet another
ham radio pervert trying to board an airline flight. Good job boys!

The End.

Baaaaaaaaaaaaaaaaaaaaaaaa HAHAHAHAHAHAHAHAHAHAHA!!!!!

2950. Re: Another Great Amplifier Design...

Newsgroup: rec.radio.cb

Hello SparkySKO:

The power transistors are mounted to the Heat Sink, so cooling the heat sink makes more sense than just cooling the tops of the transistors.

But I have seen this with small amplifiers, and it seemed to work. Not how I would mount the fan tho.

Saw a really neat o keen design. The heat sink was machined away allowing the fan to be installed inside the heat sink cooling area. This worked great. And didn't have the fan hanging out over the heat sink. But if you loose the fan, its time to stop droppin the Maul.

You probably don't have time to drink... but that doesn't seem to be
stopping you.

You're absolutely right, you probably make more at your second job than
I do selling amps... but that's not saying much. Actually, I only
fabricate about one amplifier per week. That's why I can offer quality
that is unmatched by any other builder. I just do it as a hobby. My
automotive product outsells the amplifier ten to one.

> Do you you have electronic test equipment?

Not really. I have a friend who might have some equipment. Multimeter is easy enough to come across. Oscilliscope, no.

Funny that I don't have personal access to test equipment, I work in one of the most state of the art RF labs in the world with equipment galore, but I couldn't sneak in anything to test on. Nor does anyone know a darn about my plight.

The radio AFAIK did work fine for a while. So I don't think this is entirely a mod. It doesn't look modified,

Funny, I couldn't TX yesterday until i toggled the PA switch (i mashed a bunch of other buttons, but this one finally did it). Although the radio wasn't in PA mode.

I was just asking on here so that someone could kinda point me in the right direction to look at.

I appreciate your time :)

I'm using the stock uniden mike. It's a dynamic microphone. I put it on my Cobra, and listened to the audio quality, and it was fine. I haven't had luck getting my cobra mic working on this uniden however :(, but the audio quality is the same with both mic's. I took it apart, and I'm not sure if someone fiddled with it, a wire was twisted together, but poking around didn't change anything.

What mods are present on this radio? As far as I know, it's stock. I bought it used about a month ago from a trucker who stopped trucking.

Well... it could be many things in the audio chain. Probably the most
likely is the audio output device. Not sure exactly what that is in
your rig... but most take the form of a IC that is normally attached to
the aluminum chassis to sink the heat away.

I don't care who it was derected at

Gay bashing is gaybashing in some places it itself is a criminal
offense

It never has a place in radio Newgroup

you can indeed type what you want, I certainly can't legaly stop you
OTOH so can I

I realy fail to understand why the bulk of posts even the bulk of posts
not directed at me are about sex rather than a radio in radio NG's

Because they know you'll follow up to every post. Just ignore them and
they will stop. They like to tease you.

CB radios are disposable, just throw it away and buy another one, or try
stamp collecting.

Your power supply is regulated, right? What kind? Hook an auto battery
to the radio to test it from a clean 12 vold dc supply and see if it
cures your problem, or proves the source of trouble is the power supply.

Another thought here.......

The transistors could be cooled with computer cooling fans. I am now seeing Liquid Cooled Micro Processors Kits. Maybe food for thought.

The cooler the transistors are kept from the heat being dissipated the better. And don't over drive the amp is a big help.

If a amp offers a 10 dB gain, say 4 watts in and 40 watts out. increasing the drive to a few more watts out is like a nats fart in a Hurricane, no big deal!

That doesn't make sense. If it works fine on the truck like you said
then there isn't anything wrong with the radio.

Gee, Brian..... did you ever ask -why- one would put a fan to blow
into the case instead of the heatsink? Or were you just making
assumptions based on your half-vast experience in electronic hacking?
Actually, the fans make perfect sense. The heat sink alone may do a
fine job of dissipating the heat from the flanges. However, you still
have gobs of heat coming out of the pins (flags, blades, whatever), as
well as other components in there -- yes, even the transformer cores
get hot. So might as well put a fan on them since they would otherwise
be trapped in a box full of hot air (much like the Telstar Electronics
manufacturing facility; i.e, your parent's basement). Also, I didn't
see a pic of the bottom of the heat sink, and it may be that the
builder drilled holes or cut ports into the heat sink to allow for
forced-air cooling, which is probably one of the most cost-effective
and -common- methods of heat dissipation in power equipment.

So LOL all you want, Brian..... the laughs are on you!

If a trucker owned it then it's hard telling how bad it's messed up.
CB radios are cheap, just go buy yourself a new one. Or buy a bunch of
used radios and go through them until you find one that works.

Frank, I can sure tell you're no designer. While in a perfect world that has unlimited cost to put into a product... fans that blow down on the the tops of transistors... or better yet cool transformer ferrites would be optimum. The bottom line... not necessary. If the transformers are getting anywhere near the curie point... then the design is not sound. You better stick to being a critic... and leave the designing to us... LOL

If Steve Parks of Medina Ohio does your lawn care or snow removal; you might want to re-think using this idiot for your professional services. You might also question why he has so much time on his hands and abuses alcohol this way - but the bottom line would remain that you should not use his services in a business environment.

Dear Mr. Robeson,

Thank-you for your e-mail of 01 August 2006

In reference to your inquiry, no such unit "HMC 47 CSB
(PROVISIONAL)" has ever been located at Ft Sill. Furthermore I find no

reference to any "214 FA BRIGADE" at Ft Sill or any other US Army
facility.

I hope this answers your questions.

WILLIAM C ANDERS JR

_____
the above is quote from steve recent post

he said he was going to write and try to comfrim my service in HMC 47th

CSB (provisional) then part of 214th FA 3 copr art Ft Sill ok

I knew he would not confrim the current location of the 47 csb at sill
indeed the unit I believe has been reorgaized out of existance although

the paerent unit of the formation the 47 th Feild Hospital likely
remerges from this I have heard they may be a irag but I frankly don't
know or realy much care

I did not expect steve to dare say the 214th does not exist (it does
http://sill-www.army.mil/3ca/214web/214th.htm)

but I welcome it as it serves as proof that Robeson has lied us and
therfore the claims I and other have made about his veracity (or
rather the lack there of)

inthat post the Major Of Cap has choosen to fake a comincation from the

US Army it itself. inded after this how can anything he has claimed
about any DoD matter be trusted
I had expected that Robeson would wander off for awhile like the coward

he is to lick his wounds but he clearly lack the good sense to do that

so as needed I will keep reminding him

3000. Re: JUST STOP YOUR CRAP

>sound. You better stick to being a critic... and leave the designing to
>us... LOL

The curie point? Who said anything about the curie point? Heck, if
they get -that- hot they won't stay that way for very long..... the
whole friggin amp is going to get toasted. But they -can- get hot
enough to degrade the insulation on the wires going through them, or
cause seperation of the foil from the board. Even if they don't get
hot enough to cause any damage, they still contribute to the heat
inside the cabinet. And by finding a couple amps on ebay with fans
that blow on the boards, it's clear that such practices don't just
happen "in a perfect world", nor does it require "unlimited cost to
put into a product" since muffin fans are cheap -- much cheaper than
the work and cost of replacing heat-damaged components. That's what us
engineers call a "cost/benefit analysis". Not necessary? Of course
not, but then neither is the amp.

3002. Echo Charlie frequency information

Newsgroup: rec.radio.cb
Date: 2006-08-12 21:12:11 UTC
From: Fraze <dontaskdonttell@hush.com>

"Echo Charlie" frequency bands

Not many North American radio hobbyists are aware of the "Echo Charlie" bands. They are CB type "freebands" in different parts of the HF spectrum. There hasn't been much activity here in North America up to 2006 (but that is changing!). There has been, for some time, activity in Europe. Check the following frequency ranges:

85 meter band: 3.450 - 3.495 MHz LSB. This Echo Charlie band's calling channel is 3.475 LSB. The band is about 25 kHz either side of the call frequency, with occasional traffic from the UK, Germany, and Holland appearing. There's heavy QRM at times from utility (commercial/military) traffic. Avoid interference with what you may hear, and never, ever attempt communication with any "official" traffic! TAKE CARE!

45 meter band: 6.600 - 6.700 MHz LSB. This is an Echo Charlie range of frequencies with the calling frequency of 6.670 LSB. It's a good band for European traffic. There are often lots of stations from the UK, Germany, France, the Netherlands, and Belgium. Some stations are running power as low as 2 to 5 watts, with other stations reportedly running up to 1,000 watts. Again, there are utility stations in this area (like long range air traffic control!). NEVER GO TO USB! This is very important!

22 meter band: This band has also been experimented with. Channels such as 12.105, 12.130, 12.160, and up to 12.256 MHz have been used, with any clear spots in between. (The originator of this information did not indicate mode, but one would think it is USB.)

21 meter band: This band runs from 13.630 - 13.995 MHz, and modes are AM/USB. It has transcontinental traffic and is only used occasionally. 13.360 - 13.960 MHz is the main hobby pirate broadcasting range. There is also an international CB band where the calling frequency is 13.995 MHz. (In the U.S.A., 13.995 is NOT recommended for CB type communication due to military and MARS traffic! Instead, U.S. stations are encouraged to use 13.555 MHz USB, which is a Part 15 allocation.) Refer to FCC rules and regulations as to what constitutes Part 15 stations.

Non-government frequencies in the U.S.A.

Few U.S. radio hobbyists are also aware of the following frequency ranges that are listed as "non-government exclusive" by the FCC. (The Citizen's Band, and most Ham bands are examples of non-government exclusive allocations.) These are generally considered

"safe" areas around 12, 11, and 10 meters for Freebanding.
1) 25.010 - 25.070 MHz -- use CB antenna & tuner
2) 25.210 - 25.330 MHz -- use CB antenna & tuner
3) 26.175 - 26.480 MHz
4) 26.950 - 26.960 MHz
5) 27.410 - 27.540 MHz
6) 29.700 - 29.890 MHz
7) 29.910 - 30.000 MHz

-- (Also, a number of freeband stations have been known to use HF
marine frequencies.) --

*In Europe this has been a 'pirate' band for many years, referred to by
the
users as '45 metres'. Users seem to be radio enthusiasts , often ex
27Mhz
SSB operators who use this as an alternative band. This 'band' appears
to
extend from around 6600 Khz to 6700. There is a 'calling frequecy ' on
6670Khz where you will often hear stations calling 'CQ45'. Similar nets
also
seem to take place just below 3500Khz.

Additionally, it has been reported that 18.030 MHz LSB has been in use.

3003. Redco UFO and Cobra 135xlr

I have a REDCO Digi-Scan UFO and a Cobra 135xlr.
I need a copy of the instruction manual for the UFO
or instructions on how to hook it up to the 135.
Anybody know where I can get this info?
Thanks in advance for any help

Tony

3009. CB REPAIR & MODIFICATION BOOKS AT 40% OFF

Newsgroup: rec.radio.cb
Date: 2006-08-12 23:48:33 UTC
From: Lou Franklin <lou@cbcintl.com>
Message-ID: <e6qsd2l2atfmdmua8co800f5ujs0j9rjja@4ax.com>
Source record: 219640

To learn the technical TRUTH about CB Radio without all the hype from people who are just plain ignorant, check out the following books from CBC International. They're selling right now at a big discounts on our EBAY & AMAZON stores too.

Check it out!

To see exactly what these books look like, plus all the specific, chapter-by-chapter details, see our Web at:

www.cbcintl.com

Some of the books included are:

BOOK #1: THE "SCREWDRIVER EXPERT'S" GUIDE To Peaking Out & Repairing CB Radios. List $25. The most popular "big dummy's" guide ever published on do-it-yourself CB repairs & modifications. Covers peaking of receivers, transmitters, modulation, mike problems, antenna & SWR problems, detailed frequency modifications for both crystal & PLL radios. Loaded with charts, illustrations, and specific instructions for most brands including the new export models. This latest edition also covers slider and broadbanding tricks, FM conversions, and much more!

BOOK #2: THE CB PLL DATA BOOK. List $20. The only complete reference source on CB PLL synthesizer circuits ever published! Detailed PLL theory explained in layman's terms. How they work, and how to modify them for many more channels. Includes specific PLL block mixing diagrams, truth charts, & IC pin function diagrams for nearly every PLL chip ever used. Covers all the most popular U.S. & export chassis, with specific listings of all models using the chip.

BOOK #3: UNDERSTANDING & REPAIRING CB RADIOS. List $42. Giant 370-page technical book for the professional repairman. Picks up where the "SCREWDRIVER EXPERT'S" GUIDE leaves off. Includes circuit descriptions & troubleshooting guide for 23- & 40-Ch., crystal & PLL, solid-state & tube, AM, FM, SSB, CW, American & export models. Covers test equipment (& where to find it), transistor basics, synthesizers, receivers, transmitters, power supplies, T/R switching, antennas, interference, parts & accessory sources. Over 350 illustrations including schematics, charts, and photos. Huge subject index also lets you look up repairs by symptoms. This is "must" reading for any serious CB technician!

For details on our Galaxy-Ranger Service Manual (2nd Ed.) go to:

www.cbcintl.com/galaxy.htm

Frank... the insulation on the wire in the SkyWave's transformers (and all wire used inside the unit) is Teflon. Now why would would I worry about melting Teflon wire. Like I said... leave the design work to engineers.

P.S. Talk is cheap... if you are a designer, maybe you'll show us your amplifier design... with all the extras you're talking about. I would certainly be interested in seeing its superior circuitry and overall design.

Maybe you missed this part:

>> or
>> cause seperation of the foil from the board. Even if they don't get
>> hot enough to cause any damage, they still contribute to the heat
>> inside the cabinet.

So are all the other parts inside the cabinet immune to thermal
degradation? I doubt it, especially when you constantly whine about
such frills being unnecessary or too expensive. But then again, why
would you feel the need to use Teflon insulated wire if the cores
don't hit the "curie point"?

>P.S. Talk is cheap... if you are a designer, maybe you'll show us your
>amplifier design... with all the extras you're talking about. I would
>certainly be interested in seeing its superior circuitry and overall
>design.

This isn't about me, Brian. It's about you and your painfully slow
learning curve in the field of electronic engineering. And next time
maybe you can address the subject as a whole instead of trying to
discredit my point by contradicting yourself.

Gosh, your hurting my feelings. I need a tissue to wipe my tears with.
So what the fuck is your beef with me? I've NEVER seen you post before and
you want to flame me for some other asshole that's spoofing you. All I did
was reply in kind. You could have just approached me and let me know what
was up instead of starting yet another lame ass Usenet war. If you happen to
know who this asshole is that's using your call, then by all means let me
know who he is so I may direct my responses accordingly And we won't have to
go through all this drama, unless that's what your into.

Kind of funny.....

Just came from Mountain Mans Place. He was replacing 8 each 2SC2879 transistors in a 8 pill amp for a friend. At a cost of almost 200 dollars including shipping, from RF Parts. Old MM installed two cooling fans blowing air on the heat sink. After all its probably close to a KW worth of heat that must be disapated, when the key is down.

He also replaced all kinds of burn resisitors, and added in new capacitors. It sure made the customer feel good to see the Bird wattmeter neddle get barried on the 1 KW scale. Even going thru a low pass filter.

I actually like your flash alert, my steering wheel blocks my view of the dash indicators.
My second job is a hobby also, I'm a body piercer and I have a pretty sweet deal with a shop. I supply my own tools and products and I pay the shop $10 per piercing, I use about $2 worth of stuff per piercing, and the rest goes in my pocket. Depending on the piercing the range is anywhere from $20 on up. A verticle hood takes me 5 minutes to do and I put $90 in my pocket tax free.

I thought of doing that very thing, even posted about it. I got some
negative responses about the heat sink losing ability to cool, but I'm only
running a pair of 454s and the sink is from a Texas star 667. I may still do
it this winter when things get a little slow.

Again, I had that idea also, even have the fans, but wasn't sure if it would
be worth the effort. I did put one on the back of my 148 to keep it cool.

Damn Brian, this post represents why you should bottom post as I now have to
middle post.
Anyway, I have to agree with Frank on this (did I just say that?). The
heatsink is taking care of the pills, but what is keeping the other
components cool? The forced air and holes in the heat sink sound like a good
idea to me. That may not be good from a cost standpoint as a builder, but as
an owner, a cheap fan and some holes may prolong the life of the amp.

If you bought it used from a trucker it probably has been screwdrivered. You
need to take it to a competent tech and have it checked out.

The point is that the critical component(s) are the output transistors.
These account for perhaps 90% of the total power dissipation. The
cooling of these is critical to the longevity of the amp. The other
components such as transformers, capacitors, resistors, diodes, etc...
have operational temperatures that can easily withstand the temps seen
with a properly designed amp. Notice I said properly designed. Fans
have there own problems associated with them that include... but are
not limited to:
Cost
Sound
Electrical noise
Draw dirt into system

The fan would also add an additional component. Every good engineer
knows that every additional component in a system lowers the overall
reliability of that system... by having another component that can
possibly fail. The bottom line... if you don't need the fan, don't use
it. I don't need it.

This is actually not correct, and I learned that many many years ago.
Modern processors have millions of transistors... ;-)
Some extra stuff _is_ needed in many cases to make the system more
reliable, that includes a cooling mechanism.
There is a tendency towards more complexity _always_.
Protection circuits, how about temp sensors that shut it down (every
good audio amp has these).
I would not take fan-noise as a problem normally, there is lots of
environment noise even in a living room.
Best not to save on litte 3$ pieces in a design.
Especially if you are going to make only a few.
And if you making _large_ series, better invest in fail safe fool proof
systems that have tolerances so you do _not_ get thousands returned under
guarantee.

Actually, you are incorrect... adding another million or so transistors on a chip will certainly lower the reliability given other parameters being equal. However, if you change parameters such as power dissipation, technology, etc... you could actually increase the reliability. As far as fans for the processor chip... absolutely. The fan is a MUST in that design because of the obscene power dissipation in a very small area.

Remember, I never said that fans are not necessary in any design... I simply said they are not necessary to blow on the components in my design.

On a sunny day (13 Aug 2006 08:47:50 -0700) it happened "Telstar Electronics"
<briangriffey@sbcglobal.net> wrote in
<1155484070.098605.70440@m73g2000cwd.googlegroups.com>:

>Actually, you are incorrect... adding another million or so transistors
>on a chip will certainly lower the reliability given other parameters
>being equal.

That depends, if adding more (doing things in parallel) allows same capacity
(pipelining) at lower clock (and so lower temperature), [then] adding more
transistors _increases_ reliability.
The old formulas for MTBF (mean time between failure) went out the window
long time ago.

> However, if you change parameters such as power
>dissipation, technology, etc... you could actually increase the
>reliability.

Yes

>As far as fans for the processor chip... absolutely. The
>fan is a MUST in that design because of the obscene power dissipation
>in a very small area.
>
>Remember, I never said that fans are not necessary in any design... I
>simply said they are not necessary to blow on the components in my
>design.

I have to admit that fans have a rotten MTBF (and my experience with fans
is they die before everything else), so this requires or makes mandatory a
temperature sensing system (or fan rev / minute detection system).
Temp control systems can sometimes be a simple as a 'clickson' on a heatsink,
or just a diode sensor, or NTC resistor, an opamp and perhaps a SRC crowbar to
blow a fuse, can be done all with 30 cents components, and will prevent the
'pills' from frying when a fan fails.

I agree that that your temp shutdown is a worthwhile feature. However,
I'm convinced that your $0.30 cost figure is quite low. For the next
generation SkyWave, I'm considering a temp shutdown feature utilizing
Analog Devices #TMP01
(http://www.analog.com/en/prod/0%2C2877%2CTMP01%2C00.html) as well as
an excessive SWR shutdown using a Wireline
(http://www.filss.com/comp/hybrids_couplers.shtml) coupler for sensing.
This would make the amplifier virtually indestructable.

How about a thermal breaker that bolts to the heat sink? Much simpler,
cheaper, and more reliable. That's what you are striving for, right?
Or are you still holding to the mistaken idea that any added component
will decrease the reliability -- the same excuse you used to justify
not including a bias circuit in your earlier hacks?

BTW, it's been a couple years now, have you finally learned why
linearity is important for SSB?

> as well as
>an excessive SWR shutdown using a Wireline

nobody deserves to be called a child molestor not even a real child
molestor (those sick folks deserve a long quiet rest and such peace as
their misdeeds allow them)

not even you Tom deserve being called a child molestor

No, Brian, -you- are no engineer and you've proven it in this group many, many times over the last several years. Do you really think that I'm going to sit back and let you try to swindle people with your cheap knock-offs by portraying yourself as some sort of electronics professional? Hell no! I don't care if you swindle people, and I don't care if you build amps. But don't call yourself a professional when almost all the improvements to your amps are the result of -my- critiques in this group over the years. Or don't you remember just a short time ago when you didn't understand such basic principles as linearity, the flywheel effect, amplifier classes, etc. The only reason you learned is because I called you on your technical BS. Now you want to plonk me for years of mentoring you in RF fundamentals? I don't think so, Brian. You learn too much from what I have to say. And so does everyone else -- they learn what makes a good amp and what makes a bad amp. Unfortunately for you, what makes a bad amp is almost always found in your designs.

As for your challenge (of sorts) for me to post -my- designs, here's what I'll do: If enough people are interested I would be more than happy to stop by this group regularly to post and discuss the basic principles needed for people to design -and- build their own amp. And I'll do it despite my objections to the illegal nature of these amps.

Still laughing?

well I haging around mostly for a such a purpose after all the
knowledge is knowledge and it isn't ilegal for mme to seek the
knowledge to build or matin amp intended for nearby freqs and will
legal when the FCC gets around to making a certain change in the ARS egs

I agree with that, if you reread my post I said it was not good from a
business standpoint, but as an owner you can prolong the life of the other
components.
The cost for the fan is not very much, rob one from a PC power supply. Using
a PC fan will negate electrical noise and the sound is not a factor unless
your using a very sensitive mic. The holes can be covered from the inside
with thin cloth to keep dirt out and have the fan pull the air out of the
amp.
Like I said, I don't expect amp builders/sellers to i8nclude this in their
amp, it's just something the home techie can do to improve, even slightly,
the performance and longevity of the amp.

Yeah, well, the way I see it these days, King George burned the
Constitution, the Supreme Court gave him the match, and Congress sat
on a log and roasted marshmallows. If the apathetic majority doesn't
wake up and start demanding big changes then they deserve what they
get, even if it's RFI in their toasters.

Nice chip, not 13,2 V max, that is not enough, you need to lower voltage!

I just did a small one, 1n4148 diode sensor, LM324 opamp, 10 turn trim pot
(the most expensive part), a red LED (as 1.5 V reference, some resistors,
a BC448 relay driver, with an other 1n4148 diode for flyback protection.
Replace the transistor by a SRC and bingo.
Using special parts always begs the question of availability and second source.
Prices?: diode: http://www.fairchildsemi.com/pf/1N/1N4148.html etc..

>as well as
>an excessive SWR shutdown using a Wireline
>(http://www.filss.com/comp/hybrids_couplers.shtml) coupler for sensing.
>This would make the amplifier virtually indestructable.

Well that looks expensive... Just blow the fuse with an SRC :-)

OK, Jan... glad you were able to whip up a temp shutdown circuit. Not familiar with term SRC? Oh, and would you like to revise your cost figure for the circuit you built... the pot alone is more than $0.30... LOL. What about a regulator? You don't mention. I would like to see your circuit.

P.S. The Wireline is really not very expensive... maybe about $2 per unit with a few diodes and resistors to make a directional coupler circuit to sense. Then you always have the task that I'm asking you about above... interfacing to the amp circuit. I guess that might be as simple as interupting the relay coil.

Ah, last things first, 'SCR" I intended to write,
'silicon controlled rectifier' or more commonly known as 'thyristor'.
I have that circuit on a little piece of paper (did not even use CAD),
so you will have to do with this:
oops cannot even find that piece of paper, let me get the thing itself, moment...

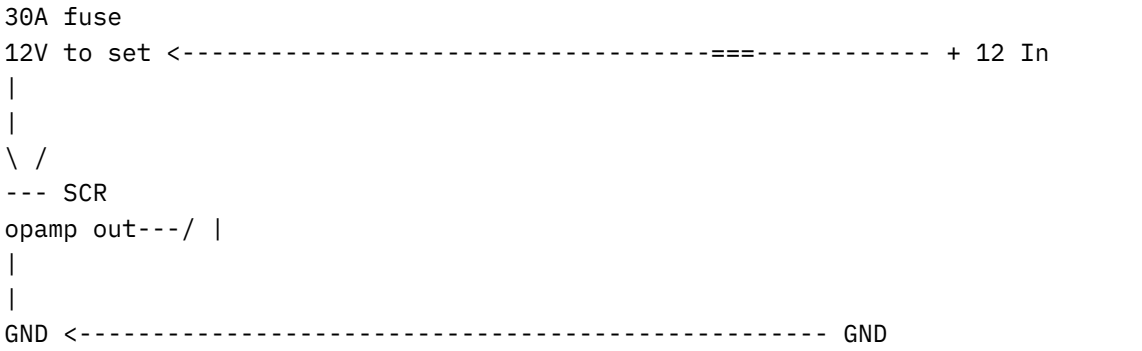
```
|-------------------------------------------------------------------|------- + 12V
| | 1N4148 --- |
1k resistor 5k6 / \ relay
| | --- |
|------- | - |----
|a | |----------- opamp in ----| \ | c
LED trimpot<---- opamp | | \ b |/
|k 1k 10 turn in + | | --5k6--| BC548
| | | a + | / |\/ e
| | temp sensor diode -----------| / |
| | | k 1N4148 1/4 LM324 |
-------------------------------------------------------------------------GND
```

So the idea is to mount the temp sensor diode on the heatsink,
run the amp or whatever it is with a thermometer till the eatsink is max allowed
temp, set the trimpot so the relay comes on at that point.
the function of the LED is to provide a 1.5 V reference voltage, not to indicate
anything.
You could use a zener too, but 1.5V zeners are more difficult to get then LEDS.

When temp rises, then the voltage across the sensor diode drops, and the opamp
output goes high, transistor conducts, relay comes on.
You could use that SCR and connect its gate to the opamp output, and the anode
to the supply (after the fuse) and it would blow the fuse on high temp.
In such a case you will want a delay, a capacitor across the temp diode for
example, so the circuit can start up without triggering the SCR.

Depending on whatever _else_ there is in your electronics, a quarter opamp
is not expensive.
You may want to replace the sensor diode by the emittor base junction of a

TO220 transistor, as these you can screw on a heatsink easier then a 1N4148.
I decoupled the whole thing with 100 uF.
The function of the second diode is to prevent the transistor being killed by
the peak voltage if the relay switches off.



Depending on the type of SCR you may need more gate drive then the LM324
can deliver, for example use the transistor as emitter follower.

Does this help?

I was never able to deciper your drawing exactly. However, from what I make of it ... I have a few problems with it... as I understand it. The first problem is that your source is not regulated. Don't think that's a good plan as that could grossly impact the threshold point at best. The second problem is there is no hysterisis at the threshold point. If the sink got close to the trip point... the relay would chatter would drive you nuts. The idea about the SCR is also not palatable to me. I don't want to blow a fuse when a fault is detected. Blowing the fuse is undesireable because the amplifier is out of commission until the fuse is replaced. Not the best for making the customer happy... LOL. I want a shut-down mode that will completely restore amp operation when the fault (heat or excessive SWR) is gone. What I described earlier will accomplish that spec.

Thanks for your input... it's a pleasure to talk to someone on this NG!

Yes, my FlashAlert product is selling better than I ever predicted
because it's the only flasher out there (that I know of anyway) that is
100% electronic and uses no relay. I 'm not gonna get rich on it.. but
it's fun... and I liked the design challenge. Anyway, it keeps me out
of the pool hall... LOL

The LED is the regulator / reference voltage.
LEDs have 1.5 volt across them (or some slightly higher voltage, depending
on the type of LED) independent of the current.
The LED gets the current from the +12V via a resistor.

>Don't think that's
>a good plan as that could grossly impact the threshold point at best.

Nope, it is very stable, opamps are independent of the power supply,
it is called supply rejection and common mode rejection.

>The second problem is there is no hysterisis at the threshold point.

There is in fact, it is in the _relay_.
In the case of the thyristor (or SCR) when it switches it is BOOM and
no need for hysterical thesis. oops.

If
>the sink got close to the trip point... the relay would chatter would
>drive you nuts.

Well, no way, have you tried?
And you would also like to _do_ something with that relay, like using
a break contact to cut power, and once it is off an other make contact
to change the reference voltage so it stays there... relays are nice.

>The idea about the SCR is also not palatable to me. I
>don't want to blow a fuse when a fault is detected. Blowing the fuse is
>undesireable because the amplifier is out of commission until the fuse
>is replaced.

Better the fuse then the 'pills', and it will have the customer look for
the problem (hopefully), but you are right, I have had stuff here with the
fuse replaced by a big nail.... :-)

>Not the best for making the customer happy... LOL. I want
>a shut-down mode that will completely restore amp operation when the
>fault (heat or excessive SWR) is gone. What I described earlier will
>accomplish that spec.

So does the relay, you COULD provide a reset button, but what I do not want
is them running it with tripping the protection every few minutes...
people do that too.
Ad a indicator LED or light,

'Temperature exceeded,
check for obstructions
in air flow or defective fan'

Add a nice LCD display (2 line I have here with green LED backlight),
a PIC microprocessor to display some texts, and when you use the micro you
can use the PIC comparator or AD to monitor the temp sensor, and program it
any way you want.
I used the PIC in my lightning detector too, these cost only 2$ and you can
modify software without making new boards.

>Thanks for your input... it's a pleasure to talk to someone on this NG!

Well, I make little cicuits sometimes, been doing it all my life....
It is fun, also I find your designs interesting, looked at that PCB layout
for a long time, was wondering if you used silver plated wire or litze.

Never too old to learn :-)

Hey Telstar.......
Wondering how your amp would work out as a base amp on a power supply.
My main concern is a clean signal and no TVI.

On another note, don't even answer trolls like Frank and DrDouche.
They're nothing more than wannabe's.................YOU'RE DOING IT!
73.

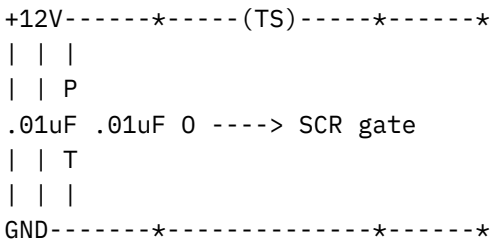
Why not just use another 1N4148 with a lower forward voltage drop?
This would eliminate the need for a trimpot -and- provide compensation
for ambient temperature variations.

Come to think of it, if you are going to use an SCR to trip a breaker, fuse or latching relay, then why not just use your temperature sensor (diodes, thermistor) in a voltage divider at the gate like so:



Either way, I still think a thermal breaker bolted to the heatsink is probably the simplest, cheapest, and most reliable method of thermal protection.

Yes, if your 'TC' is a clicson (say a 80 centigrade make contact), and you
add a series resistor so you do not fry the gate if you turn the pot to max...

Also a resistor between gate and cathode of the thyristor is required, pot
contacts are not reliable always on, floating gate sucks with a lot of RF.

This little circuit of mine works fine here however....
Parts came out of the junk box, so it was cheapest possible :-)

If I was to design for a new RF amp I would use a PIC and LCD display.
It could show output power and standing wave ratio too, temperature,
battery voltage, error status.
It is easy to program, add a reset button perhaps.
Although LCD is a BIt more expensive, it is more fun.

>

Yes, that is what we call here a 'clickson'.

Mr. Hammington,

Yes, TVI and harmonic content should be on the minds of all amp builders... but is not. The SkyWave... like any amplifier has harmonic content on it's output. The specs are given at http://www.telstar-electronics.com/SkyWave%202879AB.pdf
Remember like it says on page 2... "Driving amplifier into compression region can negatively impact harmonic performance." This is so true... once you leave the linear portion of the amplifier, all bets are off as far as harmonics and TVI.

P.S. You're right about many of the critics out there... talk is so cheap... and I keep asking to see the amps they have designed. Not one has shown me anything. I call this "back seat" engineering... LOL

Because most of the heat is transfered to the transistors metal flange
underneath, which is hopefully bolted to the right size heat sink.

The smart builder operator cools the heat sink, not the air above the
transistor die.

The amplifier shown is another poor design... probably generating lots
of crap up and down the band... while in use. One would hope the way
undersized heat sink would allow the transistors to go poof quickly
putting this amp off the air.

cheers,
skipp

Thanks for the reply,sir.
I'm guess more to the point of my question was your amp verses some of
the newer tube models,,,,I think one brand is KL or KLM. Their little
mrf 455 mobile box is a real splatter box. Thats just an observation
not an "engineering comment" :)

Anyway, I'm a consumer not a builder. I like the way you handle
yourself with all the nit wit slurs you have endured. I will be placing
an order soon!

P.S.
Thanks to Frank for being the asshole we all expect him to be, He
actually helped make my decision.

Right. The forward voltage drop decreases with increase in
temperature, so in your bridge why not use the same diode for your
reference that you use for your temperature sensor? That way the
sensor and the reference have the same temperature coefficient, making
it immune to ambient fluctuations (it triggers at the same temperature
regardless of the outside temperature). You can adjust the temperature
'trigger point' by changing the current through the reference (which
also changes the forward voltage drop). When you figure out the
current then just calculate the value of the fixed resistor and
eliminate the trimpot. From a manufacturing standpoint, this is great
because once the component values are established there is no
adjustment needed and it requires fewer components.

As I stated before, the temperature sensor is a thermistor or diode,
not a "clicson" device.

>Also a resistor between gate and cathode of the thyristor is required, pot
>contacts are not reliable always on, floating gate sucks with a lot of RF.

Hence the caps.

Never heard the term (appliance repair?), but using a 'clicksoff' on
the collector supply would be all that's needed. After all, it's just
a mousetrap; it doesn't need to be elaborate and it doesn't need
OP-amp precision. It just needs to catch the mouse. That is, unless
you are having fun building the "better mousetrap".

Come to think of it, I'm totally wrong. Using a diode as a reference
would make it -dependant- upon ambient temperature, even if the
reference diode is an LED. Just use a purely resistive voltage divider
reference (variable or fixed) and -then- it will be immune to ambient
temp variations. If you want an indicator light just hook your led
across the relay (with an appropriate resistor, of course).

I built an EB63 and did a few mods that I have suggested to you such as the ssb delay. You have never asked about my amp design, if you are interested I'll bring my camera home and take some pics if you like, or you can go look at the EB63 design and add a power light and ssb delay switch and circuit, otherwise the design is stock. But then, I never claimed to have formal training in electronics, it's just another hobby that I am in and out of.

RM Italy produces the KLM models and if they contain MRF455s they are NOT
tube amps. They don't use MRF455s anyway as they are not in production.

You don't understand RF theory yet you slam those that have knowledge that
are only making comments to improve or point out errors in his design. Too
bad your judgmental attitude has clouded your perception of me.

what ever has happened to Hams
I First wrote a couple of week I stil basicaly stand by it. I have made

at leaest a few contacts most likely before the jammer/bootlegger came on I beleive if I find I can't confrim any of them I am confident that my gear will do EME (in an effort ot work split I did "hear" echo of another qso meaning I can rea dhte largest stations and surley based on the eme literure I can make an eme contact even through such interference I ham seting up a sked to wrok in split mode with neither frq known to other till later in an effort to asure myself I have done what I set out to do

In response to my claim of my first EME contact someone in RRAP came back with "I doubt you can caluate the pathloos on an EME path (or words to that effect)

You know what I can't calualte that path loss

Indeed I would discourage anyone from trying to calculate it before trying the path what I have heard about those numbers is pretty discouraging

Why can I make such a contact when other say they can't or that I can't?

simple becuase I always KNEW I would, from the first monet I heard of EME contact which was from a question on Tech test back in 97 (I had heard a few days ebfore that No Code License existed I ordered the study but it arrived only the VE session so I tired the test cold KNOWING I would pass it then or next week or..) at the monent knowing nothing more than that such a contact was possible with my license I swore I would make one (or more)

I read the about the mode in detail and soon (in 97) realize I would likely have to wait awhile to keep that vow, but from time to time I renewed my efforts at first in data gathering a new milestone 2004 when I heard about the results with JT modes I began to pracetice with the early ones in terestial contact then last winter I learn of current jt65b mode and the details of the power and anttenna requiement abit of agonizing over wether I wanted to work with crushcrafts 31 foot 17b2 that I KNEW would work but that I have trouble steer or keeping safe in our harsh winters or the 13b2 I thought might work (and it did work like a charm, which it is in some sense of course) figuring I could always use it in terrestial modes and that I could later phase it with a second one and be assured of sucess then

but ALWAYS in mind was the KNOWLEDGE and assurance that I WOULD suceed and that even if I had failed now it was merely a lesson learned , part of paying my dues as it were

I knew I would one day be able to do it

I know anybody reading reading these words can do EME if they poccess 2 things

the will to reach for the Moon
the confindence to not count the obstacles

You have MY call on it KB9RQZ (sone to be /AE)

if you can't the data drop me a comment here or

Deadly Force Michigan and me
Amusing the way those that claim I am a nonenity are always trying to
advance the notion I am not allowed to defend myself with deadly force

one can read it in the link but the readers degist abridged version
amounts that wether or not the Castle doctrines apllies in a given
(recent impending changes expand the castle doctrne in Michigan BTW
http://www.migunowners.org/forum/showthread.php?t=15323) acitizen who
is not the agressor is only required to retreat from a dangerous
sitution in event he SAFELY do so. I point out in RRAP RRCB that I am
able to walk easily and thus I would argue if one of these nuts jobs
forced me to by getting himself shoot on my land that my ability to
safely retreat is seriously limited if it exists at all, and second the
threshold to cause me bodilyharm is lower than most becuase of the same
health problems

in short since I have been forced to think i conclude that If come
accroos a vandal on my land barring his imediate flight I will quickly
exaust any option I have not to use force esp deadly force should it be
at my disposal (after all I can't put ma shotgun if since he can better
move to take and use it against and I can't enage in hand to hand
combat to restrain the Vandal without serious risks to both of us)

some notes on obselete tech on radio but you have to wait for it
why did the Longbow cease to be the main stay of the battle feild?
after the crossbow that replaced was an inferior weapon
and the crossboww superior to the muskets and rifles that replaced
indeed the english longbowmen was more effective on the battlefeild
than any military system the follow till after WW2 indeed a gruop
Bowmen out of other ammo but happening to have thier bow with in the
retreat toward Dunkirk put a german unit to flight (mostly through the
shock factor and the quieness of the bow)
why did the longbow lose control of the battlefiled
simple it took a lifetime of traning and practice to maintain that
effectness a crowbowmen could be trained in months
a riflemen in weeks
finaly to radio
why did CW lose out to mode that are effective

acodring to even it booster is takes weeks to train a cw ops and it
take practice for most to keep up their skill
voivce why these day even the porblem for voice op in geting through
signal problem is practiced by cell phones users in many locals on a
daily basis
CW was too expensive in human and finacail terms to surviv in the
comercail world
it is too expensive in huan terms to hold sway with more than half of
the ARS ops now (look at the numers) andyet it boosters inist like the
King of englad did at one point in trying to ban the playing of golf to
insist on it continued infliction on the ARS
yet it is likely as the longbow does survive being superceeded by the
crossbow musket and M16 that it will survive
but could drop the crap about it being the end of the ars to change in
the tech of the late 20th century and stop decring those that would
like to play as trators to the kingdom of the ARS

I think I have pointed that out to him several times in the last 10 days.
Just like when you make suggestions to his amp design, when you make
suggestions about his netiquette he just avoids the issue and continues to
be rude. I'm just glad he isn't a habitual cap user or he would be killfile
fodder.

SEARCH = /MARQUEER/>>>>>>>>RESULTS::::::::::::::::::::

1. Someone who sucks a man's penis.
2. A very stupid person.

1. Because I saw Marqueer suck DrDeath's penis I knew that Marqueer is
a cocksucker.
2. That fucking DrDeath cocksucker gave Marqueer money for a head job.

MARQUEER is predictably unreliable and will fuck up whatever he is
attempting to do--especially while doing something for another person.

That cocksucker Marqueer couldn't drive five miles without getting
lost.

MARQUEER is in this order:

1:A person that makes your life as hard as possible.
2:A person that will stand in your way, and mess anything up you do.
3:A person that only cares for them self, and no one else!
4:A person that is looking to give one trouble.

Marqueer is a real Cocksucker.

Marqueer performs or has performed fellatio on dogs.

Marqueer was a cocksucker.

Hey Marqueer,Fuck off you worthless cocksucker!

Marqueer gives head.
Marqueer enjoys Giving blowjobs to niggers.

MARQUEER; Also see homo- fag- faggot- shiteating- cocksucking- queen

Ex: 1, Dude I saw Marqueer suck DrDeath's cock.
2, FUCK YOU YOU MARQUEER COCKSUCKER

1.MARQUEER performs fellatio on DrDeath.

2. MARQUEER licked and sucked DrDeath's cock until DrDeath nearly
fainted with pleasure.

>Never heard the term (appliance repair?)

Here is a site with a picture:
http://www.bcecht.nl/techniek/hoofdstuk_7.htm
it is in Dutch, but you will know the picture I am sure (figure 5).

Yes it is fun, last night I was thinking what I could do with a PIC
and a 2 line 16 char LCD.
Here:
```
--------------------
| in 10W out 300W |
| SW 1.3 80C 13.1V |
--------------------
```

On power up it would display a logo for 1 second:
```
------------------
| Panteltje amps |
| running selftest |
------------------
```

If some error condition happens:
```
------------------
| 80 C exceeded |
| check fan |
------------------

-----------------
|SWR 2.1 exceeded |
| check antenna |
-----------------
```

The hardware is _very_ simple, lets find a PIC:
First I select a display, I will use the GDM1602A-5, a 2 x 16 character
text display with LED backlight (because I have one).
This module requires 7 drive signals (4 data, read, write, enable).
It works on 5V.
Now the OIC:
We select one from here:
http://www.microchip.com/stellent/idcplg?IdcService=SS_GET_PAGE&nodeId=74
we need 7 outputs for the LCD, 5 analog inputs (output voltage, reflected
voltage, temp, input voltage, and battery voltage)
We will run it from an xtal, so 2 for the xtal, and a pin for the reset
button, and say 3 pins to take actions (switch off, clamp input signal, etc).

And ground and +5V, so a 18 pin PIC should do (and we can add some extra stuff).
Now we are here:
http://www.microchip.com/ParamChartSearch/chart.aspx?branchID=1034&mid=10&lang=en&pageId=74
First we look for analog inputs, speed and power is not important:
OK, first one 10 bit 6 channels ADC is PIC16C770, it has 3.5 kB memory, enough to write even a small OS (I did one in 8 kB) has timers, but no EEPROM.
I want EEPROM to allow calibration....
OK a PIC 16F685 12 analog channels of 10 bits.... we use the pins for IO.
this will set us back a whopping 1 dollar and 14 cents oops.
We also need a 7805 stabilizer, maybe a power MOSFET to swith the power, we do this 'neat', some resistors, some caps, and the LCD module of course, the most expensive part.

And you need a PIC programmer, and you need to be able to speak PIC ASM fluently.
One or 2 afternoons programming.
A separate board, in a metal can, with decoupling caps..

See, _he_ (telstar) designes a "car with engine and wheels'.
BUT am modern car sells with dashboard, ABS, airbags, safety zones, reclining seats.
Actually when the people try a modern car, they will no longer want the bare buggy.
This little cheap extra electronics with display and full automation SELLS.

So :-)
Will Telstar pick this up? Time shall tell, but his competition also reads this.
How nice to have an amp that you cannot blow up and tells the customer what to check.
It is 2006, this should be standard.

Thank you for the feedback :-) Good discussion!

No Frank, yo uare not that much wrong, yes LED and diode is sensitive,
but it would not be on the heatsink like the sensor (so difference counts).
If you use a 7805. (as reference), these are temp sensitive too.
Best I have here is LM 317 (with 2 resistors), has practically no temp
drift (4rth digit on a Fluke), and costs also only a dollar or less.

> with the calls you used

I didn't contact you, stupid. You claimed you made all these contacts
and you lied. Just like with everything else you claim.

Sure does. Here's one he sent me back when he was feuding with Frank and
Geo.

From: SAPguru - Bellsouth <SAPguru@bellsouth.net>

My biggest issues are temper management, and learning not to brag about my
good fortunes in life. I suspect the issue with bragging is due to some
sort of deep rooted issue with self esteem, but I am no head shrinker.
And temper management, I don't know why I have such issues controlling my
temper. Wrong combo of meds every morning, I guess. :-) I actually am
looking forward to kicking this guy's ass; which is probably something I
should learn to control. I will try to control it *after* I eat his

lunch. Frank, well he is just a moron. His new thing is that he wants
to turn it around and have me come to Washington. Like I would waste
frequent flier miles on that moron. Looks like enfotrust
(www.enfotrust.com) is back on the fast track again with the purchase of my
company (www.handcast.biz). I met a few weeks ago with the CIO and with a
VP; and supposedly the CEO was passionate about wanting to buy handCast.
Then of course he left for Israel. Well, 11 am, it's 82 degrees, and
the kids are bugging me to take them to Six Flags. Welcome to the
weekend. Fuck, I don't want to stand in lines in the sun all day.

What a fucking head case..

That's the point: you built a -differential- heat detector. Say you
set the circuit to trigger when the sensor is 150 degrees F while the
reference (LED) is at 70F. So if it's the middle of winter and your
ref is 20F then your circuit will trip when your sensor is only 100F.
That would be downright annoying!

What's illegal about an amp? To build one or to play it really loud? I heard on the news today that two people were arrested for buying lots and lots of cell phones at the same time because they could be used to make untracable calls and for terrorism, but the people were released due to lack or evidence.

Yes, use LM317 as reference voltage.

Ran into a certain well known cheap-assed ham
radio bastard operator today. Everyone in the local
clubs know him. He stinks, has greasy hair, bathes
monthly (?) and is known to crash ham widow's estate
sales the day after they plant the SK. In short the guy
is a true F-N low life pig. (...you prolly already know
just whom I am speaking of eh...? grin) Drives a beat
up old car with 10 antennas on it.

Today I caught this bastard ham stinkball rooting thru the
battery recycle boxes at the local office supply store.
He dug out two Dell laptop batteries and quickly shoved them
into his dirty overalls pockets he was wearing. (The store is
staffed by college age kids who don't give a s--t anyway
so they let him clean out the recycle bins of
batteries, toner cartridges, old cellphones and other similar
stuff as it's less work for them.....good point I guess.)

Apparently this guy has already hit every recycle bin where ever
he could get away with it, and is hoping to claim all these dead
Dell batteries as his own on their recent Laptop Battery Recall Program
that's been in the news of late. Then when he gets the replacement units
he plans to re-sell them at a profit online. Talk about a cheap
opportunistic
scrounging bum! Only a smelly ex-hamfest bum who used to sell crap at
hamfests
and now scams people on e-Bay could think of something like this....

I don't know about any Dell recall, but I routinely go through the recycled battery boxes when I see them. I often get NimH batteries which after being reconditioned (discharged/recharged) a few times are perfectly good.

Geoff.

But then you will need a current regulator on the sensor diode. Here's
a better idea: Use the 317 to supply the whole circuit and use a
resistive voltage divider for the reference. It would then be immune
to both temperature and supply voltage fluctuations.

Yet another threat from Stalker Steve. I am not surprised. Add to that the posting of multiple people's addresses (what are you up to now on that Steve, about a half dozen or so?), the usenet stalking (no matter who you think is to blame in your demented mind), and the continuing unwanted emails; and that about covers your idiocy to date. Some of the below (or all of the below) seems to describe you to a tee, loser. Maybe you are figuring that a few years in a GA prison will give you more security and better food than you have at home, eh?

Georgia
16-5-90 G

A person commits the offense of stalking when he or she follows, places under surveillance, or contacts another person at or about a place or places without the consent of the other person for the purpose of harassing and intimidating the other person. For the purpose of this article, the terms "computer" and "computer network" shall have the same meanings as set out in Code Section 16-9-92; the term "contact" shall mean any communication including without being limited to communication in person, by telephone, by mail, by broadcast, by computer, by computer network, or by any other electronic device; and the place or places that contact by telephone, mail, broadcast, computer, computer network, or any other electronic device is deemed to occur shall be the place or places where such communication is received. For the purpose of this article, the term "place or places" shall include any public or private property occupied by the victim other than the residence of the defendant. For the purposes of this article, the term "harassing and intimidating" means a knowing and willful course of conduct directed at a specific person which causes emotional distress by placing such person in reasonable fear for such person's safety or the safety of a member of his or her immediate family, by establishing a pattern of harassing and intimidating behavior, and which serves no legitimate purpose. This Code section shall not be construed to require that an overt threat of death or bodily injury has been made.

A person commits the offense of stalking when such person, in violation of a bond to keep the peace posted pursuant to Code Section 17-6-110, standing order issued under Code Section 19-1-1, temporary restraining order, temporary protective order, permanent restraining order, permanent protective order, preliminary injunction, or permanent injunction or condition of pretrial release, condition of probation, or condition of parole in effect prohibiting the harassment or intimidation of another

person, broadcasts or publishes, including electronic publication, the picture, name, address, or phone number of a person for whose benefit the bond, order, or condition was made and without such person's consent in such a manner that causes other persons to harass or intimidate such person and the person making the broadcast or publication knew or had reason to believe that such broadcast or publication would cause such person to be harassed or intimidated by others.

> like

Oh, no. You are most definitely the poster of drivel. You may think you're
"fighting the good fight" against (admittedly loathesome and putrid)
homophobes, but you are in fact being a very lame net.KKKop, trying to
tell other posters what to do in an exceedingly boring and Golden
Killfile-worthy manner.

Golden Killfile

Given to the most killfile-worthy net.kooks on Usenet. This award
recognizes exceptional killfilable merit; if you are unworthy enough to be
ignored by everyone on the face of the earth, you are eligible for this
award.

Incidentally, I'm bisexual, too, so this ain't homophobia on my part.
You're just a boring k00k who happens to be bi, though I compliment your
taste in having Woger for an enemy.

It reads like a boring version of Tommy Tosser. I realize that
this is like saying that it reads like a fat version of Jackie
Gleason.

Anyone who finds Steve Parks / moparholic homophobic accusation and rants loathesome and putrid is fighting the good fight; no matter whether AUK finds it entertaining.

an_old_friend is not bisexual. He is standing up to Mopey Dopey Steve Parks; who has accused me of being bisexual. Truly; methinks he doth protest too much; but that's another story.....

Quit whining about "harassment", and /return fire/, dolt! This is
_usenet_, and you can do a whole lot that you can't do IRL. *Forging IP
addresses* is a genuine example of abuse, not merely flaming and
trolling.

"BullDozer" aka ReelMckoi<geister@mailinator.com> is jabriol or Antonio L
Santana from
Camden NJ, the slandering liar trying to make a victim of himself to save
face. It's typical Jehovahs Witness behavior. Jabriol also suffers from
seizure caused delusions and hallucinations claiming he sees rapes of
children and black women and dead bodies under trailers in his victim
Carol's house. Does he lie or misqoute? See below.

I am bisexual never made any real secert of that dispite the efforts of
s couple of parties to blackmail me for it

OTOH it is hardly a matter of taste having woger as an enemy he is an
ememy to any form of ration thought

Cease and desist your whining. Such net.KKKoppery as this only makes you a killfilable twit to the rest of usenet. There _ain't_ no justice, and if you file a lawsuit, you will lose, badly and with immense humiliation. "Harassment", the real kind, includes phone calls to you personally, at home, at work, on your cell, and to your friends, family members, co-workers, bosses, and anyone who knows you IRL. You're just being flamed, lamed, and trolled by a bunch of brain-dead CB radio fuckwads. Get over it.

LOL, some of my coworkers have a band and I'm doing the sound and mixing,
also doing the producing for their first CD, and they use all analog
equipment except for the recording sessions and the analog sounds so much
better. But again, I'm of that era where tubes rule, but digital makes it
come together fast as opposed to trying to mix from tape.

His "word???" They don't call him Robesin for nothing.

It is important for Robesin to make fun of the dead. Shows that he has
no bounds, will do whatever it takes. But no one else can make fun of
the dead, especially his kin.

> >> 3. If a military unit is mentioned, it is protocol (format)

Somebody has got Robesin's terminal software. He's gonna have a long
sitdown with that sumbich when they finally get together.

Major Screwup is what they called Robesin, and he didn't have a whole
comm center to help make it happen. Did it all by hisself.

> http://sujan.hallikainen.org/BroadcastHistory/uploads/My3Years.pdf

All those MWR/USNMC MARS phone patches home to lonely stateside wives
is what got Major Robesin innerested in phone patchin to begin with.
Forget that official message traffic stuff.

> Even the Pacific Stars and Stripes military newspaper (HQ in
> Tokyo) helped with data. Ask nicely and it is surprising how

> http://usarmygermany.com/Units/Signal/USAREUR_SignalCorps.htm

He asked for a mission. For his sins, they gave Major Robesin one.
Eavesdropping on USNMC MARS phone patches to stateside wives.

Can't be true. He was VERY specific about the "A" in front of NCOIC.

So he's lying again. Always got a be just a little better than he
actually was.

> Robeson needs IMAGE of his mighty and heroic accomplishments.
> Slathering on more embellishments (never before mentioned)

Irrelevant. No one posting to usenet can truly prove they are who they
say they are, only, at most, that they are the same person posting all of
the messages associated with a given PGP/GPG key, so decency doesn't
matter. Usenet is a medium of entertainment more than one of discussion,
so unless you wish to be commemorated by AUK as one who is net.dead, you
will forget the net.KKKopping and "cease and desist" orders that simply
do not apply and cannot (I repeat, *cannot*) be enforced.

> Wismen and Robeson and there legion of sock puppets

<groan> Oh, by Cthulhu, Eris, and the Great White Handkerchief. No one is harassing you *unless* they are: 1) forging posts in your name and with your IP address; 2) making phone calls to you, your family, etc.; 3) sending you/your family/etc snail mail or messages in various other ways; 4) outright stalking you/your family/etc IRL or (in the workplace) making unwelcome advances upon you. If none of these things are happening, and you are just being flamed, lamed, and trolled (with sockpuppets being created in your honour), then you have no possible case for harassment. However, each unique sockpuppet is worth one UV point, and once you have ten points, you can turn them in for your very own Sombrero! As for what that's worth, nothing much, just entertainment value. If people are going to show you their rectums, you may as well take the opportunity to stick daisies, roses (with or w/o thorns), and other flowering plants in said holes.

Yes, I know, that's kind of fuckheaded, but I'm kind of a net.fuckhead. Ask anyone... There is, at any rate, no "other path", excepting the careful use of a killfile. "Cease and desist" Does Not Work, and Will Never Work. ISPs will ignore you. Everyone will ignore you.

You're the k00k, if you think that has any hope of effectiveness. You're
not being harassed, you're whining about being flamed, lamed, and
trolled. Oh, and frogged, too.

Well you put yourself off as Trevor. Bend over anyway. and you are Trevor
the Limpdick old man.

You may be Dr. Death, but we ain't.
you may not use rubbers, thus get AIDS as you implicated, but folks here do.
Well bend over buddy and I'll put my salaami in ya LOL.
You'd love it and scream in ecstacy buddy.
Dr. Death is not biblical, it is of satan, and we're protected from you.

Man, you are painful to read...Anyway. Yes, you did post it exactly as
quoted, failing to make it entirely clear to those not paying very close
attention that it was *your* words in the post, not "U-Know-Who's".
Taken together with your net.KKKopping attitude in general, that's pretty
damn k00ky. Boring, but k00ky. "Golden Killfile"-type boring, even.

There is another story Scott, the truth.

I can't take credit for outing your pathetic attempts to get attention,
such as this post from you in alt.personals.bi. No, the credit for that
goes to The Official Alt.Usenet.Kooks Funny Farm, and namely this part.

Circa 1996, Scott's humble beginnings are exemplified by pathetic attempts
to get attention, such as this post in alt.personals.bi.

http://tinyurl.com/k4zqv

Nope, not as bad as making threats on the phone. After all, internet
porn is more common than lice such as yourself, Chuckie.

You're the one who makes threatening and harassing phone calls to people
he doesn't really know, Chuckie, then fails to follow through on said
threats. I think it's perfectly obvious who's "pathetic".

Exactly, that is what I did in a lot of designs.
You have to be careful a bit, as LM317 has not a so good load regulation
as temp regulation, so do not run any relais coils or other heavy loads
of it if you use the supply reference.

I've bought one of the Ramsey kits which should arrive this week.
http://www.ramseyelectronics.com/cgi-bin/commerce.exe?preadd=action&key=DDF1
I'll let you guys know how well it works when it's assembled.
Tracking to within a couple of houses is easy even without a radio that has a signal meter but the doppler will make it all that much faster.
the serial ratbags and spastics in Sydney will get a fright when its up and running. Unfortunately Sydney repeaters are going through one of those phases where every sub-moron with a radio is having an obsessive compulsive episode and we have about 20 whispering retards making the repeater unusable. Hopefully within the next 4 weeks I can post an excel spreadsheet with all their info. they usually piss off when they lose their anonymity.

indeed it would be more effective, indeed it is likely the only realy
effective thing to do these days since Law Enforcement does not wantt
to do it job

No one cares what you say. You can post beer cans in your ass if you wish.
OTOH, I do enjoy reading the amp discussion/bitchfest, and it is easier to
read when in order.

OK, let's not be too hard on Dr. Death... although he's not very
diplomatic... he's probably right. I have adjusted my posting habits to
the bottom. I hope that will keep him happy for a while... LOL

My first choice would be silicone spray... doesn't attract dirt so
mauch like oil.

Mark, Just ignore them.

They only tease you because of the stupid things you say when you
follow up. Just ignore them and they'll give up.

Stop giving them reasons to tease you. It only makes you look
more stupid.

Take a break from the radio groups for a while, Maybe work on your
moon bounce some more.

Mark, Just ignore them.

They only tease you because of the stupid things you say when you
follow up. Just ignore them and they'll give up.

Stop giving them reasons to tease you. It only makes you look
more stupid.

Take a break from the radio groups for a while, Maybe work on your
moon bounce some more.

Mark, Just ignore them.

They only tease you because of the stupid things you say when you
follow up. Just ignore them and they'll give up.

Stop giving them reasons to tease you. It only makes you look
more stupid.

Take a break from the radio groups for a while, Maybe work on your
moon bounce some more.

SC

I just got an old RS CB portable with the good old long
telescoping antenna. It's pretty hard to extend, was
thinking of a bit of mineral oil, but I wouldn't want
to impair the RF performance of the antenna either.

Any thoughts?

Cb'er in CT

Whine, whine, whine. The thing to do with the 'phobes is mock their
(lack of) intelligence, not whinge and cry at them to stop it, like a
geeky kid in a schoolyard. No one has any reason to "cease and desist"
on your say-so alone, and no one will. If you can LART them, go ahead
and do it -- mere threats and requests to stop will accomplish nothing
but earn you a Golden Killfile award, aka *net.death*. If you can't LART
them, quit whining and start mocking! Mind you, I suppose your dyslexia
prevents effective mockery. Nevertheless, you haven't a clue what
"harassment" is, if you think you've been experiencing it. It's far more
than just flaming, laming, trolling, and frogging -- without the
personal, "real-life" element, you're just a crybaby.

Imcidentally, Woger Wiseman is a pedo-K00k!

No. You cease and desist. Net.KKKopping, such as what you are currently trying and failing to do, is a blight upon usenet, and all who do it are the worst sort of ko0ks and fascist creeps. Keep it up, and you _will_ earn that Golden Killfile, whereupon only clueless n00bs and other net.dead k0oks (most of whom are among the vilest of homophobes, WRT latter group) will ever reply to you.

> at least aiding the attacking when post crap like that

No, first I intend to humiliate you completely, if you don't cease and desist your filthy net.KKKopping. Oh, and I don't mean "...I'm going to killfile you". Oh, no. No, the Golden Killfile is an alt.usenet.kooks award, which I will generously repeat below:

Golden Killfile

Given to the most killfile-worthy net.kooks on Usenet. This award recognizes exceptional killfilable merit; if you are unworthy enough to be ignored by everyone on the face of the earth, you are eligible for this award.

With any luck, you'll end up killfiled by half of usenet (or more, better yet), assuming you intend to keep on crying at people to "cease and desist." Note that this award requires people to vote on it, though.

OTOH, you _could_ try your hand at displaying to us the k00ks you have encountered in the rec.radio.* groups, but you seem to think people are expected to "play nice" on usenet. Please, allow me to disabuse you of that wild notion: That's only alt.cuddle, and the moderated froups. Flaming, laming, trolling, and even frogging are not TOS-able offences, and you _will_ be ignored by ISPs if you complain to them.

Complaining to ISP's is boring.
Killing people is much more exciting.

>
> nothing legaly threatening in that statment

Unless something changed recently, it is quite legal
to threaten (most) people with almost anything.

You can't threaten the President (legally)
and you probably can't threaten acts of terrorism.
(but I don't know...)

Unlikely that statements posted to poetry groups
would get a lot of attention... :)

well when the threats themselves become stalking they can be prosecuted
(if the cops/da want to to do their jobs
and making a a statement that rises to the level of being a threat
while not always ilgeal does enable the target to avail himself of
certain rights and affects thing in the legal system at least here in
the USA I don't have to decide if the guy who has just made a thousand
mile trip is here to hurt me or for tea if he has threatened already, I
may legaly assume the former if he shows up
>
> You can't threaten the President (legally)

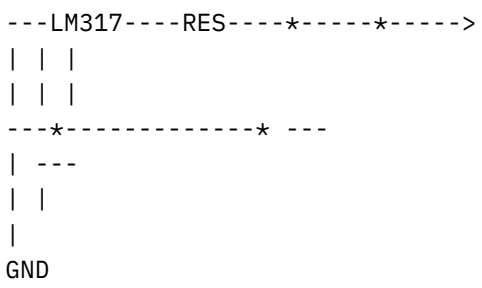
>as temp regulation, so do not run any relais coils or other heavy loads
>of it if you use the supply reference.

If you are running it plain then you should limit your transients to
10% of full capacity, or 150mA. To greatly improve transient response,
use a low value series resistor followed by a shunt cap, then run your
sense line to the output like so:



The transient output impedance will be the value of the series
resistor in parallel with the impedance of the capacitor (ESR + Xc).
With a low resistor, a high quality cap and several volts across the
chip, the circuit can easily handle a short 10A surge!

Figures that a hypocrite like him is the one complaining about "filth".
BTW, put an empty line between your words and the one to whom you're
responding. Makes you easier to read. Oh, and that's "Wiseman", and a
more inappropriate surname could not be imagined...

What's the matter, Mark? Weren't you already sufficiently pathetic as a
net.KKKop? Now you make common cause with the f'loons, too?

<thunderous cheering all over usenet> "Cease and desist" spamming.
We(tinw) will never cease or desist. In fact, you are on the verge of
having Teh Empire of MEOW move in and take up residence in your
rec.radio* froups for the next five or ten years, unless _you_ cease and
desist telling usenetters what to do. Or maybe we'll just LART you.

3390. The alt.usenet.kooks FAQ

Newsgroup: rec.radio.cb
Date: 2006-08-17 10:27:51 UTC
From: Lola Stonewall Riot <popesnarky@meowmeowmeow.org>
Message-ID:
<pan.2006.08.17.10.27.48.146801@meow.disorg.flonk.discord.kookology.alexa.cameron.the.k00k.georgewbush.the.bobo>
Source record: 220022
Cross-posted to: alt.usenet.kooks,rec.radio.cb,rec.radio.amateur.policy,rec.radio.amateur.space

Hail Eris!

Since there appear to be some severe misapprehensions as to the nature and purpose of AUK in certain of the rec.radio.* froups, it seems quite apropos to post the AUK FAQ here (Any disagreement with my point of view on this will either be ignored or re-directed to the FNVW; homophobic disagreement will be re-directed to Mark Morgan; any disagreement more brainless than that is at risk of attention from Fred Teh Bot; ok, I tell a lie, all disagreement is at risk of attention from Fred. In fact, everyone is. Beware.):

1. What is this newsgroup, alt.usenet.kooks (AUK)?

A mass of electrons spread out upon bandwidth scattered across the globe for the express purpose of separating the wheat from the chaff of the net.

2. This is a joke, right? RIGHT?!!

No more a joke than the fact that ISPs let people on every day who have nothing better to do than annoy their neighbors enough to win by popular vote silly little awards created for just such buffoons as them.

3. What's this newsgroup for?

The newsgroup alt.usenet.kooks is for the discovery and discussion of Kooks on Usenet and the Internet. These people are known technically as net.kooks.

4. What's this newsgroup NOT for?

This group exists for recreational Kookology, not for Very Personal Vendetta. It is not to be used for general harassment of someone, or for net abuse such as spamming and flooding and cancelbombing in an attempt to gain vengeance on someone or get the denizens of AUK to shut up. Either way, it won't work, it's very messy, "Bob" will give you triple your money back, and you don't get a life.

Also, we [tinw] are not in the business of harassing the vulnerable or the insane. Occasionally an apparent net.kook proves to be genuinely ill. In such cases the person is disqualified from winning awards and other posters are asked to avoid exarcerbating his or her problems. Similarly, trolling or kook-hunting in support groups is strongly discouraged.

5. Who let this newsgroup in here, and why wasn't I notified?

That's what you get for hogging the Beer Fund.

(Here you can view the control message that started it all, from our Mighty Founder MAC.)

http://www.netcabal.com/auk/cmsg.html

6. Who is a net.kook?

If you post uniquely strange, preferably incomprehensible articles, or you manifest a persistent, extreme, and somewhat bizarre obsession, you just might be a net.kook. And more.

It is important to note the subtle distinction between a net.kook, a net.cretin, a clueless newbie, troll, or garden-variety @$$hole. The newbie, one hopes, can acquire a clue on the installment plan even if he can't afford to buy one for cash; the cretin is merely stupid and/or irritating; the troll makes a fool out of himself by making a fool out of you, the @$$hole is, well, simply that. But a TRUE net.kook has a special fascination derived from his/her/its utter ineffability. Their behavior is irrational, if not downright weird, but they are seldom merely boring.

It is not considered appropriate to nominate clueless newbies, trolls, or longwinded spambrains as net.kooks. It is acceptable to nominate net.cretins, or simply to present them, without nomination, for whatever minor amusement value they may have; but the real focus here is on net.kooks in all their raging, indomitable glory.

Important Disclaimer: the fact that someone has been proclaimed a net.kook does not imply any psychological diagnosis in and of itself. A net.kook may or may not be clinically insane; that is not the concern of the AUK audience.

We hope.

7. Can you show me a few examples?

I'd rather not, but it may help to clarify things... The person who posted a handful of meaningless, ill-formed newgroup messages on May 21, 1994 was a Clueless Newbie. The person who hung around alt.religion.kibology during April and May 1994, constantly posting boilerplate "warning" messages telling people that ARK messages were intentionally meaningless, was a net.cretin. The people who post demented "scientific" theories, like Archimedes Plutonium's concept of the universe being one giant atom of plutonium, and seem incorrigible to criticism, are moderate net.kooks. The sort of being who constantly raves about the conspiracy against her/him/it is an extreme net.kook, especially if he/she/it automatically assumes that anyone who questions their world-view is an agent of the conspirators or is an ultra right-wing/left-wing extremist, and hides behind an anonymous remailer to avoid "persecution" even though they would get one hell of a lot less of it by not posting at all.

8. How do I present a Kook on this group?

The preferred technique is to get the suspected Kook to start posting to AUK so that we can all see him/her/it in all their first-hand Glory. You can do this by posting followups to the suspect's weirder messages, with your followups nonchalantly crossposted to AUK. If the suspect responds to your messages without editing the Newsgroups line, you've achieved your goal.

Another acceptable method is to repost, complete and unedited, one or two of the suspected Kook's recent rants. If you do this, please provide a brief intro in the header describing what the hell you're doing, such as indicating who this person is, what group you found the message on, or why you think the rest of us should give a rat's @$$ about it.

You should be aware that if you try this with some perfectly reasonable posting, you may be flamed to net.hell and back and probably suspected of being a net.loon yourself. It is also considered extremely lame to nominate someone as a Kook simply because you have lost, or at least failed to win, a debate with them; persistently doing so is likely to get you nominated for Kook Awards. That someone fails to perceive the self-evident, unassailable wisdom of your viewpoint does not, in and of itself, constitute Kookery.

9. What are the Kook Awards?

The newsgroup alt.usenet.kooks offers a variety of widely-recognized and highly dubious honors for your service, applying to net.kooks everywhere. They recognize several kinds and many levels of net.kookery.

Here is a detailed list of AUK awards and descriptions.

http://www.netcabal.com/auk/awards.html

10. Who the FSCK appointed YOU net.kookologist/god/nazi etc.

Nobody. We have a Gift.

11. Are there any holidays in AUK?

Why yes, there sure are:

March 30th - CALL to ARMMs

Commemorating the earliest most virulent Kook post flood of Usenet, and the great flamewar that followed in its wake.

June 26th - KOOKS DAY

Named in commemoration of Earl Curley checking into the Motel Deep 6 to serve a major in the pine penalty box, the same date as Edmond Wollmann got arrested riding the San Clemente railway...on his motorcycle.

August 15th - DEAD DOC TAVISH DAY

Named in honor of the death of one of Usenet's most famed identities due to excessive Usenet exposure; his virtual corpse is buried in a rural cemetery near New Bremen, Texas

September 10th - KAZOO DAY

This holiday commemorates Raymond Ronald "Kazoo" Karczewski's conviction for seven felonies. May Raymold be a warning to all kooks who are tempted to think that a "Sovereign Christ" is above the law.

December 20th - AUK BIRTHDAY

The anniversary of the newgrouping of alt.usenet.kooks

12. What should I do if I'm paged on the Red Courtesy Telephone?

Give the caller Gandalf the Gray's speech to the demon. Verbatim.

13. Is alt.usenet.kooks archived anywhere?

Why would you even *want* to know? [But if you truly must know, GIYF. You masochist, you.]

14. What should we do about the book?

Burn it.

15. Where can I find out more about net.kooks?

Several mini-FAQs on classic kooks of the past and present (along with several non-kooky legendary netters) are available on the World Wide Web in various archives. Be sure to set aside coffee and cats before reading. [Try insurgent.org/kook-faq/]

16. What are the AUK Offices?

As well as the kook awards, kooks may compete to hold office for a month or longer. Nominations are made in exactly the same way as for awards; the difference is that the previous holder of the office always appears on the ballot paper when a new candidate emerges, and the winner remains in office until challenged again. At present, the offices are as follows.

Darth Bawl -

This office is held by Usenet's biggest crybaby.

Village Idiot -

The name says it all.

Kooki Information Minister -

Named in honour of Iraq's Mohammed Saeed al-Sahhaf, this office is held by the kook whose claims are most noticeably at variance with known facts.

Ministry of Circle Jerks -

Although many kooks are lone wolves, a few like to make friends with those who are as delusional as themselves. This office rewards the slurpfests that often ensue.

17. Are there any net.kook awards outside of AUK?

At various points of time there have been several, from the Christian groups' Steebie Award to alt.fan.art-bell's Angstrom Medal. At least two newsgroups, talk.politics.guns and comp.systems.mac.advocacy, have given out their own Kook of the Month awards. Check around from time to time to see what other net.kook awards might be around. [alt.atheism does them, too.]

18. What is the Cabal?

From the beginning of Usenet time, there has been but one force capable of holding it in check to remain in the realm of mortal existence. For today's Usenet world you need a Giant. A Behemoth. A Cabal of IMMENSE PROPORTIONS. A REALLY *BIG* *CABAL* to offer all news ORDER.

Within this force is the most ruthless and efficient organization on all Usenet, known as the Cabal Obsidian Order (COO). If *YOU* wish to know of this entity, read, learn, and do as you will.

SEE THE LIGHT OF COLLECTIVE WISDOM!!!

A. I *SAID*, what is the CABAL?

There Is No Cabal. Long Live The Cabal.

B. How does the Cabal function??

As well as any apocryphal organization can hope to function.

C. What are the weaknesses of the Cabal?

<chortle> What weaknesses?

D. What is the hierarchy and power structure of the Cabal?

Oh, you don't need to know that. Really. You can trust us, especially when it comes to information you haven't paid for.

E. What is the Cabal Obsidian Order?

The Cabal Obsidian Order (COO) is a profoundly secret collective of operatives designed to outrun, outgun and Eliminate the most vile scum and villainy the net has to offer.

F. How do I know if the COO is responsible for something?

If the COO's operatives are doing their job correctly, they'll be laughing at whoever is actually responsible.

G. Who are the leaders of the COO?

Leaders? Where we function we don't need Leaders.

H. What is the Beer Fund?

The more you contribute to it, the more we will tell you.

I. How may I apply to become an operative of the COO?

Pitiful begging at the Vote Wrangler's feet might help. Then again it might not.

19. Who is the FNVW?

Why, our highly esteemed Friendly Neighbourhood Vote Wrangler (FNVW), whose benevolent supreme dictatorship runs the electoral wheels of our great realm. Seven fearless folk have served, with distinction:

AUK VOTE WRANGLERS

Craig Dickson (1994-1995)
Matthew Legare (1995-1997)
Killfile Daemons (1997)
Robbie Honerkamp (1997-1998)
Phoenix (1997-2004)
Peter J Ross (2004-2006)
Sean Monaghan (2006-Present)

On retirement, Phoenix accepted the high office of Friendly Neighborhood "Bob"father.

20. Do I have what it takes to BE a Vote Wrangler?

<chortle> If you have to ask, you don't have what it takes.

21. Who do you %$#@!s think you are to oppose ME, Lord High Poster-Child of the Macrocosmic Universe?

We are the ones who can and will humiliate your @$$ if you use our group as your personal piss bowl. You are a freak of the universe. You do not give the orders here. And whether you like it or not, the universe is laughing behind your back.

22. That was MEAN, just plain MEAN!!!

Payback's a bitch, ain't it?

23. Should I expect ONE CONSISTENT response to my rude and obnoxious online behavior from the denizens of AUK?

Absolutely NOT.

24. To whom should I complain if I think I have been treated unfairly?

<Darth Vader>
You think you have been treated unfairly? </Darth Vader>

25. What kind of response can I expect as a result of my stupid online behavior at AUK?

Guilty party receives one or a combination thereof of the following assorted reactions (not at all limited to these, mind you):

1. Complete silence while we blow you off
2. Complete silence while we reload
3. Complete silence while we pull the plug on your account
4. Complete silence while we sleep at the switch
5. Complete silence while we sleep in our beds
6. Complete silence while we laugh behind your back
7. Complete silence while we wipe the splattered food and/or drinks off our screens
8. Complete silence while we contemplate the known macrocosmic universe
9. Complete silence while the Vote Wrangler pays good money to watch professional Denver teams find new ways to lose
10. Complete silence while we bask in the pure glow of our obnoxiously self-righteous selves
11. Complete silence while we play high-stakes poker with Snoopy, Spike, Andy, Olaf, Marbles and Woodstock
12. Complete silence while we never notice your NoCeM'd post
13. Complete silence while we never notice your spam-canceled post
14. Complete silence while we run your rude and obnoxious posts through goofyizers for reposting
15. Complete silence while the Trekkies among us watch the USS Defiant blast bad guys' ships into rubble and fly through the debris with that nice halo of sparks effect
16. Complete silence while we wait for our Gates-sponsored software systems to uncrash themselves
17. General laughter at your expense
18. General laughter and pointing at your expense
19. General laughter, pointing and personal insults at your expense
20. Someone exposes your true service provider to the Rabble
21. Someone does any of 1-20 and reports you to your state's Attorney General
22. Someone does any of 1-21 and reports you to the FBI National Computer Crime Squad (nccs@fbi.gov)
23. Someone does any of 1-22 and does highly amusing parodies of you during the entire process
24. Talk amongst ourselves about life, love and why they sell 8-hot-dog weenie sets with 10-bun packages
25. Sounds of awe as we wonder with dropped mouths how you were able to make a greater fool of yourself than you already had
26. Sounds of astonishment as we MARVEL at the FREAK
27. Flames in your generally specific direction
28. Flames of you in the third, fourth and fifth person
29. Flames from the Vote Wrangler from the other side of the Galactic Killfile just to annoy all hell out of you
30. Nominations for many noteworthy Kook awards

26. Can I really be kicked off my ISP for...

Being a total @$$hole?

If you try hard enough.

Top-posting like the pathetic imbecile that I am?

Usually not, but we can always try.

Forging someone else's valid e-mail address?

Absolutely.

Posting multiple copies of the same message to individual news groups (Excessive Multi Posting [EMP])?

Of course. It's the SPAMMING, stupid.

27. Can I really be thrown in jail for posting threatening messages?

Yes. People have been tried and convicted for sending threatening or harassing Email or Usenet posts. We do NOT support censorship of the Internet; however, posting a message stating you are going to cause virtual or unvirtual harm to someone will probably gain you a visit from your Friendly Neighborhood FBI Agent.

28. Fine. I'll just remain anonymous. That'll work, right?

BWWAAAAAAAAA HA HA HA HA HA HA HA HA!!!!!!!!!!!!!

Try it, pinkboy. An anon remailer service can be forced to turn you in for copyright violation, harassment, stalking; you name the crime - they've got the time. If you ran an anon remailer service what would be the point of protecting flagrant abusers of the net and the Law??

29. Okay, then I'll bust your #$%&$*!! @$$ off AUK instead!

Uh... yeah. Many denizens of AUK are abuse admins, know abuse admins, sleep with abuse admins, or otherwise have years of experience dealing with and educating others about precisely your kind of dubiosity. A good account is a terrible thing to waste, so don't sacrifice yours on our altar.

30. I just realized I am a Maroon. How can I improve my standing in the eyes of the Internet, my balloon doll, and, most importantly, "Bob"?

REPENT. The End is always near.

Ah, no. See the FAQ I just posted for AUK. Also, note that you and a
fair number of your compadres in the rec.radio groups are also eligible
for various awards and offices, due to your and their own k00ky
behaviour. Here's a link explaining what I mean by "k00ky" behaviour:

http://www.insurgent.org/~jhd/kookway.htm

Also, here's a quote from Teh Mighty Kali, our resident war goddess, to Linda Gore:

"The awards granted by alt.usenet.kooks are the official Usenet kook awards, Linda. They were not created for the purpose of devaluing acts of kindness. They were created, and are maintained, for the purpose of recognizing abusive posters. Your fellow nominees are liars, bigots, frauds, forgers, defamers, screed spammers, people who falsely accuse others of stalking when they themselves are the stalkers, etc. You get the picture. If you don't, return to the above link and read.

"Not just anyone can be nominated; there are standards that must be upheld. No one may be nominated for purposes of revenge or a joke. Not all nominations are accepted. There must be evidence of abuse."

In Mark's case, there is plenty of evidence to convict him of spamming. However, in your case, Wiseman's, and various others', you have repeatedly and incessantly displayed monumental levels of homophobia, racism, sexism, and general fuckwittedness. If he has been abusive, the rest of you have been monstrous. In fact, I think the rec.radio.* froups seem like a great little fixer-upper for the MEOW re-decorators...

Yeah good call there TE.

Use Pam cooking spray. I use it on my aluminum tubing saw, paper shreader, ban saw, and many other items. It can be used to lube the Telescoping Chrome surface of the antenna. Spray it and let it set over night, then slowly run the antenna up and dowm, then wipe off the excess.

Yeah, you want to spam the internet! No go make more fake EME contacts
and lie about it.

Yes, a bit of capacitance is a good idea :-)
At the price of LM317 these days (45 dollar cent for TO220), in semi
professional equipment (and small series on top) there is
not a big objection perhaps against using one both one as main regulator and
one without the resistors as 1.2V reference (it is a bandgap reference).
http://focus.ti.com/docs/prod/folders/print/lm317.html

Have you ever tried to connect one that way, have a DVM on it,
then heat it with a soldering iron?
Nothing changes in the millivolt range ....
Fun experiment.

Nice idea, had not thought of that, did some googling, there are several?
it seems:
http://www.edn.com/contents/images/185953f1.pdf

I did have some 150 Ohm speaker once.... maybe an impedance transformer
with a big airgap to prevent saturation of the core, like the old class A
tube output transformers, could be used.
*Or maybe use 2 x LM317 in series, and drive with opposite phase signals
to make a totem pole type output?
Now plenty of space for experimentation.
I have a lead acid battery charger with one, and made a NiMh charger with one,
it has current limit and voltage limit....
Great chip.
My audio bass channel amp now uses a TDA7249:
http://panteltje.com/panteltje/amplifier/index.html

Been in use some years now:-) very stable, not even a R/C network needed
across the speaker.

How nice. Two k00ks are outing personal info of an enemy who has kicked
their arses to hell and back.

> 2. If you had been following this thread in its entire, before sticking

I've seen the alleged "turd poems", whining k00ky crybaby. You can't
handle him posting mean things about you, so you out his personal info.
You are a fucking k00k, and jail time may be in your future.

Well, isn't THAT too fucking bad! Because we(tinw) didn't start x-posting
into _your_ group. We(tinw) are there now, though.

Mark, Just ignore them.

They only tease you because of the stupid things you say when you
follow up. Just ignore them and they'll give up.

Stop giving them reasons to tease you. It only makes you look
more stupid.

Take a break from the radio groups for a while, Maybe work on your
moon bounce some more.

Mark, Just ignore them.

They only tease you because of the stupid things you say when you
follow up. Just ignore them and they'll give up.

Stop giving them reasons to tease you. It only makes you look
more stupid.

Take a break from the radio groups for a while, Maybe work on your
moon bounce some more.

I'm not sure what you're finding funny. Mud masks tend to be too harsh
for my skin, so they frighten me. I was simply asking you a question.
And, Frankly, I'm offended by your lack of compassion for my phobia.

I think the hams are more to blame, Gilbert always gets his ass handed to
him in whatever group he posts to.

If Markie-tard is any indication of ham radio it's easy to see why the
numbers are shrinking fast.

ham fucks generally post foul/gay shit below here

Oh, I'm not threatening you with a thing -- calling the cops ain't my style, unless someone goes "real-life" on me, which no one ever has. You've gone real-life on Ward Hardman (because he handed you your arse in a flamewar, and made (obviously off-colour) limericks about it), and whatever his flaws may be, he doesn't appear to be that kind of k00k, at least.

> Jesus you guys are really kindergarten stuff. Typing it up on parchment

Just WHAT IS * TEA-BAGGING * anyway ??

from: http://en.wikipedia.org/wiki/Teabagging

Teabagging is a slang term for the act of a man
placing his genitals, specifically the scrotum,
on the face, head, or in the mouth of another
person. Windmilling is striking someone in
the face with a penis (also known as a Fodunk,
a "Turkey Slap", a "Mushroom Stamp", and a "Love Slap").

As a sexual practice, "teabagging" refers to a man
dipping his testicles into the mouth of his partner
as a form of oral sex; thus his partner was "teabagged",
as the practice vaguely resembles dipping a
teabag in a cup of water. Sometimes teabagging
is taken to specifically mean the act of a male stripper
repeatedly tapping and grinding his testicles into
a patron's forehead. In this case the patron was "teabagged."

Teabagging first entered pop culture in John Waters' cult film
Pecker (as an act - the forehead variety of teabagging -
banned in a particular male strip club). Waters discovered
the practice at a Baltimore bar called the Atlantis. He also
claims it has since been superseded by the related act of
helicoptering, "where they whap-whap you in the face
with their hard-on" [1]. The term was more recently
described in detail in the DVD Extras of The Aristocrats
by Hank Azaria and also on the television series Sex and
the City and appeared again in the film Soul Plane, included
in a list of sexual acts and later defined. On the DVD of
the film Jay and Silent Bob Strike Back, Jay sings a song
which includes the line "teabag my balls" in one deleted scene.
It also appears in America (The Book) by the staff of
The Daily Show and has been referenced on the television
show by its host, Jon Stewart. It also appears as a kind
of teenage party hoax in the movie In My Father's Den and
in Brandon Vaughn's common acts of degradation DVD.
It is featured in the HBO series Curb Your Enthusiasm
(season 1, episode 3). It was described on an episode
of the television series Law and Order: Special Victims
Unit. Finally, on July 30th 2002, the term was used several
times on the air during a serious newscast when
Captain Janks made a crank call. Also referenced in a

dialog between David Cross and Michael Cera in an
episode of Arrested Development (Dec, 2005). It is also
used in the American version of Takeshi's Castle (MXC)
whenever the green suited sumo wrestler (named the
Green Teabagger) wins by sitting near the contestants face.
On the hit MTV show Newlyweds, Jessica Simpson,
Jessica and her Mom went out shopping and stumbled
upon a brand of clothes labeled "teabagging", they
then went on to discussing what they thought the term meant.

A variant known as a roman helmet or roman soldier
involves laying the penis along the person's nose while
placing the testicles on their eyes, somewhat resembling
the helmet of a Roman legionary. This can also be referred
to as a Gonziano in reference to the Muppet character
Gonzo, who has a long, phallic nose. "Roger's Profanisaurus"
also refers to this as the "Dutch blindfold". This practice,
widely known in high-school and fraternity party circles,
has become known as a "Famous Henry." In some areas
of the country, particularly Minnesota, this practice is
known as a "Cap'n Crunch," for the hat worn by the
iconic breakfast cereal mascot.

As practical joke Teabagging can also be practiced
as a practical joke. This is sometimes known as
cat-braining or Cock Slapping, after the appearance
of the scrotum; an alternate term is hanging brain, a term
also used as a level name in the computer game Marathon
Infinity. In its joking form, teabagging is attributed as a shaming
or a degradation of the victim. The practice is most
common among high school and college males. Teabagging
often occurs when these males are intoxicated with alcohol
and have a camera at hand. Afterwards, it is not uncommon
to see flyers, postings and e-mails of the victim, with a
scrotum across the forehead, in an attempt to socially
consummate the shaming aspect of this male ritual.
In addition to the well known and often used scrotum
on the forehead variation of teabagging there is also the
act of dipping one male's scrotum into the drink of
another unbeknownst to the victim. This too is most
frequently done while the males are intoxicated.
If time permits, multiple males dip their scrotums into one drink.
The act is only revealed to the drinker after the beverage has been
finished.

- END -

(Now..........don't y'all feel MUCH better ??)

_____
Hail Eris! TM#5; Flonk Leader 2 & 11-1/9
The Ridiculously Long Scarf of Tom Baker

1. What is this newsgroup, alt.usenet.kooks (AUK)?

A mass of electrons spread out upon bandwidth scattered across the globe
for the express purpose of separating the wheat from the chaff of the
net.

2. This is a joke, right? RIGHT?!!

No more a joke than the fact that ISPs let people on every day who have
nothing better to do than annoy their neighbors enough to win by popular
vote silly little awards created for just such buffoons as them.

3. What's this newsgroup for?

The newsgroup alt.usenet.kooks is for the discovery and discussion of Kooks on Usenet and the Internet. These people are known technically as net.kooks.

4. What's this newsgroup NOT for?

This group exists for recreational Kookology, not for Very Personal Vendetta. It is not to be used for general harassment of someone, or for net abuse such as spamming and flooding and cancelbombing in an attempt to gain vengeance on someone or get the denizens of AUK to shut up. Either way, it won't work, it's very messy, "Bob" will give you triple your money back, and you don't get a life.

Also, we [tinw] are not in the business of harassing the vulnerable or the insane. Occasionally an apparent net.kook proves to be genuinely ill. In such cases the person is disqualified from winning awards and other posters are asked to avoid exarcerbating his or her problems. Similarly, trolling or kook-hunting in support groups is strongly discouraged.

5. Who let this newsgroup in here, and why wasn't I notified?

That's what you get for hogging the Beer Fund.

(Here you can view the control message that started it all, from our Mighty Founder MAC.)

http://www.netcabal.com/auk/cmsg.html

6. Who is a net.kook?

If you post uniquely strange, preferably incomprehensible articles, or you manifest a persistent, extreme, and somewhat bizarre obsession, you just might be a net.kook. And more.

It is important to note the subtle distinction between a net.kook, a net.cretin, a clueless newbie, troll, or garden-variety @$$hole. The newbie, one hopes, can acquire a clue on the installment plan even if he can't afford to buy one for cash; the cretin is merely stupid and/or irritating; the troll makes a fool out of himself by making a fool out of you, the @$$hole is, well, simply that. But a TRUE net.kook has a special fascination derived from his/her/its utter ineffability. Their behavior is irrational, if not downright weird, but they are seldom merely boring.

It is not considered appropriate to nominate clueless newbies, trolls, or longwinded spambrains as net.kooks. It is acceptable to nominate net.cretins, or simply to present them, without nomination, for whatever minor amusement value they may have; but the real focus here is on net.kooks in all their raging, indomitable glory.

Important Disclaimer: the fact that someone has been proclaimed a net.kook does not imply any psychological diagnosis in and of itself. A

net.kook may or may not be clinically insane; that is not the concern of the AUK audience.

We hope.

7. Can you show me a few examples?

I'd rather not, but it may help to clarify things... The person who posted a handful of meaningless, ill-formed newgroup messages on May 21, 1994 was a Clueless Newbie. The person who hung around alt.religion.kibology during April and May 1994, constantly posting boilerplate "warning" messages telling people that ARK messages were intentionally meaningless, was a net.cretin. The people who post demented "scientific" theories, like Archimedes Plutonium's concept of the universe being one giant atom of plutonium, and seem incorrigible to criticism, are moderate net.kooks. The sort of being who constantly raves about the conspiracy against her/him/it is an extreme net.kook, especially if he/she/it automatically assumes that anyone who questions their world-view is an agent of the conspirators or is an ultra right-wing/left-wing extremist, and hides behind an anonymous remailer to avoid "persecution" even though they would get one hell of a lot less of it by not posting at all.

8. How do I present a Kook on this group?

The preferred technique is to get the suspected Kook to start posting to AUK so that we can all see him/her/it in all their first-hand Glory. You can do this by posting followups to the suspect's weirder messages, with your followups nonchalantly crossposted to AUK. If the suspect responds to your messages without editing the Newsgroups line, you've achieved your goal.

Another acceptable method is to repost, complete and unedited, one or two of the suspected Kook's recent rants. If you do this, please provide a brief intro in the header describing what the hell you're doing, such as indicating who this person is, what group you found the message on, or why you think the rest of us should give a rat's @$$ about it.

You should be aware that if you try this with some perfectly reasonable posting, you may be flamed to net.hell and back and probably suspected of being a net.loon yourself. It is also considered extremely lame to nominate someone as a Kook simply because you have lost, or at least failed to win, a debate with them; persistently doing so is likely to get you nominated for Kook Awards. That someone fails to perceive the self-evident, unassailable wisdom of your viewpoint does not, in and of itself, constitute Kookery.

9. What are the Kook Awards?

The newsgroup alt.usenet.kooks offers a variety of widely-recognized and highly dubious honors for your service, applying to net.kooks everywhere. They recognize several kinds and many levels of net.kookery.

Here is a detailed list of AUK awards and descriptions.

http://www.netcabal.com/auk/awards.html

10. Who the FSCK appointed YOU net.kookologist/god/nazi etc.

Nobody. We have a Gift.

11. Are there any holidays in AUK?

Why yes, there sure are:

March 30th - CALL to ARMMs

Commemorating the earliest most virulent Kook post flood of Usenet, and the great flamewar that followed in its wake.

June 26th - KOOKS DAY

Named in commemoration of Earl Curley checking into the Motel Deep 6 to serve a major in the pine penalty box, the same date as Edmond Wollmann got arrested riding the San Clemente railway...on his motorcycle.

August 15th - DEAD DOC TAVISH DAY

Named in honor of the death of one of Usenet's most famed identities due to excessive Usenet exposure; his virtual corpse is buried in a rural cemetery near New Bremen, Texas

September 10th - KAZOO DAY

This holiday commemorates Raymond Ronald "Kazoo" Karczewski's conviction for seven felonies. May Raymold be a warning to all kooks who are tempted to think that a "Sovereign Christ" is above the law.

December 20th - AUK BIRTHDAY

The anniversary of the newgrouping of alt.usenet.kooks

12. What should I do if I'm paged on the Red Courtesy Telephone?

Give the caller Gandalf the Gray's speech to the demon. Verbatim.

13. Is alt.usenet.kooks archived anywhere?

Why would you even *want* to know? [But if you truly must know, GIYF. You masochist, you.]

14. What should we do about the book?

Burn it.

15. Where can I find out more about net.kooks?

Several mini-FAQs on classic kooks of the past and present (along with several non-kooky legendary netters) are available on the World Wide Web in various archives. Be sure to set aside coffee and cats before reading. [Try insurgent.org/kook-faq/]

16. What are the AUK Offices?

As well as the kook awards, kooks may compete to hold office for a month or longer. Nominations are made in exactly the same way as for awards; the difference is that the previous holder of the office always appears on the ballot paper when a new candidate emerges, and the winner remains in office until challenged again. At present, the offices are as follows.

Darth Bawl -

This office is held by Usenet's biggest crybaby.

Village Idiot -

The name says it all.

Kooki Information Minister -

Named in honour of Iraq's Mohammed Saeed al-Sahhaf, this office is held by the kook whose claims are most noticeably at variance with known facts.

Ministry of Circle Jerks -

Although many kooks are lone wolves, a few like to make friends with those who are as delusional as themselves. This office rewards the slurpfests that often ensue.

17. Are there any net.kook awards outside of AUK?

At various points of time there have been several, from the Christian groups' Steebie Award to alt.fan.art-bell's Angstrom Medal. At least two newsgroups, talk.politics.guns and comp.systems.mac.advocacy, have given out their own Kook of the Month awards. Check around from time to time to see what other net.kook awards might be around. [alt.atheism does them, too.]

18. What is the Cabal?

From the beginning of Usenet time, there has been but one force capable of holding it in check to remain in the realm of mortal existence. For today's Usenet world you need a Giant. A Behemoth. A Cabal of IMMENSE PROPORTIONS. A REALLY *BIG* *CABAL* to offer all news ORDER.

Within this force is the most ruthless and efficient organization on all Usenet, known as the Cabal Obsidian Order (COO). If *YOU* wish to know of this entity, read, learn, and do as you will.

SEE THE LIGHT OF COLLECTIVE WISDOM!!!

A. I *SAID*, what is the CABAL?

There Is No Cabal. Long Live The Cabal.

B. How does the Cabal function??

As well as any apocryphal organization can hope to function.

C. What are the weaknesses of the Cabal?

<chortle> What weaknesses?

D. What is the hierarchy and power structure of the Cabal?

Oh, you don't need to know that. Really. You can trust us, especially when it comes to information you haven't paid for.

E. What is the Cabal Obsidian Order?

The Cabal Obsidian Order (COO) is a profoundly secret collective of operatives designed to outrun, outgun and Eliminate the most vile scum and villainy the net has to offer.

F. How do I know if the COO is responsible for something?

If the COO's operatives are doing their job correctly, they'll be laughing at whoever is actually responsible.

G. Who are the leaders of the COO?

Leaders? Where we function we don't need Leaders.

H. What is the Beer Fund?

The more you contribute to it, the more we will tell you.

I. How may I apply to become an operative of the COO?

Pitiful begging at the Vote Wrangler's feet might help. Then again it might not.

19. Who is the FNVW?

Why, our highly esteemed Friendly Neighbourhood Vote Wrangler (FNVW), whose benevolent supreme dictatorship runs the electoral wheels of our great realm. Seven fearless folk have served, with distinction:

AUK VOTE WRANGLERS

Craig Dickson (1994-1995)
Matthew Legare (1995-1997)
Killfile Daemons (1997)
Robbie Honerkamp (1997-1998)
Phoenix (1997-2004)
Peter J Ross (2004-2006)
Sean Monaghan (2006-Present)

On retirement, Phoenix accepted the high office of Friendly Neighborhood "Bob"father.

20. Do I have what it takes to BE a Vote Wrangler?

<chortle> If you have to ask, you don't have what it takes.

21. Who do you %$#@!s think you are to oppose ME, Lord High Poster-Child of the Macrocosmic Universe?

We are the ones who can and will humiliate your @$$ if you use our group as your personal piss bowl. You are a freak of the universe. You do not give the orders here. And whether you like it or not, the universe is laughing behind your back.

22. That was MEAN, just plain MEAN!!!

Payback's a bitch, ain't it?

23. Should I expect ONE CONSISTENT response to my rude and obnoxious online behavior from the denizens of AUK?

Absolutely NOT.

24. To whom should I complain if I think I have been treated unfairly?

<Darth Vader>
You think you have been treated unfairly? </Darth Vader>

25. What kind of response can I expect as a result of my stupid online behavior at AUK?

Guilty party receives one or a combination thereof of the following assorted reactions (not at all limited to these, mind you):

1. Complete silence while we blow you off
2. Complete silence while we reload
3. Complete silence while we pull the plug on your account
4. Complete silence while we sleep at the switch
5. Complete silence while we sleep in our beds
6. Complete silence while we laugh behind your back
7. Complete silence while we wipe the splattered food and/or drinks off our screens
8. Complete silence while we contemplate the known macrocosmic universe
9. Complete silence while the Vote Wrangler pays good money to watch professional Denver teams find new ways to lose
10. Complete silence while we bask in the pure glow of our obnoxiously self-righteous selves
11. Complete silence while we play high-stakes poker with Snoopy, Spike, Andy, Olaf, Marbles and Woodstock
12. Complete silence while we never notice your NoCeM'd post
13. Complete silence while we never notice your spam-canceled post
14. Complete silence while we run your rude and obnoxious posts through goofyizers for reposting
15. Complete silence while the Trekkies among us watch the USS Defiant blast bad guys' ships into rubble and fly through the debris with that nice halo of sparks effect
16. Complete silence while we wait for our Gates-sponsored software systems to uncrash themselves
17. General laughter at your expense
18. General laughter and pointing at your expense

19. General laughter, pointing and personal insults at your expense
20. Someone exposes your true service provider to the Rabble
21. Someone does any of 1-20 and reports you to your state's Attorney General
22. Someone does any of 1-21 and reports you to the FBI National Computer Crime Squad (nccs@fbi.gov)
23. Someone does any of 1-22 and does highly amusing parodies of you during the entire process
24. Talk amongst ourselves about life, love and why they sell 8-hot-dog weenie sets with 10-bun packages
25. Sounds of awe as we wonder with dropped mouths how you were able to make a greater fool of yourself than you already had
26. Sounds of astonishment as we MARVEL at the FREAK
27. Flames in your generally specific direction
28. Flames of you in the third, fourth and fifth person
29. Flames from the Vote Wrangler from the other side of the Galactic Killfile just to annoy all hell out of you
30. Nominations for many noteworthy Kook awards

26. Can I really be kicked off my ISP for...

Being a total @$$hole?

If you try hard enough.

Top-posting like the pathetic imbecile that I am?

Usually not, but we can always try.

Forging someone else's valid e-mail address?

Absolutely.

Posting multiple copies of the same message to individual news groups (Excessive Multi Posting [EMP])?

Of course. It's the SPAMMING, stupid.

27. Can I really be thrown in jail for posting threatening messages?

Yes. People have been tried and convicted for sending threatening or harassing Email or Usenet posts. We do NOT support censorship of the Internet; however, posting a message stating you are going to cause virtual or unvirtual harm to someone will probably gain you a visit from your Friendly Neighborhood FBI Agent.

28. Fine. I'll just remain anonymous. That'll work, right?

BWWAAAAAAAAA HA HA HA HA HA HA HA HA HA!!!!!!!!!!!!!!

Try it, pinkboy. An anon remailer service can be forced to turn you in for copyright violation, harassment, stalking; you name the crime - they've got the time. If you ran an anon remailer service what would be the point of protecting flagrant abusers of the net and the Law??

29. Okay, then I'll bust your #$%&$*!! @$$ off AUK instead!

Uh... yeah. Many denizens of AUK are abuse admins, know abuse admins, sleep with abuse admins, or otherwise have years of experience dealing with and educating others about precisely your kind of dubiosity. A good account is a terrible thing to waste, so don't sacrifice yours on our altar.

30. I just realized I am a Maroon. How can I improve my standing in the eyes of the Internet, my balloon doll, and, most importantly, "Bob"?

REPENT. The End is always near.

Somehow, I don't believe you're really CJ Hardman. Call me crazy, but I
just have this weird intuition.

Snarky (with thanks to Trippy for the seconding, on the understanding
that the nomination is joint, including "Ward Hardmanure", "Jim's"
partner-in-kookery)

The last part of that explanation above sheds a whole new light on
ole ex-14.313 mHz's Dumbass Donnie's favorite radio buddy
and his peculiar and eccentric on the air habits from up in MN !

Gee. I miss listening to the kook from GA and his matching
8-Ball bookend from MN. Now all we gots left in BLB in OK
on 14.313 in the daytime and his buddies who all sound like
they are 3 steps away from the cemetary vault.....

Gotta enjoy these ham radio clowns folks, their bad health
habits (95% of em smoke, eat Big Mac's daily, don't exercize
etc...) and often advanced age means that they won't last long.
Which is also good news as their XYL's usually can't wait to
unload all their "ham radio junk" a week after they've been
planted, which means easy pickup and re-sale $$'s on E-Screw.

I just F-N love it all !!

"It's depressing, seeing a hot porn star
fucking some freaky-dicked old aqualung."
~ Rev. Otto

"You know a religion has no sense of humor,
when a guy can stand up and say, you know,
if you commit suicide for Allah,
after you die you will be met in heaven by 70 virgins'
and nobody in the room just goes,
'AHAHAHA! Son of a bitch! That was great!'"

> I think it was Heinlein who said, "if captured, pray they don't throw you
> to the women."

I believe it was, yes. I have to agree...Last night, on my way home from volunteering in the Downtown Eastside (you know which one -- Scoville ID'ed it), I was waiting at a bus stop, when I heard this woman behind me, crying her eyes out and receiving commiserations and support from a number of people who'd been in a bar with her when she was apparently jumped by three other young women. It turned out she beat up all three of them, but she was still dealing with the shock of the attack and how she dealt with it. She was just asking me for a little money to go buy a cigarette when one of her attackers came out of the bar...Seems that someone wasn't quite over being pissed-off. No, not at all. Yikes. The other girl was lucky that her intended victim was pulled off before getting more than a dozen or so punches in.

I'll have to make a note of that: Never get a woman violently angry at self. Just a bad idea. "Xena: Warrior Princess" wasn't at all unrealistic on the level of character story/backstory, IMHO. IYKWIM(AITYD).

> Apart from that, I've known a fair number of people with genuine mental

> Chuck.
>
> :)

Quite. But I was thinking of him just being kept in that room for the rest of his life, due to his obvious mental problems (which fortunately don't seem to include anything that might have him disqualified as a Formosa).

> barfing about, smegbrain. Go suck on a derelict's cracked-up toes, retard.

Oh, no. No, YOU don't get it. We(tinw) of MEOW worship at the altar of TEH
MIGHTIE POAST KOUNT, and are perfectly willing to fill up your little
froup with all kinds of threads about Michael Jackson f'loons, CB radio
stalker/homophobes, questions about what <fitb> has to do with OS/2,
various other kinds of homophobes and racists. We really don't mind if
you x-poast to our fine froup -- but no one posts to AUK and tells
kookologists what to do. Not without living to regret it. There's an
easy solution, of course: Don't x-post to AUK. But you are clearly too
deficient in your mental capacity to accomplish this, Outer Filth, or
you would never have considered becoming Outer Filth in the first place.

Incidentally, this nomination should be corrected to read, "Mark 'an old friend' Morgan for Golden Killfile". Also, note, if you will, that Woger is among his more vicious enemies. I think it's getting close to the proper time to deal with that fuckstain...Of course, I refer only to kook award nominations. <looks innocently at AHM>

Are you saying that you and your confreres out the personal info of
those you "defeat" in flamewars?!? Because I think that may be even
kookier. I'm not sure -- I'll have to consult with my colleagues, and to
keep it all open and above-board, we'll have to do it in this x-poasted
thread, and given the nature of such things to go on and on, it may be a
few months before it's over. Or years. Whatever.

3580. Status of Steve Parks stalking

Newsgroup: rec.radio.cb
Date: 2006-08-18 14:10:39 UTC
From: Mopey Dopey Steveo <mopiedopey@yahoo.com>
Message-ID: <44e5bd30$0$15867$88260bb3@free.teranews.com>
Source record: 220262
Cross-posted to: a.a.ohio.cleveland,a.a.ohio.medina,alt.cleveland,alt.home.lawn.garden,alt.ohio,rec.radio.cb

If anyone has more information again about someone who calls himself Steve Parks of Medina Ohio / Moparholic stalking of Scott Gilbert of Atlanta, Georgia; please respond to this post or send directly to me via email. Thank you. Below is a written response given to him for the 12 or so unwanted and unsolicited threat letters he sent today via email.

This letter is in response to approximately 12 letters you sent to me today.

As I have told you before, you started this attack and not me. I have asked you not to email me, and you continue. You continually accuse me of posts I have never made. You have used private photographs without authority, and you have even gone as far as to post three or more home addresses of various people in hopes of locating my personal address for the purpose of putting my family at risk. Do not think this has gone unnoticed. What you are doing is felonious; and as soon as I have time to sit down with a lawyer that specializes in internet stalking, all of your emails and posts on Usenet will be turned over to the Georgia Bureau of Investigation. I have also been made aware by someone in your CB group that you have made attempts to contact my employer, mortgage company, bank, and cell phone of one of my minor children. That email too was saved and will be turned over to the GBI with the rest of your emails.

Georgia

16-5-90 G

A person commits the offense of stalking when he or she follows, places under surveillance, or contacts another person at or about a place or places without the consent of the other person for the purpose of harassing and intimidating the other person. For the purpose of this article, the terms "computer" and "computer network" shall have the same meanings as set out in Code Section 16-9-92; the term "contact" shall mean any communication including without being limited to communication in person, by telephone, by mail, by broadcast, by computer, by computer network, or by any other electronic device; and the place or places that contact by telephone, mail, broadcast, computer, computer network, or any other electronic device is deemed to occur shall be the place or places where such communication is received. For the purpose of this article, the term "place or places" shall include any public or private property occupied by the victim other than the residence of the defendant. For the purposes of this article, the term "harassing and intimidating" means a knowing and willful course of conduct directed at a specific person which causes emotional distress by placing such person in reasonable fear for such person's safety or the safety of a

member of his or her immediate family, by establishing a pattern of harassing and intimidating behavior, and which serves no legitimate purpose. This Code section shall not be construed to require that an overt threat of death or bodily injury has been made.

A person commits the offense of stalking when such person, in violation of a bond to keep the peace posted pursuant to Code Section 17-6-110, standing order issued under Code Section 19-1-1, temporary restraining order, temporary protective order, permanent restraining order, permanent protective order, preliminary injunction, or permanent injunction or condition of pretrial release, condition of probation, or condition of parole in effect prohibiting the harassment or intimidation of another person, broadcasts or publishes, including electronic publication, the picture, name, address, or phone number of a person for whose benefit the bond, order, or condition was made and without such person's consent in such a manner that causes other persons to harass or intimidate such person and the person making the broadcast or publication knew or had reason to believe that such broadcast or publication would cause such person to be harassed or intimidated by others.

This is a PRIVATE message. If you are not the intended recipient, please delete without copying and kindly advise us by e-mail of the mistake in delivery. NOTE: Regardless of content, this e-mail shall not operate to bind sender to any order or other contract unless pursuant to explicit written agreement or government initiative expressly permitting the use of e-mail for such purpose.

Do not forget to mention Mopey's gazillion messages about Scott that he cross posted to Alt.Usenet.Kooks. Once he got AUK involved in his felonious stalking, he had to know a ton of spammers and kook hunters would come in here looking to inflame and incite. I found it rather funny that Steveo would be the one to make this original post complaining about what happened to RRC. He personally did it; and nobody else in this group can take even a single iota of credit for the crap that is in here. Perhaps he was insinuating that everyone in RRC are idiots and would not notice that this all happened exactly when he started his compulsive stalking issues?

Attention Moparholic AKA Steve Parks:

Your continued stalkings are going to be reported to the Georgia Bureau of Investigation; Steve Parks AKA Moparholic AKA the other dozen or so false names you use including various women with the last name of Gilbert. Irrespective of who your name and address ends up being; you will be prosecuted to the full extent of the law once a legal way to uncover your anonymity occurs. You have now posted the names of three Georgia residents with the intent of doing physical harm or death, as well as have shown your actions are clearly hate crimes involving Judaism and homosexuality. Your intention to harm minors is also felonious. Be aware that if you show up on my property you will be dealt with within the rights accorded to homeowners in the state of Georgia up to an including the use of deadly force. Same holds true for any attempts you make to harm my family on or off my property - you will be dealt with within the letter and intent of Georgia law. I am also notifying the Georgia Bureau of Investigation of your attempts to contact my bank, my employment, and my children; all of which I believe are interstate / Federal felonies.

Georgia

16-5-90 G

A person commits the offense of stalking when he or she follows, places under surveillance, or contacts another person at or about a place or places without the consent of the other person for the purpose of harassing and intimidating the other person. For the purpose of this article, the terms "computer" and "computer network" shall have the same meanings as set out in Code Section 16-9-92; the term "contact" shall mean any communication including without being limited to communication in person, by telephone, by mail, by broadcast, by computer, by computer network, or by any other electronic device; and the place or places that contact by telephone, mail,

broadcast, computer, computer network, or any other electronic device is deemed to occur shall be the place or places where such communication is received. For the purpose of this article, the term "place or places" shall include any public or private property occupied by the victim other than the residence of the defendant. For the purposes of this article, the term "harassing and intimidating" means a knowing and willful course of conduct directed at a specific person which causes emotional distress by placing such person in reasonable fear for such person's safety or the safety of a member of his or her immediate family, by establishing a pattern of harassing and intimidating behavior, and which serves no legitimate purpose. This Code section shall not be construed to require that an overt threat of death or bodily injury has been made.

A person commits the offense of stalking when such person, in violation of a bond to keep the peace posted pursuant to Code Section 17-6-110, standing order issued under Code Section 19-1-1, temporary restraining order, temporary protective order, permanent restraining order, permanent protective order, preliminary injunction, or permanent injunction or condition of pretrial release, condition of probation, or condition of parole in effect prohibiting the harassment or intimidation of another person, broadcasts or publishes, including electronic publication, the picture, name, address, or phone number of a person for whose benefit the bond, order, or condition was made and without such person's consent in such a manner that causes other persons to harass or intimidate such person and the person making the broadcast or publication knew or had reason to believe that such broadcast or publication would cause such person to be harassed or intimidated by others.

You have posted no less than three addresses of various Georgia residents (and most probably more than that) in the hopes that someone else will assault or murder the residents of those addresses; and you have the never to call someone else a sissy? It seems like you are quite a coward; based clearly on your actions to date. A coward and a felon. At any rate; you have been requested in email and usenet to curb your felonious actions and false accusations; and at this point your posts will just continue to be accumulated for presentation to the proper authorities.

Georgia

16-5-90 G

A person commits the offense of stalking when he or she follows, places under surveillance, or contacts another person at or about a place or places without the consent of the other person for the purpose of harassing and intimidating the other person. For the purpose of this article, the terms "computer" and "computer network" shall have the same meanings as set out in Code Section 16-9-92; the term "contact" shall mean any communication including without being limited to communication in person, by telephone, by mail, by broadcast, by computer, by computer network, or by any other electronic device; and the place or places that contact by telephone, mail, broadcast, computer, computer network, or any other electronic device is deemed to occur shall be the place or places where such communication is received. For the purpose of this article, the term "place or places" shall include any public or private property occupied by the victim other than the residence of the defendant. For the purposes of this article, the term "harassing and intimidating" means a knowing and willful course of conduct directed at a specific person which causes emotional distress by placing such person in reasonable fear for such person's safety or the safety of a member of his or her immediate family, by establishing a pattern of harassing and intimidating behavior, and which serves no legitimate purpose. This Code section shall not be construed to require that an overt threat of death or bodily injury has been made.

A person commits the offense of stalking when such person, in violation of a bond to keep the peace posted pursuant to Code Section 17-6-110, standing order issued under Code Section 19-1-1, temporary restraining order, temporary protective order, permanent restraining order, permanent protective order, preliminary injunction, or permanent injunction or condition of pretrial release, condition of probation, or condition of parole in effect prohibiting the harassment or intimidation of another

person, broadcasts or publishes, including electronic publication, the picture, name, address, or phone number of a person for whose benefit the bond, order, or condition was made and without such person's consent in such a manner that causes other persons to harass or intimidate such person and the person making the broadcast or publication knew or had reason to believe that such broadcast or publication would cause such person to be harassed or intimidated by others.

Mark, Just ignore them.

They only tease you because of the stupid things you say when you
follow up. Just ignore them and they'll give up.

Stop giving them reasons to tease you. It only makes you look
more stupid.

Take a break from the radio groups for a while, Maybe work on your
moon bounce some more.

Hey asshole, the authorities will do nothing about your whining and
sniveling as you are nothing more than a net.kook. Your posts are archived
just as Steveo's are. They will look at this as a stupid flame war.

"You never asked someone who goes into areas of the internet that are only for adults who has an underage id somehow or another if they are a cop posing as an underage person online?
I guess lots of people just don't watch dateline or read stories much. Why don;t you go to pervertedjustice,com and see what they do. They are awash in their self-proclaimed glory after they lied to membners of the public.
They are awash in their self-proclaimed glory after they posed as an underage person and agreed to do all sorts of sex acts wioth adult males, and they are adults posing as teenager themselves. They make themsleves into liars by falsely impersonating underage persons and by not fuilfilling the words they tell the victims online in their chats. Why don't you read it where they tell these victims of their deceit about how they have been with grown men and such? Why don't you read it where they say, "That would be cool." after someone makes an advance towards an adult who is posing as a teenager? And, where they agree to meet the person, etc.
Lost control, didn't you?
Is that why you feel as if you need to lie so much now? I see where lots of these false impersonation games are not sticking. They feel as if they can lie and then order the victims to get counseling in the gayblade, governmental, pro-choice tax leech counseling centers. They are doing nothing more than usury and fraud in many cases." -- Wentzky almost comes out of the closet as a pedo/ephebophile in MID: <H%%Eg.28916$Uq1.22411@bignews6.bellsouth.net>

Oh, so you're _trying_ to earn the Golden Killfile award, are you? Well,
then carry on. I wouldn't want to deprive you of the "honour" of being
named the most boring k00k of August 2006. If net.suicide is what you're
after, don't let me stop you. I hope you don't mind if we(tinw) use your
radio groups to drive the trolls in rmcr bugfuck -- not that you minding
would stop us(tinu), but still.

> OTOH IF the omplied threat were carried out I wonder how many posters
> would drop off the web at once 20 or so I think

What, you mean they're such wusses they'd stop posting to usenet and get
lives, if we(tinw) nominate them for, then vote them winners of, the

Busted Urinal? I guess they'll jointly win "Coward of the Month", the following month, then.

Yes, it makes perfect sense! However, I'd like to address a certain
wingnut's comment on the site batty provided:

"Oh and one laat thought, if anyone were to spend as much time
critiquing leaders from other countries, I am sure you would find them to
have faults.

"Just once I want to come on this board and see someone critisize the
leader of a terrorist organization, or to a country that is a sworn enemy
of this country. Maybe like the presidnet of Iran, or N. Korea. But gee
why would anyone do that, it might create contiversey, and why would
anyone do that when it is so fun and popular to bang on our leader. Think
about it."

The rest of the world's leaders are just the usual gang of idiots
(especially mine, Stephen Harper), all of whom could use a permanent
vacation in the event horizon of a singularity, for various reasons. The
assorted terrorist organisation leaders are a bunch of strawmen, WRT
criticising them, since they are classed with serial killers and child
molestors, on the average popularity scale. Of course, anyone
demonstrating the level of literacy exhibited by the specimen I quoted
above wouldn't be likely to comprehend such points, but I digress.

"You never asked someone who goes into areas of the internet that are
only for adults who has an underage id somehow or another if they are a
cop posing as an underage person online?
I guess lots of people just don't watch dateline or read stories much.
Why don;t you go to pervertedjustice,com and see what they do. They are
awash in their self-proclaimed glory after they lied to membners of the
public.
They are awash in their self-proclaimed glory after they posed as an
underage person and agreed to do all sorts of sex acts wioth adult
males, and they are adults posing as teenager themselves. They make
themsleves into liars by falsely impersonating underage persons and by
not fuilfilling the words they tell the victims online in their chats.
Why don't you read it where they tell these victims of their deceit
about how they have been with grown men and such? Why don't you read it
where they say, "That would be cool." after someone makes an advance
towards an adult who is posing as a teenager? And, where they agree to
meet the person, etc.
Lost control, didn't you?
Is that why you feel as if you need to lie so much now? I see where lots
of these false impersonation games are not sticking. They feel as if
they can lie and then order the victims to get counseling in the
gayblade, governmental, pro-choice tax leech counseling centers. They
are doing nothing more than usury and fraud in many cases." -- Wentzky

One or two tried using his name, but nobody could really replace him.
Looking at the group now, I have to admit that it is far worse now than when the Voobner character was around. At least some of his posts were funny, this latest group of trolls are simply people with issues about Gays.

They seem to protest too much, maybe they need to come out of the closet.

Regards,
Peter.

> archived just as Steveo's are. They will look at this as a stupid
> flame war.

Your internet buddy Steveo posted 3 addresses and phone numbers looking to find anti-semites and homophobic skinheads to attack my family (including 5 young children). Two of the addresses were of people he didn't even know; and one was my last home from 2000 - 2003. Someone in this group also told me that he contacted my last employer and my present bank. There is nothing flame-war about that; and it most certainly is not the act of someone who is just having a little fun and doing some teasing. That is a felony; and he is putting people (including children) at risk.

Georgia

16-5-90 G

A person commits the offense of stalking when he or she follows, places under surveillance, or contacts another person at or about a place or places without the consent of the other person for the purpose of harassing and intimidating the other person. For the purpose of this article, the terms "computer" and "computer network" shall have the same meanings as set out in Code Section 16-9-92; the term "contact" shall mean any communication including without being limited to communication in person, by telephone, by mail, by broadcast, by computer, by computer network, or by any other electronic device; and the place or places that contact by telephone, mail, broadcast, computer, computer network, or any other electronic device is deemed to occur shall be the place or places where such communication is received. For the purpose of this article, the term "place or places" shall include any public or private property occupied by the victim other than the residence of the defendant. For the purposes of this article, the term "harassing and intimidating" means a knowing and willful course of conduct directed at a specific person which causes emotional distress by placing such person in reasonable fear for such person's safety or the safety of a member of his or her immediate family, by establishing a pattern of harassing and intimidating behavior, and which serves no legitimate purpose. This Code section shall not be construed to require that an overt threat of death or bodily injury has been made.

A person commits the offense of stalking when such person, in violation of a bond to keep the peace posted pursuant to Code Section 17-6-110, standing order issued under Code Section 19-1-1, temporary restraining order, temporary protective order, permanent restraining order, permanent

protective order, preliminary injunction, or permanent injunction or condition of pretrial release, condition of probation, or condition of parole in effect prohibiting the harassment or intimidation of another person, broadcasts or publishes, including electronic publication, the picture, name, address, or phone number of a person for whose benefit the bond, order, or condition was made and without such person's consent in such a manner that causes other persons to harass or intimidate such person and the person making the broadcast or publication knew or had reason to believe that such broadcast or publication would cause such person to be harassed or intimidated by others.

Fine. Leave it up on your blaaaaargh. Really, it's fucking hilarious.
Pun intended. In fact, post the link again, I'm sure lots more people
would be highly entertained by Michael Cook's parody of Mousy Bishop and
Chucknozzle Lie-sot, the drunk plagiarists of Jacksonville with their own
fantasy lives.

>> it's hilarious work by Michael. You look *so* hawt!
>
> Ask him in a year. You'll do that for me, won't you stud?

It's been around rather longer than that, Tommy Boy -- I remember your
whining about it last year. Are you ever going to follow through on all
your threats, or is that a redundant question, because you can't?

It's really touching how you and your other homosexual pal came all the
way over from another group to 'rescue' poor Wardy. Well done.

I'd really love to sick around and torment you but unfortunately my
busy schedule only permits me to spend my 10 minute a day usenet
allotment on tormenting just one fucking moron, and since Wardy got
here first .... Anyway, unlike you I have a life outside usenet.

Give my best to Dilbert, cubicle boy.

If that was really the case, then your being there was a war crime in and
of itself -- just as is the case in Iraq.

Rog is acting even less stable than is his norm. Two days ago he

believed that I was Stagger Lee. Yesterday he thought Lloyd Davies was

Stagger Lee. Today he seems convinced that I am Stagger Lee.

He's even inventing new words like "henpeckhim". He has a fixation on

prostitution and animal sex. The UnWiseman may be headed back to the

funny farm.

/////

Wog has a few "issues" that the rest of us are, fortunately, not burdened with. For us to walk in his shoes would require that we be in the working, mentally dysfunctional world in which he exists.

Roger is clearly delusional. His cranial activity seems to be disrupted by random electrical synapses that occur whenever he touches a keyboard.

In short, his brain misfires more often than not.

Two days ago you were Stagger Lee. Yesterday Lloyd was Stagger Lee. Then along comes the 'real' Stagger Lee who posits real and to the point mathematical equations and Roger, unable to understand same, accuses Stagger of plagiarism.

It never occurred to Roger that just maybe Stagger Lee knows of which he speaks, since Roger has not the education to understand and is, himself, a renowned plagiarist.

It is a hoot to see Stagger Lee get the best of Roger at every turn. Stagger Lee is clearly Roger's mental superior.

I was busily flonking away in alt.usenet.kooks, when The Goddess Eris
Herself suddenly made me reply to Ward Hardmanure:
> FreeSpeechStore wrote:
>
>> Outing personal info in subject lines, no matter who gave you
>> "permission" is k00ky. How the fuck do you know that the real Ward
>> Hardman directed you to it? How do you know that it wasn't a personal,
>> real-life enemy of his, making a cowardly attempt to get some other
>> k00k to harass Ward?
>
> Duh! Maybe everyone on usenet is really JFK. Maybe there is no Ward
> Hardman.

Not the point. You have no fucking idea if anyone is who they say they
are, on usenet -- that's the whole point of /posting/ to usenet --
anonymity. Legalnames and nicknames, they're all the same here, because
no one can prove anything (without delving into private ISP records). So
outing personal info is the same as telling anyone who might ever have a
grudge against your victim exactly how to stalk them (in addition to
being a cowardly means of getting back at someone you don't like, for
whatever reason). That makes you an accessory before the fact, if anything
ever happens to Ward, so you better pray nothing ever does happen, asswipe.

> Anyway, subnormal underage fellator of livestock, I haven't outed
> personal info in subject lines, except when reproducing subject lines when
> replying.

So you're a willing accomplice to outing. Scum. Filth.

> I still have no idea what you're farting about. Are you a scientologist on
> acid? Why do you crosspost to alaska and mj?

Scientologists are k00ks. Their entire religion is based on a pack of
lies, backed up by various means of intimidation, as with Xianity, Islam,
and Judaism -- so no, we're not them. We(tinw) analyse k00ks such as
yourself, and when we(tinw) decide that a given k00k is worthy of

recognition, we(tinw) hand out awards to them, such as Kook of the Month, Clueless Newbie otM, Coward otM, the Golden Killfile, and many others. Here's a portion of the FAQ:

From http://www.netcabal.com/auk/faq.html

==========

1. What is this newsgroup, alt.usenet.kooks (AUK)?

A mass of electrons spread out upon bandwidth scattered across the globe for the express purpose of separating the wheat from the chaff of the net.

2. This is a joke, right? RIGHT?!!

No more a joke than the fact that ISPs let people on every day who have nothing better to do than annoy their neighbors enough to win by popular vote silly little awards created for just such buffoons as them.

3. What's this newsgroup for?

The newsgroup alt.usenet.kooks is for the discovery and discussion of Kooks on Usenet and the Internet. These people are known technically as net.kooks.

4. What's this newsgroup NOT for?

This group exists for recreational Kookology, not for Very Personal Vendetta. It is not to be used for general harassment of someone, or for net abuse such as spamming and flooding and cancelbombing in an attempt to gain vengeance on someone or get the denizens of AUK to shut up. Either way, it won't work, it's very messy, "Bob" will give you triple your money back, and you don't get a life.

Also, we [tinw] are not in the business of harassing the vulnerable or the insane. Occasionally an apparent net.kook proves to be genuinely ill. In such cases the person is disqualified from winning awards and other posters are asked to avoid exarcerbating his or her problems. Similarly, trolling or kook-hunting in support groups is strongly discouraged.

5. Who let this newsgroup in here, and why wasn't I notified?

That's what you get for hogging the Beer Fund.

(Here you can view the control message that started it all, from our Mighty Founder MAC.)

http://www.netcabal.com/auk/cmsg.html

6. Who is a net.kook?

If you post uniquely strange, preferably incomprehensible articles, or you manifest a persistent, extreme, and somewhat bizarre obsession, you just might be a net.kook. And more.

It is important to note the subtle distinction between a net.kook, a net.cretin, a clueless newbie, troll, or garden-variety @$$hole. The newbie, one hopes, can acquire a clue on the installment plan even if he can't afford to buy one for cash; the cretin is merely stupid and/or irritating; the troll makes a fool out of himself by making a fool out of you, the @$$hole is, well, simply that. But a TRUE net.kook has a special fascination derived from his/her/its utter ineffability. Their behavior is irrational, if not downright weird, but they are seldom merely boring.

It is not considered appropriate to nominate clueless newbies, trolls, or longwinded spambrains as net.kooks. It is acceptable to nominate net.cretins, or simply to present them, without nomination, for whatever minor amusement value they may have; but the real focus here is on net.kooks in all their raging, indomitable glory.

Important Disclaimer: the fact that someone has been proclaimed a net.kook does not imply any psychological diagnosis in and of itself. A net.kook may or may not be clinically insane; that is not the concern of the AUK audience.

We hope.

7. Can you show me a few examples?

I'd rather not, but it may help to clarify things... The person who posted a handful of meaningless, ill-formed newgroup messages on May 21, 1994 was a Clueless Newbie. The person who hung around alt.religion.kibology during April and May 1994, constantly posting boilerplate "warning" messages telling people that ARK messages were intentionally meaningless, was a net.cretin. The people who post demented "scientific" theories, like Archimedes Plutonium's concept of the universe being one giant atom of plutonium, and seem incorrigible to criticism, are moderate net.kooks. The sort of being who constantly raves about the conspiracy against her/him/it is an extreme net.kook, especially if he/she/it automatically assumes that anyone who questions their world-view is an agent of the conspirators or is an ultra right-wing/left-wing extremist, and hides behind an anonymous remailer to avoid "persecution" even though they would get one hell of a lot less of it by not posting at all.

8. How do I present a Kook on this group?

The preferred technique is to get the suspected Kook to start posting to AUK so that we can all see him/her/it in all their first-hand Glory. You can do this by posting followups to the suspect's weirder messages, with your followups nonchalantly crossposted to AUK. If the suspect responds to your messages without editing the Newsgroups line, you've achieved your goal.

Another acceptable method is to repost, complete and unedited, one or two of the suspected Kook's recent rants. If you do this, please provide a brief intro in the header describing what the hell you're doing, such as indicating who this person is, what group you found the message on,

or why you think the rest of us should give a rat's @$$ about it.

You should be aware that if you try this with some perfectly reasonable posting, you may be flamed to net.hell and back and probably suspected of being a net.loon yourself. It is also considered extremely lame to nominate someone as a Kook simply because you have lost, or at least failed to win, a debate with them; persistently doing so is likely to get you nominated for Kook Awards. That someone fails to perceive the self-evident, unassailable wisdom of your viewpoint does not, in and of itself, constitute Kookery.

9. What are the Kook Awards?

The newsgroup alt.usenet.kooks offers a variety of widely-recognized and highly dubious honors for your service, applying to net.kooks everywhere. They recognize several kinds and many levels of net.kookery.

Here is a detailed list of AUK awards and descriptions.

http://www.netcabal.com/auk/awards.html

10. Who the FSCK appointed YOU net.kookologist/god/nazi etc.

Nobody. We have a Gift.

==========

Incidentally, IIRC, the ones who started the x-poasting were not in fact kook-hunters from AUK, but the likes of you yourself and your buddy, "James", though ICBW. Not that it's important -- analysing kooks is what we(tinw) here at AlcaTroll Labs /do/, and whether a k00k chooses to post here on his own or is tricked into it, we don't really care. Either way, you hace been brought to our(tino) attention, and we won't ever forget about you for long. Ever.

only for adults who has an underage id somehow or another if they are a
cop posing as an underage person online?
I guess lots of people just don't watch dateline or read stories much.
Why don;t you go to pervertedjustice,com and see what they do. They are

awash in their self-proclaimed glory after they lied to membners of the public.
They are awash in their self-proclaimed glory after they posed as an underage person and agreed to do all sorts of sex acts wioth adult males, and they are adults posing as teenager themselves. They make themsleves into liars by falsely impersonating underage persons and by not fuilfilling the words they tell the victims online in their chats. Why don't you read it where they tell these victims of their deceit about how they have been with grown men and such? Why don't you read it where they say, "That would be cool." after someone makes an advance towards an adult who is posing as a teenager? And, where they agree to meet the person, etc.
Lost control, didn't you?
Is that why you feel as if you need to lie so much now? I see where lots of these false impersonation games are not sticking. They feel as if they can lie and then order the victims to get counseling in the gayblade, governmental, pro-choice tax leech counseling centers. They are doing nothing more than usury and fraud in many cases." -- Wentzky almost comes out of the closet as a pedo/ephebophile in MID: <H%%Eg.28916$Uq1.22411@bignews6.bellsouth.net>

Oh, don't imagine for one second that we(tinw) are here to "rescue"
anyone, Crackhead. We'll get around to Ward later, and if he's a k00k, he
won't be able to hide it, or resist replying to us. You and your fellow
Outer Filth in rmcr are the current focus of our attention, that's all. If
you're telling the truth when you claim that "everyone" there hates him,
and is in favour of your outing him, then I guess your group's name will
go up there with soc.men, on a very short list of entire groups to win
Kook of the Month, and AUK will be x-poasting to rmcr for many years to
come. After all, if the whole group wins, that won't disqualify any
individual subscriber to the group from winning KotM himself...

Perhaps you are confused about how all this works. When _you_ x-poast into /our/ froup, without invitation, you don't get to invite us out. Rather, if you quietly stop x-poasting to our group or replying to any threads, any threads at all, we eventually lose interest. Maybe. However, you, Cletis, are currently the sole candidate for Busted Urinal, this month, though that nomination may in turn wind up being morphed to include the entire group, just like the GK nom (because rrcb is sure stinking up usenet). However, the involvement of other rec.radio.* groups does present a bit of a conundrum there, so we may need to investigate more deeply and continue the x-poasting for the rest of the year, quite possibly.

Oh, and before you ask, no, we're not teenagers. Some of us are retired, others work, and still others are homemakers (not that that isn't work), and we are all interested in the phenomenon of the net.k0ok, of people who go online and poast crazy, off-the-wall shit just like yours.

Thanks for crossposting Wardy's address for me, incompetent
shit-for-brains.

As for your depressed claque of acne-scarred troglodytes, WHO CARES?
Jesus, you little morons take yourselves so seriously! Get lives.
Better yet, get deaths and improve the gene pool, not that anyone would
want to mix with you genetically or otherwise.

Speaking of which, how exactly do you go about enforcing your dictums?
Not gonna invite me to your parties? Boo hoo. I'm s-so s-scared.

Have a nice time brooding about it in my killfile with your fellow
diseased Eris-worshipers. Plenty room for more.

PLONK

Oh, I see you haven't been properly introduced. Salter, meet Woger
Wiseman, pedophile and troll in the rec.radio.* groups. Woger, STFU, then
ESAD, you pathetic broken urinal.

Surely you refer not to Wiseman.

>loss.
>

One type of ANL in analog TV used a capacitance diode.
Anytime a big spike occurred, it de-tuned the circuit (38MHz IF).
This was Philips design IIRC, possibly patented.

If you wanted to go more 'advanced' you could delay the signal
with an analog delay line for a few micro seconds, trigger some
circuit on the spike, and then mute the delayed the signal _before_
the spike starts for some time...

Could be done digital too(when will CB go digital to 300 channels
in the same band? oh well...)

If you want to use the varicap system all you need is a varicap, capacitor,
resistor bias likely.

> I'm not reading all that gay trekkie FAQ crap.

That's okay, it was more for anyone else who might be paying attention.
Scum such as yourself get no such consideration, otherwise. BTW, it has
nothing to do with Star Trek or the fandom of same. Personally, I loathe
Star Trek, speaking as one who has given it a chance.

> If the asshole who claims to be Ward Hardman is not Ward Hardman and
> there is a real Ward Hardman then it's the fake WH who has caused
> problems for the real one, not me.

It was a hypothetical explaining why non-clueless types and non-k00ks
don't post personal info, especially not in subject lines, alleged to be
of other posters. As a willing participant in such shenanigans, you are
considered to be a k00k yourself. A k00k and more.

> All I ever did is remind people of his past posts on google groups.

Uh-huh. And re-post personal info in subject lines. Since you know how to fuck around with subject lines (as you have repeatedly demonstrated), you don't get a free pass to Non-Kooksville, where people are free to vote (and nominate, and second nominations) in the monthly AUK Kook Awards. Until we(tinw) ascertain whether the rest of rmcr was okay with associating with Outer Filth, they don't get one, either.

> But I'm pretty sure WH is really WH, and why should I give a fuck about
> your fantasising? Go suck your Dad's asshole.

You _should_ give a fuck, because if you and your pal had played this differently, you might have been the ones nominating Ward for KotM. Then we(tinw) would be focusing on /him/, not you, Filth. We(tinw) could right now be dissecting his limericks and analysing them for k00ky content. Instead, you and Crackhead are the focus. You and Crackhead are the k00ks. Note, I am not merely using a pejorative here. That word has a real meaning, and we(tinw) can't just apply it to anyone, not accurately or truthfully.

> Stop confusing me with the other guy that does post his fucking address,
> you stupid dribbling cunthole.

No. You are quite willing to reply to him and reproduce the entire subject line, with every bit of personal info intact -- repeatedly. That makes you precisely as bad as him.

> Go back to your gay kooks ng and stop fucking around crossposting to
> rmcr

Noooo, no, I think we're going to become very familiar with each other, you and I. You are a lowlife scumbag and Outer Filth. There is nothing lower than you. You are an enabler to stalkers (and worse), a coward, and until we(tinw) hace decided as to the culpability of your fellow group subscribers (whether they are also such enablers, such Outer Filth-by-proxy), the x-poasting will continue. It doesn't matter how offensive Ward may have been. You are far worse. I have no words to describe just what kind of subhuman you are -- "troll", "troglodyte", "orc", "goblin", and similar terms seem like compliments, compared to you.

> and alaska etc etc

Oh, they're in it to provide an audience, and peanuts, if they so desire. Or rotten tomatoes, brickbats, hand grenades...Also, lessons in why Being Outer Filth Is A Bad, Bad Thing, for the clueless, especially the n00bs. They don't get to object, of course, since they harbour k00ks as well.

Man, you piss me off.

The Demon of Mockery

3680. Suck me Daddy!!

This is a true story of the first time my dad and I had sex. If you get off on it good. Since I've read so many stories on the net about first time encounters, I knew that sooner or later I would want to share mine. It's not a 'big' deal and unlike the experiences I've read on the net, mine seems to be pretty insignificant, but I thought it might be hot for some guys out there who are into incest and dad/son sex. So here it goes.

Starting when I was 5 I always had trouble with wetting the bed - every other night. So much so that my parents decided to take me to a doctor to see if there was something wrong with me. There wasn't of course, I just had an under developed bladder. I was the youngest of 3 kids and the most mischievous. My dad was a chemical engineer for a shampoo company and starting when I was 5 I would often sleep in his bed. My older brother was in college and my sister Jill was almost 16 and gone all the time. My mom worked as a sitter for people with disabilities, so she was often gone on the week nights. I guess my dad was lonely because he never minded me getting in bed with him -even if it was late and he was already asleep.

Due to my bed wetting problem, I would wake up several times a night which never seemed to bother my dad because he was a sound sleeper. Anyway, around this time I remember always waking with a little kid erection. Every morning my dad would roll over, lift up the covers and pat my crotch area to see if I'd wet myself the night before. I never thought anything of it and it definitely wasn't sexual. If I had peed in the bed, the first thing we would do is take off the sheets and bring them downstairs to the washer. My mom HATED it when I slept in their bed because of that reason, but my dad never told her when I did and he didn't seem to care if I had an accident.

It was around this same time that they started having a lot of problems in the marriage and when I turned 6, they got a legal separation. My mom moved in with her parents and me and Jill got to stay with my dad for the time being. During this time he seemed pretty depressed and I remember him drinking a lot more. Even so, he still let me sleep with him, especially now that mom was gone.

I remember waking up in the morning with my little piss hard-on and as usual my dad would wake up, roll over and place his hand over my little dick. He sometimes would make jokes about my 'little pup tent' which I always dismissed.

I don't know when it started to change really, but I remember seeing him get out of bed with his own piss hard on poking out the front of

his shorts. I never got to ask him about it and he never seemed embarrassed or shy around me and I liked it that way. But the more I saw him, the more fascinated I became. I was fascinated by all of him. By his long hairy legs, by the hair on his chest and by the large erection in his shorts. Sometimes it was almost like he was parading in front of me to see what I would do and I became really curious and remember wanting to see more.

I remember the time everything changed. I guess a lot of guys would think what happened was sick, but to this day it remains one of the hottest things that's every happened to me. I was still only 6 though.

I'd woke up to hear my dad's alarm clock going off. It was a high pitched buzzing sound that I hated, but that morning he turned it off rather quickly.

I remember laying next to him and feeling my little dick spring a boner. My dad then sat up in the bed, pulled back the covers and placed his hand on my groin.

"You wet?" He asked me not looking down.
